Hey BWP,

I'm Mason Rodarte, a digital marketing strategist. 🚀

I was scrolling through your website, and I must say that it is very well organized and easy to navigate. \Diamond

The thing is, you're not maximizing your customer reach through **email automation**.

Email automation does a handful of things for your company:

- It encourages customers to buy more.
- It prompts customers who have already made a purchase to buy again. 🔄
- It also motivates potential customers to make a purchase. 👔

When customers are reminded of deals and products through emails, they are more likely to make a purchase.

Let's grow your business and reach MORE customers. I suggest we schedule a sales call.

Best,

Mason Rodarte
