

### **Anti-Voter Bills in State Legislatures**

- Most of us believe our democracy is stronger when it includes all of us. But right now, extremist politicians want to put barriers to voting for millions of people, especially people of color, so they can pass an agenda that gives power to corporations, billionaires and MAGA extremists, while the rest of us pay the price.
- **Donald Trump and extremists legislatures are using the invention of “the big lie” to disenfranchise millions of voting** by enacting restrictive anti-voter policies that have a disproportionate impact on Black, Indigenous, young and new American voters.
- In state legislatures across the country, the same politicians who tried to overturn the will of the people in the 2020 election are now trying to rewrite the rules so that only people who vote for them can cast a ballot.
