INTRODUCTION

Here, provides an adequate background to show the gap of the research. The section headings are arranged by alphabet, bold and 12pt Times New Roman, 1.5 spacing. Paragraphs shall be 1.5 spaced with indent.

METHOD

The Research Methods section describes in detail how the study was conducted. A complete description of the methods used enables the reader to evaluate the appropriateness of the research methodology.

The Participants/Subject/Population and Sample used in the study should be stated.

What, how, to whom the instruments used in the study should be explained. How the data was analyzed in the study should be described.

DISCUSSION

This section should explore the significance of the results of the study. A combined Findings and Discussion section is also appropriate. This section allows you to offer your interpretation and explain the meaning of your results. Emphasize any theoretical or practical consequences of the results.

The Discussion section should be a reasoned and justifiable commentary on the importance of your findings. This section states why the problem is important; what larger issues and what propositions are confirmed or disconfirmed by the extrapolation of these findings to such overarching issues.

Add verses of *al-Qur'an*, *Hadith*, *Ijma'* or *Qiyas* to support the author's argument.

CONCLUSION

The main conclusions of the study should be presented in a short Conclusions section. Do not repeat earlier sections.

REFERENCES

For submissions to issues published from 2021 onwards, Qawanin uses the **Chicago Manual of Style (Full-note)** in the References at the end of the manuscript. Cite only items that you have read and written on footnotes. Please use Reference Manager Applications like EndNote, Mendeley, Zotero, etc. Use other published articles in the same journal as models. All publications cited in the text should be included in the References section and arranged alphabetically. The citation quick guide can be found at
