About

I am a result-oriented JavaScript programmer with 7 years of experience developing, testing, and maintaining enterprise software applications. Designed and developed over 20+ advanced applications from use cases and functional requirements.

I am highly interested in working on multiple platforms and learning and experimenting new technologies. I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me.

I do actively contribute to open source software development mainly for JavaScript(Node.js) and PHP in my free time.

I authored an open source Node.js MVC framework named [QuorraJS](#).

Languages

- ❖ Javascript
- ❖ PHP
- ❖ SQL/NoSQL
- ❖ HTML & CSS
- ❖ ActionScript 3.0

Technologies/ Frameworks I have worked with

- ❖ NodeJS
- ❖ AngularJS
- ❖ Docker & Docker Swarm
