

Evaporation Cycle

Area: Cosmic/Sensorial

Materials:

- A small white board or cork board
- Paper images of sun, clouds, rain and ocean
- Tape for sticking images onto board

Direct Aim: To teach the evaporation cycle

Ages: 2-6 years

Presentation:

1. Invite child to the table.
2. Show the child the images in their correct places on the board (sun, rain, clouds, sun).
3. Explain the evaporation cycle to the child, indicating how the water evaporates from the ocean due to the heat of the sun, forms clouds, and is released in form of rain when the clouds can no longer hold the weight of the water.
4. Invite the child to place the images into the correct location

Points of Interest: Learning new words and sticking the paper images onto the board.

Control of Error: The facilitator of the activity

Language: Evaporation, condensation, precipitation, sun, clouds, ocean
