

January 10, 2022

Dear P.S. 81 Families,

We would like to keep you informed about the increased number of Covid cases. Last week, we had a large number of positive Covid cases.

We are facing many challenges with positive cases. Please let us work together to keep our children safe. We appreciate it if you could use the updated screener each day before you send your child to school. Also, It is important that students who are sick and/or experience Covid like symptoms remain at home and get tested before they return. Please inform the school immediately if your child tests positive.

Students who receive an at-home kit because of a positive case in the classroom must take both tests as directed. These measures are put in place to ensure the safety of all students, staff and families.

Thank you for your cooperation.

Fondly,
Anne
