1. Rules

1.1 General Rules

For the use of my themes and pages, the following rules apply:

- Do not claim it as your own.
- Do not steal (parts of) the code.
- Do not redistribute to other sites.
- Do not use it as base code.
- Do not edit beyond recognition.
- Do not delete or alter the credit.

Furthermore, please keep the following things in mind:

- You may share images of my codes to other websites if you credit me.
- Please do not share the code elsewhere as it is meant for tumblr themes and pages only. It will most likely not work well on other websites.

1.2 Extended Rules

For my premium themes and pages, there are some additional rules:

- Do not steal the code from the previews.
- Do not resell the code after purchase.
- Do not share the code you have purchased with others.

2. Features

2.1 Layout

- Fully responsive.
- Single column.
- Left sidebar.

2.2 Posts

- Repblog and like on index.
- Hide captions on index (optional).
- Hide tags on index (optional).

2.3 Design

- Neumorphic shadows (optional).
- Rounded corners (optional).
- All options listed in the customization guide.

2.4 Accessibility

- Smart dark mode.
- Disable fonts that aren't sans-serif (optional).
- Disable italicized text (optional).

2.5 Extras

- Five custom links.
- Custom audio styling.
- Custom lightbox.
- Custom mobile toolbar.
- Custom text selection.
- Custom tooltips.
- Custom tumblr controls (optional).
- Scroll to the top button.
- Search.
- And more.

3. Customization Guide

3.1 General Information

If you run into any issues while trying to customize this theme, please take the time to read the information and help presented in this customization guide first. I will try to explain some basics here, so the customization process is easier for you.

Additionally, before you come to my inbox asking about something, try to do the following things first:

- Read this customization guide.
- Read through the [FAQ](#). Maybe the question has been answered there.
- Read through the [support](#) or [answered](#) tag on my blog.
- Read through the answers on [silbrigsupport](#).
- Try to google the issue – w3schools, stackoverflow and others often have an answer.

If none of that helped you resolve the issue, send me a message via my inbox or the tumblr direct messenger.

Here is some basic etiquette because otherwise I either cannot or do not want to help you:

- Have patience – my life is busy and tumblr is not my job.
- Be nice – if you insult me, I will just block you.
- Come off anon if you send a question through the inbox.
- Please tell me what problem is occurring, where it is occurring, and ideally also which one of my codes you're using – the more information, the easier it is for me to help you, resulting in a faster answer.

3.2 Colors

There are 39 (thirty-nine) color options in the customization panel.¹

Nr.	Name	Color
Light Mode Color Scheme		
1	Background Light	White (#FFFFFF)
2	Link Light	Very Peri (#6667AB)
3	Link Hover Light	Dewberry (#8A5997)
4	Mobile Footer Light	Ghost White (#F1F2F8)
5	Shadow 1 Light	White (#FFFFFF)
6	Shadow 2 Light	Gainsboro (#D9D9D9)
7	Text Light	Onyx (#363839)
8	Bold Text Light	Davy's Grey (#4F5254)
9	Italic Text Light	Jet (#28292A)
10	Marked Text Light	Light Periwinkle (#C8CDE4)
11	Tag Text Light	White (#FFFFFF)
12	Text Selection Light	Lavender Web (#E3E6F2)
Dark Mode Color Scheme		
13	Background Dark	Onyx (#363839)
14	Link Dark	Blue Bell (#929BCA)
15	Link Hover Dark	Lilac (#BA99BF)
16	Mobile Footer Dark	Jet (#28292A)
17	Shadow 1 Dark	Onyx (#3E4042)
18	Shadow 2 Dark	Jet (#2E3030)
19	Text Dark	Ghost White (#E9E9F0)
20	Bold Text Dark	Lavender Web (#DBDBE6)
21	Italic Text Dark	White (#FFFFFF)
22	Marked Text Dark	Very Peri (#6667AB)

¹ I'm sorry. Hopefully, the dividers in the customization panel make things a bit easier.

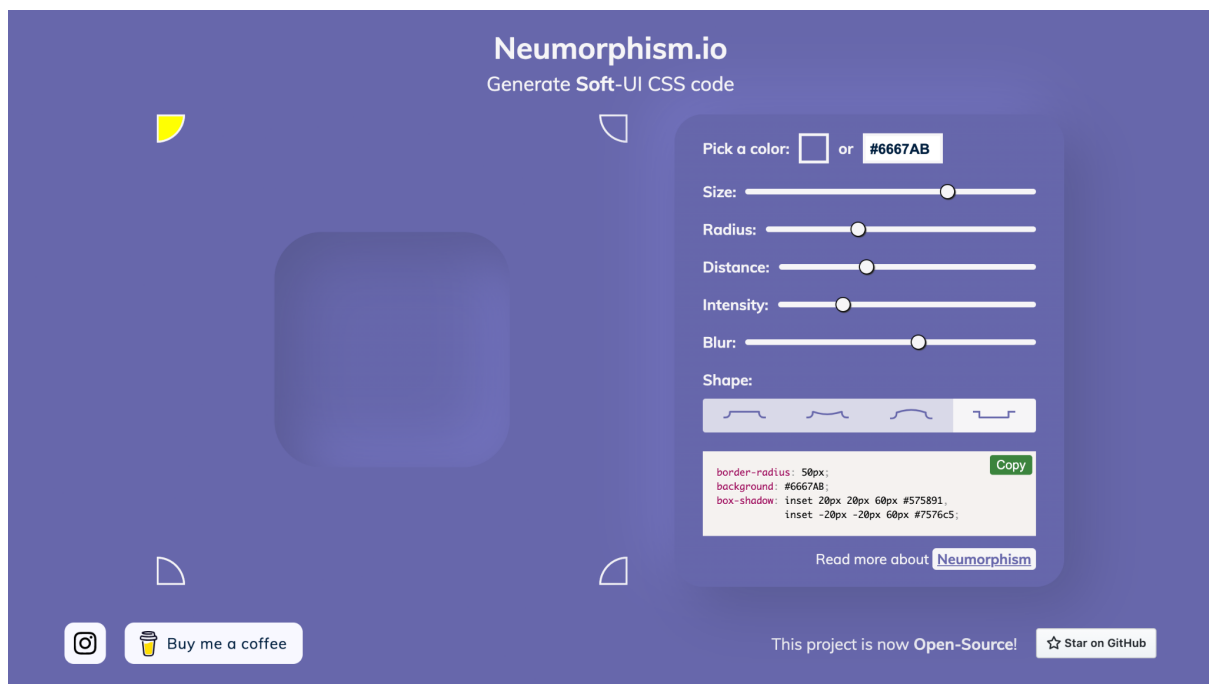

23	Tag Text Dark	Ghost White (#E9E9F0)
24	Text Selection Dark	Davy's Grey (#4F5254)
Accents		
25	Accent 1	Light Periwinkle (#C8CDE4)
26	Accent 2	Blue Bell (#929BCA)
Tags		
27	Tag	Very Peri (#6667AB)
28	Tag Shadow 1	Violet Blue (#7576C5)
29	Tag Shadow 2	Purple Navy (#575891)
30	Tag Hover	Dewberry (#8A5997)
31	Tag Hover Shadow 1	Purple (#9F66AE)
32	Tag Hover Shadow 2	Razzmic Berry (#754C80)
Colored Text		
33	Pink Text	Frostbite (#E62EA8)
34	Red Text	CG Red (#E62E2E)
35	Orange Text	Spanish Orange (#E66B2E)
36	Yellow Text	Marigold (#E6A82E)
37	Green Text	Green (#24B330)
38	Blue Text	Bluetiful (#2E6BE6)
39	Purple Text	Electric Purple (#B82EE6)

The table below explains the purposes of these colors, in case they have more than one or the name doesn't make the purpose clear.

Nr.	Name	Purpose
1	Background, Light + Dark	Background: body, scrollbar, search (normal + focus), lightbox, not found page.
2	Link, Light + Dark	Blockquote, post title, list marker, links, text divider, blog title, search (focus), audio title, odd chat line, answer username (hover), quotes, username (hover), not found page title + link mobile footer links.
3	Link Hover, Light + Dark	Links (hover), even chat lines, not found page link (hover).
4	Mobile Footer, Light + Dark	Background: preformatted text, slide-in navigation, answers, mobile footer, mobile dropdown.
5	Shadow 1, Light + Dark	Lighter neumorphic shadow: large sidebar image, audio art, link post thumbnail, photo(set) images, videos.
6	Shadow 2, Light + Dark	Darker neumorphic shadow: large sidebar image, audio art, link post thumbnail, photo(set) images, videos.
7	Text, Light + Dark	Text color: body, selection, tooltips, marked, preformatted, underlined, slide-in blog description, search (normal, hover, focus), audio info, answers, answer username, username, not found page, mobile dropdown.
8	Marked Text, Light + Dark	Background: marked text, search (hover).
9	Tag Text, Light + Dark	Text color: read more, GIF attribution, navigation links (controls, to top, credit, dark mode, home, open slide-in), link posts, questions, question username, post info (e.g. like + reblog), more notes (permalink page), mobile dropdown.
10	Text Selection, Light + Dark	Background: text selection, tooltips.
11	Accent 1	Question username (hover), like button heart icon when the post was liked by you, audio play button.
12	Accent 2	Text "deactivated" after the usernames of deactivated users (hover).
13	Tag	Background: scrollbar thumb, read more, GIF attribution, fallback for large sidebar image, navigation links, audio without album art, link posts, questions, post info, more notes, mobile dropdown links (hover), mobile toolbar.
14	Tag Shadow 1	Lighter neumorphic shadow on elements styled with Tag (s.a.),

		except for the mobile toolbar.
15	Tag Shadow 2	Darker neumorphic shadow on the same elements as Tag Shadow 1 .
16	Tag Hover	Hover background: read more, GIF attribution, navigation links, link posts, post info, more notes.
17	Tag Hover Shadow 1	Lighter neumorphic shadow on elements styled with Tag Hover .
18	Tag Hover Shadow 2	Darker neumorphic shadow on the same elements as Tag Hover Shadow 1 .

You can easily get the color for the neumorphic shadows by using the generator on <https://neumorphism.io/>. Below is a screenshot from the site.

For example, if you chose the color #6667AB for **Tag**, you would enter it in the color field at the top. You don't have to worry about selecting the light direction and shadow style; that is fixed within the theme's code.

You only have to take the HEX-colors from the box-shadow CSS. The first color (#575891) is the darker shadow and would be entered for **Tag Shadow 2**. The second color (#7576c5) is the lighter shadow and would be entered for **Tag Shadow 1**. This way, you get the best shadow colors for the color you picked.

3.3 Selectors

There are 10 (ten) selectors in the customization panel. They allow you to assign a value to an element from a given list of options.

Nr.	Name	Purpose	Options ²
1	Post Width	Width of posts and content within the slide-in.	M , L, XL, S, XS
2	Font Size	Global font size.	20px , 22px, 24px, 18px, 16px
3	Font	Global font.	Author, General Sans, IBM Plex Sans, Inter, Open Sans, PT Sans, Raleway, Roboto, Satoshi , Source Sans Pro, Ubuntu, Work Sans
4	Code Font	Font of preformatted text.	IBM Plex Mono, Inconsolata , PT Mono, Roboto Mono, Source Code Pro, Ubuntu Mono
5	Text Alignment	Global text alignment.	justify , left
6	Title Alignment	Text alignment of titles, quotes and tooltips.	center , justify, left
7	Ordered List	List icon before ordered lists.	decimal , lower alpha, lower roman, upper alpha, lower roman
8	Unordered List	List icon before unordered lists.	circle, disc , square
9	Navlink Text Transform	Text transformation of links in the slide-in and mobile footer navigation.	capitalize , lowercase, uppercase, normal
10	Tooltip Text Transform	Text transformation of tooltips and post info links.	lowercase , uppercase, normal

² Bolded options are the ones used in the live preview.

3.4 Toggles

There are 18 (eighteen) toggles in the customization panel. They allow you to [en-](#) or disable certain elements or stylings. The list below tells you about their purpose.

Nr.	Name	Purpose	Default
1	Show Captions	Show or hide captions on the index.	Inactive
2	Show Tags	Show or hide tags on the index.	Active
3	Sidebar Title	Show or hide the blog title in the sidebar.	Inactive
4	Title Above Image	Place the title above or below the image.	Active
5	Use Custom Title	Enable to use a custom title or disable and use your normal blog title. ³	Inactive
6	Neumorphic Shadows	En- or disable neumorphic shadows on elements.	Active
7	Rounded Corners	En- or disable rounded corners on elements.	Active
8	Custom Controls	Enable custom controls or disable and use the tumblr default.	Active
9	Custom Colored Text	Enable custom colored text or disable and use the tumblr default.	Active
10	Custom List Color	Enable a custom color for the list icons or disable and use the default (same as text color).	Active
11	Use Image Upload	Enable the image upload for the sidebar image or disable and use a text field to paste the URL. ⁴	Active
12	Serif Fonts	Enable fonts that aren't sans-serif (i.e. monospace fonts for preformatted text) or disable and use the sans-serif body font. ⁵	Active
13	Show Italics	En- or disable italicized text.	Active
14	Custom Link [1 - 5]	Show or hide the custom links.	Active

Generally, an active [toggle](#) is [blue](#) and an inactive one gray. Tumblr is a wonky website therefore, on the first installation, a toggle might be gray but still active.

³ It's useful to use a custom title if your blog title is longer than one line above the image. So

⁴ First option is best for images you have on your device but that aren't online. Second is best if you have the URL of the image and don't want to download the image or when the tumblr image upload gives you a blurry output image.

⁵ The sans-serif font is the one you pick from the selector **Font** (see 3.3 Selectors).

3.5 Text Fields

There are 21 (twenty-one) text fields in the customization panel, which allow you to assign a very specific value to an element.

Nr.	Name	Purpose	Toggle
1	Photoset Gap	Gap between individual images of a photoset, value in pixel.	–
2	Lightbox Opacity	Opacity of the lightbox. 1 = full color, 0 = transparent, $0 < x < 1$ = opaque	–
3	Custom Title	Short title to replace your blog title in the sidebar above the large image in case that one is too long.	Use Custom Title
4	Sidebar Image URL	URL of the big image in the sidebar.	Use Image Upload, inactive
5	Not Found Title	Title on the Error 404 page.	–
6	Not Found Text	Text on the Error 404 page.	–
7	Link [1 - 5]	Title of the custom link.	Custom Link [1 - 5], active
8	Custom URL [1 - 5]	URL of the custom link.	Custom Link [1 - 5], active
9	Icon [1 - 5]	Icon before the custom link. Icons are from https://remixicon.com/ . Click on the icon you want, then copy the class name – e.g. ri-link – and paste it into the text field.	Custom Link [1 - 5], active

4. Resources

Here is a list of the resources that were used for this theme, in alphabetical order.

Name	Owner/Host
Change audio iframe color tutorial.	shudesigns (tumblr)
Clickable dropdown.	w3schools
CSS photosets.	annasthms, eggdesign (tumblr)
Dark mode tutorial.	rstylr (tumblr)
Deactivated user tutorial.	eggdesign (tumblr)
Divider tutorial.	glenthemes (tumblr)
Edit mobile appearance tutorial.	shudesigns (tumblr)
Icon font.	Remix Icon.
Lightbox tutorial.	shythemes (tumblr)
Neumorphism shadow generator.	Adam Giebl (github)
NPF images fix v3.0.	glenthemes (tumblr)
Page Not Found, custom.	fukuo (tumblr)
Remove the tumblr app button on mobile.	yeoli-thm (tumblr)
Responsive videos.	nouvae (tumblr)
Search placeholder tutorial.	shythemes (tumblr)
Sidebar image.	Alex Koch (unsplash)
Slide-in navigation.	w3schools
Smooth scroll.	w3schools
To top button.	w3schools
Tippy.js tooltips.	atomiks (github)
Various fonts.	Google Fonts , Fontshare
