

Current PTP Grades Enterprise Report

The Current PTP Grades Enterprise Report returns all grades in all teacher's PowerTeacher Pro gradebooks. Filters can be used to limit data.

At progress report and report card time it is important to review this report for grades and percentages that are out of sync and grade overrides.

To retrieve teacher's gradebook data:

- Start > Data & Reporting > Reports > Enterprise Reports > Current PTP Grades v2

Action > Filter

- Enroll_status
 - =0; returns only currently enrolled students
 - DO NOT REMOVE THIS FILTER
- Termid
 - >= xxxx; returns grades for the current year
 - 2700 = 2017-2018 school year, 2800 = 2018-2019 school year, 2900 = 2019-2020, etc.
 - DO NOT REMOVE THIS FILTER
- Storecode
 - Quarters: Q1, Q2, Q3, Q4
 - Semester: S1, S2
 - Final Grade: F1
- Percent
 - <= xx; returns students whose grade is less than or equal to a certain value
- Comment Value
 - contains fail; returns students whose reporting term comment includes the word fail (or failure)
- OverrideFG
 - =1; returns students whose grade has been overridden by the teacher and is not the calculated grade
 - The calculatedgrade and calculatedpercent columns can be compared against the grade and percent column

Additional Filters

- Student Number and LastFirst can be used to review one student's data
- Grade Level can be used to review one grade level's grades
- Course Number can be used to review one course number's grades
- Teacher can be used to review one teacher's grade
- Department can be used to review grades in one department (related to the course not the teacher)
- School can be used if to limit data to one school

Action > Select Columns

- Adds and removes columns from view

Action > Download

- Download report to excel or print a pdf

Action > Save Report

- Use if you wish to use the same settings over and over
- Retrieve your saved report by clicking the report pulldown and clicking the name of the saved report
- Saved reports are user specific and can't be shared between users. Each user that wishes to access this version of the report will have to create and save it.

Action > Format

- Use to sort and group data

Set Current Student Selection > Set Selection

- The students selected in the report are now the current student selection in PowerSchool
- Return to the PowerSchool Start Screen to work with these students
