TELEPHARMACY

Program Brief:

Telepharmacy service was offered by the UP College of Pharmacy (UPCP) to provide timely advice to patients with regards to their use of medicines and to provide accurate information to reduce misconceptions on the use of these life-saving commodities. It serves to provide advice especially to the vulnerable population or those with comorbidities such as those with respiratory diseases, diabetes, hypertension, and infectious diseases. The need for this service was due to the increased fake news on drugs circulating in various forms of media and the irrational use of medicines during the COVID-19 crisis.

Program Expected Outcomes:

Specifically, the program aims to:

- collect drug-related information about the patient; and,
- provide drug information through a telepharmacy service with an established infrastructure for telehealth services in UP-PGH

Program Organizers:

Erica Nicole J. Tayko, RPh
Chair, Telehealth Committee
UP College of Pharmacy
