

Excelling in 8th Grade Science

The **secret** to doing well in 8th grade science is **completing all of your class and homework** by the due date. Assignments and lessons are designed to help you **better understand the concepts and material**. They are a way to build your skills and understanding.

Not all of these assignments will be entered into the gradebook. This is to allow you to **focus on learning without worrying about mistakes** (which is part of the learning process in this class) and having those mistakes negatively impact your grade.

In science this year you will, **“learn for the sake of learning”** and not because it will be formally graded (so **enjoy** and focus on the process and try not to worry too much if you get things incorrect at first or make mistakes).

We learn more from our failures than our successes. Keep on trying.

Remember, School Days are Cool Days... & Slow is Pro...
