

VSL

Have you gotten tired of watching other people win while you wait on the sidelines, failing year after year? Do you feel like you need to make something of yourself and start a business because deep down you know you're made for more? Well, this might be the most important video you'll see in 2024.

Now if your goal is making millions per month, driving a lambo 200 mph down the autobahn, jetting around from Bali to Marbella, I can't promise you that because even I haven't done that... yet. I'm not going to be one of those gurus who make insane claims but never deliver on their promises because they only care about making sales on their E-book or whatever.

This is also not for you if you want to be a lazy potato couch and make money without closing TikTok and putting in work.

What I can promise you beyond a shadow of a doubt is making at least \$5,000 per month using only a laptop and wifi connection, plus 1 hour a day of your time... because that's what I **know** how to do right now.
h.

I don't know about you, but I have always *hated* the idea of working a normal job. Living the same day over and over again just to make a fixed amount of money and being trapped in some cardboard office box was killing me inside. But starting a business was also really confusing because everyone and their grandmother are promoting some "new business model".

And the dumbest part is - the influencers who teach you these business models aren't even in the same industry. After wasting a lot of money and time on their courses I realized that all of these so-called experts were saying 'make 10k per month while only working 2 hours per day' because they are already successful and can afford to work 2 hours a day because they outsource their work to others with the money they already have. They don't tell you that when they first started out they worked like a slave for 12 hours a day just to scrape by. So how can you even learn to become rich from someone who's life is so much different from yours?

I know what it feels like to be lost between all the choices you have, without any action plan on how to get to where you want to be. That's exactly why I want to teach you something different. An attention-based passive monetization business. It is something that's working **right now**, in the current market, for normal people like you and me, without needing to compete in extremely saturated niches or outsource your work by spending money that you don't have.

It doesn't matter if you want to be an influencer, an AI agency owner, or open up a local kebab shop - once you reach a high enough level with this skill, you'll have money on demand without having to spend 4 hours sending outreach DMs or wasting 100\$/day on ads..

You might be asking... "So what is this skill that you're talking about?"

The answer is personal branding. I realized that all you need in order to grow your business is to learn the right social media frameworks and content-creation strategies. But, if you tried that by yourself, it could take many years to do it.

And that's exactly what Venture Vault is for. Inside this community, you'll go through 3 stages where I teach the social media strategies I used to gain over 20,000 followers and reach 5k/month in just 6 months handed to you on a silver platter from someone who's been in your exact spot, without needing to go through years of trial and error like me.

The stage first is Company Builder. Here you'll learn how to start your own online company and set it up for success, without running into legal hassles or other problems in the future.

Now, most people don't realize this, but it doesn't matter what business you're in, it's all about turning your skill into profit, which is why the second course section is the client acquisition universe.

Here I'll teach you the most modern and efficient ways to acquire customers for your business without sending thousands of outreach emails while sucking up to your prospects. You'll learn how to actually get paid, and then, you'll go to stage 3 of the course: Building and Growing Your Personal Brand.

There, you'll scale your business by growing your follower count, just like me! Alongside that, I'll teach you the business principles I've learned from my times of making 10k/month running an influencer agency.

What's different about this community is that unlike everywhere else, I won't just welcome you in and leave, while you're lost and confused on how to actually take action on the lessons. You'll have weekly private group calls with me where I'll make sure it's impossible for you to fail by answering all your questions, keeping you accountable, and pointing you in the right direction when you feel lost. As a cherry on top, there will be channels for networking with other business owners where you can meet your future friends and business partners.

Now, I'm going to be brutally honest. 90% of the people who enter will not achieve 20,000 followers or 10k/month as fast as me. It takes a bit of luck and hard work.

But if you're not brutally lazy, you'll learn skills that will be useful for your entire life and get you started on your business career. And as long as you stay consistent and complete your daily tasks, you're guaranteed to succeed.

This is one of the most life-changing projects I've worked on in a while, and probably the most affordable one I ever plan to release.

But I'm allowing only 30 people to get in for now, at half the price... That is because I want to make sure I get your feedback and give you my complete attention before I share it publicly.

So, the way I see it you have 3 choices: you can close this site and keep scrolling through Instagram reels. Everything stays the same.

You can also try to start a business by yourself, watching influencers, who tell you to use fancy hashtag strategies, post at specific times or whatever...

While they outsource most of their business and collect money from ads every time you watch their videos.

Trust me, they DON'T CARE if you ever succeed.

In fact, in their eyes, it's probably better if you don't.

Just think about it: if your posts finally start getting thousands of views, then you stop looking up their videos...

And then they stop getting paid!

So your third choice is to enter your email to guarantee your spot in Venture Vault. After learning here you'll finally see that "you received a payment of 5000\$" Stripe

notification in your phone, save months of hitting your head against the wall because you are not making any progress in business, and go from someone who will work a 9-5 for the rest of their lives to an actual business owner. Just type in your best address and talk to you in your email inbox!
