

Hello, my name is Martin Weiss

DR. MARTIN WEISS

Over five decades ago, I founded my company, Weiss Ratings ...

Since then, it has become the most reliable independent financial ratings firm in America ... helping regular investors avoid massive financial disasters ... and leading them to the best profit opportunities.

I correctly predicted the bank failures of the 1980s and 1990s ...

The Dot-Com Bust of the early 2000s ...

And the Great Financial Crisis of 2008.

In fact, the Wall Street Journal reported that my stock ratings were number one in profit performance, ahead of ...

Deutsche Bank ... Merrill Lynch ... JPMorgan Chase ... Goldman Sachs ... Standard and Poor's ... and every single other firm reviewed.

At every step of the way, I built this company using state-of-the-art technology.

In the 1990s, for example, we were one of the first to fully digitize our data.

And eight years ago, we began developing artificial intelligence to enhance our stock ratings.

So, I'm definitely not opposed to technology and progress.

But when I recently discovered what Big Tech elites — and our government — have in store for America ...

It sent chills down my spine ...

And I couldn't stay silent in good conscience any longer.

That's why I'm coming forward today to record this urgent message for you.

Consider it a warning.

We're facing the biggest threat to our existence in the history of our nation.

I'm not talking about a new president in the White House.

Nor am I talking about a new kind of war.

The menace on the rise is Artificial Intelligence.

Controlled by -Big Tech, backed by Big Government.

All growing at an exponential rate ... an exponential, UNCONTROLLABLE, rate.

And what makes it so scary to me is that it's unstoppable, almost as if were part of a master plan.

Meanwhile, many of the nation's tech elites seem to have no hesitation to replace humans like you and me.

Nvidia CEO Jensen Huang claims that pretty soon everything that moves will be robots.

“Everything that moves in the future will be robotic”

— Jensen Huang
Nvidia CEO

OpenAI CEO Sam Altman says he intends to swap everyday people with AI ...

Futurism

Sam Altman Says He Intends to Replace Normal People With AI

And Elon Musk's plans include implanting computer chips into people's brains.

Elon Musk's Neuralink implants brain chip in first human

What's next? Imagine this future scenario ...

You go to the doctor's office or the drug store.

But you're expected to talk to a robot. Not a human in sight.

Just the thought of it makes me shudder.

Or consider this ...

Our cars ...

Our homes ...

Our bank accounts ...

Nearly all are controlled by artificial intelligence.

Your every move, conversation and thought ...

Your every transaction and purchase ...

Everything is monitored by AI 24/7.

Science fiction? Not quite. Our way of life is changing, drastically. And it's happening far more quickly than anyone's ready for.

Not to mention the terrifying power AI gives to scammers, identity thieves and hackers.

NATIONAL AND WORLD

Scammers using AI to clone people's voices; experts say it's never been easier

Already, AI can take a simple text message, create a fake voice recording that impersonates someone you know and love, and you can't tell the difference.

Think about that. They're creating a world where you can't trust your own eyes and ears anymore.

I don't know about you, but that keeps me up at night ...

And it's just the beginning.

You must understand, this radical technology isn't going to change our world slowly over the next few decades.

This isn't something years away. It's happening right now.

If this sweeping trend continues to accelerate as I fear it will, you won't have time to adapt. Before you know it, you may not even recognize the world we live in anymore.

So, if you think just because you don't use AI, it won't affect you ...

I've got bad news for you:

It doesn't matter if you're young or old ...

It doesn't matter if you live in the big city or in a rural area ...

AI is here. And it threatens to disrupt nearly every aspect of your life ...

The way you work ...

The way you shop ...

What happens to your kids or grandkids in school ...

How you interact and communicate with other people ...

The way you save and invest ...

All of that could change radically — and in a very short period of time.

I wish I could tell you there's a way out. I wish we could just close our eyes, go to sleep and when we wake up, the AI nightmare would be gone.

But it won't be.

Big Tech and Big Government have virtually unlimited resources at their disposal. They're pushing this technology into every facet of our world.

And I see nothing to stop them until the process is complete until nearly every American is under the control of this powerful technology in the hands of Big Tech and Big Government.

But I am convinced that right now we're in the short window of time when it's almost too late.

But if you act quickly, you still can grab the last best chance to protect yourself, your family — and your hard-earned savings — from the dark side of AI.

Before we part today, I'm going to show you how.

I urge you to pay close attention till the very end because starting right now ...

I'm going to outline the threat ...

I'll show you exactly how I see the AI takeover playing out ...

And I'll also show you what you can do — right now — to safeguard your well-being and your financial future from what's coming ...

While at the same time building substantial wealth even in the most menacing of times.

But you need to take this threat seriously and act before AI grows even more powerful because ...

The way we live is about to change forever.

Soon Our World Will Be Unrecognizable

If you fail to prepare NOW, I'm afraid you'll be left with no options — especially when it comes to your finances.

Please understand, I don't make this prediction lightly. It's not my intent to scare you, and God knows there's enough fear in the world today.

I'm simply following the facts to their logical conclusion.

I did the same when I sounded the alarm on the Dot-Com Bust of the early 2000s way ahead of time.

People who heeded my warnings had the chance to get out of the stock market in time ... avoid the pain ... and make handsome profits along the way.

I did it again when I named, months in advance, 98% of the banks that failed during and after the Great Financial Crisis of 2008.

For example, on December 3, 2007, I issued an alert to my readers urging them to stay away from Bear Stearns ...

I said, "Bear Stearns has sunk its balance sheet even deeper into the hole, with \$20.2 billion in dead assets, or 155 percent of its equity, and is threatened with insolvency."

Thirty-three days later, Bear Stearns collapsed.

I also warned Americans about the worst failure of all, Lehman Brothers. Here's what I wrote.

"Lehman Brothers is in similar shape because of an even larger \$34.7 billion pile-up of dead assets, or 160 percent of its equity."

— *Martin Weiss*

Founder of Weiss Ratings

Lehman went under 182 days later, driving the entire financial system to the brink of a total meltdown.

But that's not all ...

I pounded the table about Washington Mutual, Bank of America, Citigroup ... and every other major bank that went bankrupt or required a federal bailout in 2008 — long before they failed ...

And all the while, the Big Wigs on Wall Street and in DC swore on a stack of bibles that everything was fine.

But they were wrong, and I was right.

Again.

Those who acted on my warnings could have kept every single penny of their retirement savings and investments ...

While everybody else risked losing nearly everything.

Today, I have a new warning, the most important warning of my career.

Only this time, it's not about the stock market ... inflation ... or recession ...

It's about this terrifying new technology — Artificial Intelligence in the hands of Big Tech and Big Government.

It's growing at warp speed. And no matter who's in the White House, it could ruin the financial future for millions who don't see it coming.

Your well-being has never been in greater danger. So, make sure you pay close attention to the four urgent steps I'm going to give you ... and follow them faithfully if you so decide.

Because the way we live in America could change forever, and alas, *it won't be for the better.*

-The mainstream media is mostly silent about it. Almost everywhere you turn, practically all you hear is how great our future is going to be once AI is fully rolled out ...

All you hear is how folks should stop griping, welcome this AI technology with open arms, and let some faceless bureaucrats worry about keeping it safe.

I think that's almost as bad as wartime propaganda under a dictatorial regime.

And even among the few that are more transparent, the fact is AI is growing too fast for our society to keep up.

In fact, if my findings are correct, a big reason why Big Tech and Big Government are pouring so much money into AI could be a lot more sinister than most people realize.

For starters, look at these numbers:

Facebook allocated over \$37 billion for AI ...

Microsoft is on track to hit \$45 billion ...

And Google spends a whopping \$12 billion — each quarter ...

Just to name a few.

According to Goldman Sachs, investments in AI in 2024 are fast approaching a staggering \$200 billion ...

"AI investment forecast to approach \$200 billion globally"

— *Goldman Sachs*

Very few are willing to speak out about what it means for the American way of life ... or our financial freedom.

The Most Disruptive Force in Human History?

Now, don't get me wrong ...

I'm not saying all technological progress is bad.

In the long run, these kinds of radical breakthroughs have typically been a net benefit for mankind.

That's how civilization evolved. But artificial intelligence is different.

"The development of full artificial intelligence could spell the end of the human race.... It would take off on its own and redesign itself at an ever-increasing rate. Humans, who are limited by slow biological evolution, couldn't compete, and would be superseded."

Those were the words of the great physicist, Stephen Hawking.

I hope and pray Hawking was wrong.

But I KNOW that he was right in this sense: With rare exceptions, people are in power because they *want* power, because they crave *more* power, and often because they're willing to use any tool, any weapon, any new invention at their disposal to deploy that power.

That's what's happening right now even as we speak. Like an army of robots out of control, AI is running amuck.

Even Elon Musk admitted that AI is a risk to humanity ...

sky news

Elon Musk tells Sky News AI is a 'risk' to humanity

Because it's growing at an exponential rate ...

And it's already far beyond anyone's control.

Unfortunately, Big Tech elites are less interested in whether regular people like you and I will actually benefit from what they're creating.

And they're more interested in keeping their coffers filled ...

And replacing annoying human beings with obedient robots.

Goldman reports AI is set to replace 300 million jobs globally ...

CNN BUSINESS

300 million jobs could be affected by latest wave of AI, says Goldman Sachs

Just in the U.S. alone, over 45 million Americans could lose their jobs to AI ...

45,000,000

Americans could lose their jobs to AI

And Elon Musk recently announced to his shareholders that he'll have a few thousand Optimus robots working at his company, Tesla ...

"Elon Musk claims Tesla will start using humanoid robots next year"

— *The Guardian*

Not 10 years from now ...

But in 2025.

What's more, his ultimate goal is to build over 20 billion of these AI robots ...

And have them perform any task ... any job ... much better than some of the smartest humans.

And he's not the only one.

Nvidia CEO, Jensen Huang says he's all in on humanoid robots ...

In fact, he says it will be everywhere.

Not just tech ...

Not just Big Pharma ...

But every single industry ...

Including one that my father's favorite president, Dwight D. Eisenhower, sternly warned about 65 years ago ...

The military-industrial complex.

Like I said, if current trends continue, you may rarely see a living person working at your doctor's office ... at your bank ... in a supermarket ... or at a restaurant.

AI could swallow up practically EVERYTHING.

It will radically change the very fabric of our society ...

And it could happen a heck of a lot sooner than most people think.

At Amazon, one-third of current workforce is *already* AI.

Amazon Grows To Over 750,000 Robots As World's Second-Largest Private Employer Replaces Over 100,000 Humans

I was shocked when I saw the facts: The company is adding 1,000 robots to its workforce — *per day* ...

Let that sink in.

One of the world's largest private employers has already replaced over 100,000 humans with robots ...

And according to ARK investment fund CEO Cathie Wood, Amazon will have more robots than human employees by 2030.

INVESTING

Robots could surpass workers at Amazon by 2030, Cathie Wood says

That's only about five years from now.

AI's Power to Destroy the American Way of Life

Make no mistake: Companies like Amazon aren't just replacing employees with robots ...

They're also using generative AI to manage their operations, their finances, and their customer service.

COMPANIES ARE USING GENERATIVE AI TO:

- Manage Operations
- Manage Finances
- Provide Customer Service

Meanwhile, in the banking sector, Citigroup reports that over 54% of jobs are well on their way to being automated and replaced by AI ...

And Goldman Sachs is again leading the way, deploying its first AI tools across the firm ...

What jobs do you think all these companies are going to replace?

My research tells me that likely targets in the U.S. and worldwide are finance analysts ... lawyers ... even software engineers themselves.

In fact, Big Tech layoffs just hit a staggering number of 428,449 workers.

Can you imagine — almost half a million people.

And it's just getting started ...

AI could annihilate a huge, massive cohort of white-collar jobs very quickly.

Just think about what that would do to our society ...

When millions of people could lose their well-paying, middle class and even high-class jobs ...

While still struggling to pay off their credit card debt and their mortgages.

Granted, every new technology comes with a blessing and a curse.

But there's one thing unique about AI that nobody's talking about ...

An even darker side to this story, an imminent threat to our financial future.

If the current trend continues, most people could get caught by surprise. Millions of Americans won't know what to

do when things start unraveling.

Will you act now to protect yourself and your family? I sure hope so.

That's why I've come forward to give you this special message NOW and not weeks or months from now.

To reveal the four steps I'm taking ... and I think others should seriously consider taking too.

To prepare for the inevitable, and even turn the tables on Big Tech.

I'll explain everything in a moment. But bear one very important thing in mind:

While on the one hand Big Tech elites may want to replace your job with a robot ...

History proves that on the other hand, big government has an almost irresistible tendency to CONTROL you. And thanks to AI — soon there will be few limits to their power.

It could mean the end of the America as we know it ... and the beginning of the ...

New Age of Technological Tyranny

Where every citizen must obey and do what they're told ...

Or else face prosecution ... persecution ... de-banking ... and financial ruin.

Sure, some people may discard this as conspiracy theory. They blindly assume it can't possibly happen in America.

I don't blame them. It's so shocking, it's hard for folks to get their heads around it.

But remember — a few years back, if you didn't agree to take an experimental vaccine ...

You weren't allowed to take public transport ... enter a grocery store ... or visit your loved ones at the hospital.

People thought something like that could never happen in America.

But it did.

The U.S. government used a medical emergency to enforce Draconian rules on American citizens ...

Taking away our freedoms ...

And no one could do a thing about it.

Many people who had opposing views to the mainstream narrative were not only shamed and ridiculed ...

Their opinions were censored across the media.

In extreme cases, they were investigated, prosecuted, even jailed.

Or had their bank accounts frozen.

Whether you were for or against vaccines is not the point. The point is that conflicting opinions are healthy and should not be squelched.

In the past two years alone ...

JP Morgan Chase, Bank of America, Capital One, and Fidelity — just to name a few — have frozen hundreds of accounts of groups and individuals they labeled as “promoting hate.”

Is hate speech often detestable? Sure, it is.

Is hate speech something people should have the right to avoid? Yes.

But who decides what's defined as “hate” and what's defined as a warning?

I wonder: Is this warning I'm giving you now also going to be targeted for ridicule and censorship?

When I was a young man, I thought that could never happen to me. But when I challenged big banks and insurance companies, it did happen to me. And now, even if you never utter a word of protest, it could happen to

you, too.

In fact, in the world of banking and finance, the power to control your bank account and your transactions is already enshrined in law ...

Thanks to a new system that's centralizing nearly all financial transactions under none other than ...

The U.S. Federal Reserve.

All those financial transactions used to be under the control of a private consortium of banks.

But now the Federal Reserve is taking it over with an integrated network that will give it direct access not only to all your banking accounts and transactions ... but also to everything you do under payment systems, including the likes of PayPal, Venmo, Zelle, Apple Pay, Google Pay and Wise.

The Federal Reserve calls it FedNow. I call it Fed Control.

Because that's what it really does. Once it's fully rolled out, it will give the Fed the unspeakably powerful tools of control.

And here's the thing: It gives the Fed full control over the DATA! A single, massive, never-before-seen, centralized database on every single electronic transaction in the nation.

From the \$5.29 someone pays for a Big Mac when they swipe their Apple Pay ...

To the \$350 on their credit card for a cart full of groceries at Whole Foods ...

To the \$412,000 median cost of a home in America.

Everything recorded. Everything in one database. Everything under the Fed's auspices.

So, ask yourself: What happens if the Fed marries that Big Data with Big AI?

What happens if they run millions of AI-assisted searches for patterns in everyone's personal financial behavior, including yours and mine?

Just innocent, well-intentioned research? Sometimes? Sure. In their minds? Maybe.

But if that's what YOU think it is, ask yourself this question: What happens in a national emergency, either a real emergency or a trumped-up emergency as an excuse to grab more control?

Then what? Will they spy on millions of Americans? Will they turn against the population in mass?

"No," they say. We've never done that and never will."

Oh really? Well, what about the National Security Agency (the NSA)? What about what they did in 2013?

In 2013, the National Security Agency illegally collected the phone records of millions of American citizens.

Not just once, but for over five years.

They spied on millions of people who were never suspected of any wrongdoing whatsoever.

That's not all. The NSA and the FBI colluded with America's biggest tech companies to spy on nearly everything you could do online.

But there's more ...

Every year, police and prosecutors across the United States seize from ordinary citizens hundreds of millions of dollars in cash, cars, homes, and other property, regardless of the owner's guilt or innocence.

The government can grab all this property on the mere *suspicion* that it might be connected in some way, directly or indirectly, to criminal activity.

They don't need a warrant. They don't need to file any charges — let alone get convictions.

And once the property is seized, it can be extremely difficult for the owners to get it back, even after the police *admit* the property owners have never committed a crime.

This is big. In 2023, the U.S. Marshals Service seized 12,117 assets and had \$6 billion in assets on hand. And they were not alone. The U.S. Treasury Department and Department of Justice also were major participants in this widely used, widely ABUSED, seizure system.

So, let me ask you: Today, with advanced AI at their fingertips, will they suddenly back off from the rampant abuses that this system has created?

Of course not! AI will simply empower them to abuse the rights of citizens with even greater speed and efficiency.

But among all the abuses we've seen so far, my fear is that the Federal Reserve will have the power to implement the greatest government overreach of all.

Their new program, FedNow, gives them the power to virtually flip a switch and control every transaction in your bank accounts.

I'm talking about the power to freeze individual bank accounts on the whim of an algorithm ...

And block access to your own money ...

Based solely on AI.

Nearly all your money in ...

Your 401(k) ...

Your brokerage account and insurance policies ...

Is vulnerable to the government's direct control, supported by their massive databases, and powered by AI.

Unless you act and prepare now as I'll explain in a moment, your chances to escape could diminish rapidly.

Look. I don't make this prediction lightly. I've studied the Fed, the government, the U.S. banking system, and their advances in technology for over six decades.

In fact, my financial education began back in 1959, when my father founded the Sound Dollar Committee to help President Dwight D. Eisenhower balance the federal budget, the last truly balanced budget without smoke in mirrors ever since.

And it's this kind of experience that allows me to stay one step ahead of everyone else, because I can often connect the dots most people don't see.

Let me be perfectly frank with you. Unlike talking heads in the media, I make no pretense of having a crystal ball.

I can't tell you what specific DAY America will descend into the Orwellian world of AI tyranny or how far it will go. But ...

The Writing is on the Wall

The moment when you won't be able to hide from the government's prying eyes and ears could be a lot closer than you may think.

In fact, as you saw with the NSA's illegal spying on millions of citizens ...

As you've seen with the frequently abusive seizure of billions of dollars in personal assets ...

And most recently, as you've seen with major threats to America's democracy and justice system ...

I don't have to predict when this nightmare will begin. It already *has* begun.

Let me tell you something else. In September of 2023, U.S. officials and a handful of the most powerful tech elites in the world ...

Held public and private meetings about Artificial Intelligence, informally referred to as AI safety and regulation talks ...

The New York Times

Tech Leaders Gather for an A.I. Week in Washington

Elon Musk, Mark Zuckerberg and Sam Altman are among the moguls meeting with lawmakers to discuss how to regulate the fast-growing technology.

CNN BUSINESS

Bill Gates, Elon Musk and Mark Zuckerberg meeting in Washington to discuss future AI regulations

But I think that reference is window dressing that hides the true underlying agenda from the public and maybe even from most of the participants in the talks themselves.

I'm afraid that, in exchange for an exclusive backdoor into these powerful AI programs ...

The government has given, or will soon give, Big Tech wide leeway to roll out their AI with little regard for the real consequences to the American people, with little regard for its potential to undermine and corrode our way of life ... take away our freedom ... and ruin our financial future.

All so they can use it to spy and control us, like the NSA did under the PRISM program just a few years ago ... like the police and Justice Department do when they target citizens for asset seizures ... like the health authorities did during Covid.

Look at what just happened: OpenAI appointed the former NSA head, Paul Nakasone, to its board of directors ...

OPENAI / ARTIFICIAL INTELLIGENCE / TECH

Former head of NSA joins OpenAI board

On top of that, they quietly acquired an obscure startup called Multi ... which specializes in building tools that let them remotely control other people's devices, like computers, tablets and mobile phones ...

VentureBeat

OpenAI acquires team behind Multi, formerly Remotion, startup focused on screensharing and collaboration

I find this deeply troubling. And I'm not the only one.

Whistleblower Edward Snowden recently put it this way, "Do not ever trust OpenAI or its products [like ChatGPT]. There is only one reason for appointing an NSA Director to your board. This is a willful, calculated betrayal of the rights of every person on Earth. You have been warned."

Edward Snowden

@Snowden

They've gone full mask-off: do not ever trust @OpenAI or its products (ChatGPT etc). There is only one reason for appointing an @NSAGov Director to your board. This is a willful, calculated betrayal of the rights of every person on Earth. You have been warned.

Why would our government want to do that?

Because when they feel threatened in any way, or even when they're just anticipating a future threat, there are TWO things governments want and need the most:

CONTROL.

And MONEY, your money.

Fed Control and AI: A Terrifying Combination

Very few people understand the kind of power that FedNow could give to our federal government. Fewer still have thought about the turbocharged power they'll have with AI. So, let me explain right here and now.

ECONOMY

Federal Reserve officially launches new FedNow instant-payments service

FedNow was quietly launched in July 2023. And since then, over 900 banks and credit unions have already joined the program, including:

JPMorgan Chase Bank

Wells Fargo Bank

U.S. Bank

The Bank of New York Mellon

State Street Bank and Trust Company

Just to name a few of the 900 institutions that have already joined FedNow ...

And keep in mind, these financial institutions are merely part of the first phase of the rollout.

Your bank is either already participating ... or may be very soon.

"Isn't FedNow just an upgrade to how banks move money?" I'm asked.

Yeah, Fed officials are certainly marketing it that way. And yes, if our government had no history of mass public abuse, I might trust them to keep it that way.

But the historical record proves, beyond a shadow of a doubt, that their track record is terrible. When they have the tools, sooner or later they use them.

What these officials won't tell you is this. FedNow — which could soon be enhanced with AI — is not just about making your transactions faster and more secure ...

It's also a powerful tool for any government agency that thinks they can justify more surveillance ...

And it's about centralized control over your money.

At its core, FedNow is a "centralized ledger." It's a system that can monitor every single transaction 24/7 — the moment it happens ...

All from one central database, one central location.

Think about that.

What our government has been trying to do for centuries through regulations, laws and taxes ... to control the way we spend our money or live our lives ...

Could be done much more "efficiently" with FedNow. And the way this system is designed ...

You cannot "opt out."

You won't simply be able to switch banks.

You don't get to vote against this.

And one of the reasons I'm talking to you today is that, unfortunately, very few people outside the Federal Reserve understand what's really possible.

So, let me show you how it works ... and then walk you through the steps to take right now — to protect yourself and your family's savings — before it's too late.

Central Bank Digital Control

I'm sure you've purchased many items and paid for many services by writing a check or swiping your card.

You've also made deposits in your checking account or had paychecks set up for direct deposit automatically.

How, exactly, does the money move from your bank account to someone else's?

It's something we hardly think about ... and yet over \$2 trillion worth of these transactions happen every day.

That includes the money transactions you make ... that your family makes ... that your friends make ... and every company you pay or that pays you.

It also includes Social Security payments from the government.

Again, that's over \$2 trillion changing hands every single day.

Most of these transactions are handled by a private sector company called The Clearing House, which is owned by major banks.

And while the system is far from perfect, The Clearing House has been handling interbank transactions for 171 years.

However, the Federal Reserve saw the chance to make it "better." And in 2019, with little fanfare or press coverage, they released a document labeled Docket No. OP-1670.

Not many have heard about it, let alone read it, but they should have ...

Because that document describes in great detail how a “centralized ledger” ... something like FedNow ... could improve and replace what The Clearing House has been doing since 1853.

It's all there, in black and white ...

It even reveals how to centralize all transactions handled by private payment systems, such as PayPal, Zelle, Venmo, Apple Pay, Google Pay and many more.

Like I said, over 900 financial institutions have enrolled in FedNow since its launch last year ...

With more banks joining as we speak.

The Federal Reserve is quickly becoming the “central war room” in charge of all payment systems — with the power to monitor and control how you spend and receive money.

They have their hands on the entire process.

For example, you're probably aware that banks already require you to fill out special IRS forms if you attempt to withdraw \$10,000 or more in cash.

Well, with FedNow, merely transferring money from one place to another — in practically any amount — could raise a red flag.

And not only that, with FedNow, the government could know what you are buying, in what amount, and from whom.

Did you fill your gas tank one time too many this month?

Did you buy meat or dairy from a local farmer who's not “certified”? All of that — and more — could raise flags and lock you out of your money.

And thanks to AI, the government can now have all this information about you available in an instant, practically the moment it happens.

This, I fear, is the government's biggest, most efficient gateway to technological tyranny, including ...

Social credit scores ...

Digital IDs ...

Vaccine passports ...

Your political donations ...

And more.

It all could be centralized with FedNow and enhanced with AI.

Soon, nearly every financial institution in America could become a part of it. And so will your bank account ... your brokerage account ... your credit cards ... your IRA and 401K ... your mortgage ...

Once your money is in the system, the government will have instant access to it.

And if something like your “social credit score” ... or “your government loyalty score” falls below some arbitrary threshold, you may not even notice your bank account is frozen until it’s too late.

Four Steps to Protect Your Money from Government’s Control

Don’t risk your financial future by waiting on the sidelines. There is a way to avoid all of this — and even build your wealth in the process. But you have to act now, while you still can.

And that’s why I’m here today ...

I’ve found a way you can protect your financial future in four simple steps, which I’m going to show you right now.

In fact, my team and I have been helping regular Americans protect their retirement nest egg ... and grow their wealth ... for over five decades ...

And now, I’m going to share this wealth of experience with you.

***Step 1:* Move Your Money Off the Grid (but Not Offshore)**

The best way to protect yourself from the government’s prying eyes is to split your money up and get some of it out of the system, away from U.S. banks.

One way to do that is to buy gold. However, you must do it the right way, which I’m going to explain in step two.

My first step is about what we call gold 2.0, quickly becoming one of the most important investment asset classes in human history.

I’m talking about Bitcoin.

This is my step number one: Get a portion of your money out of the system and buy some Bitcoin.

Bitcoin is the diametric opposite of FedNow. It’s decentralized. There’s no company that owns it and there’s no CEO ...

Which means, the government can’t send the Feds to raid anybody’s headquarters and shut it down.

There are no headquarters!

In fact, blockchain, the technology behind Bitcoin, runs on tens of thousands of computer nodes all around the world. And each of these nodes have their internet addresses protected by multiple layers of encryption.

To even attempt to stop Bitcoin would be an impossible task. The government would first have to shut down the entire internet globally — and keep it that way practically forever ...

Even then, Bitcoin doesn’t need the internet to exist. It can be easily transferred over radio signals, satellites, local area networks and much more.

What if the government decides to ban it ... like they banned gold back in 1933?

Hah! That's a joke.

Trying to ban Bitcoin is like trying to ban a mathematical equation ...

Because that's what Bitcoin technology essentially is — lines of code executing highly complex calculations. And the result of each of those calculations is a Bitcoin.

Sure, if they could get their hands on your gold, they could confiscate it. But not Bitcoin. There are no vaults, no safes, no hidden piles of Bitcoin.

The only way to get to your coins is by using a 24-word passphrase, which serves as an encryption key. As long as you can memorize or safeguard that phrase, you can store almost unlimited millions of dollars in Bitcoin ... and none would be the wiser.

And second, it's already too late for them to ban Bitcoin. The genie is out of the bottle. According to Newsweek, over 46 million Americans already own Bitcoin. And NBC reports that 1 in 5 Americans have invested, traded or used cryptocurrencies. That's 25% of all adults in the U.S. ...

WATCH LIVE

KEY POINTS

- One in five Americans has invested in, traded or otherwise used cryptocurrency.

Many of them are rich, well-connected elites and even leading politicians themselves. If the government even hints at a so-called ban, the backlash would be so big that no one supporting the ban would ever win an election again.

That's why the smartest billionaire investors like Elon Musk, Mark Cuban, Jack Dorsey and Michael Novogratz, and Donald J. Trump have bought or supported Bitcoin.

Even Warren Buffett, a long-time Bitcoin critic, has now profited massively from crypto investments.

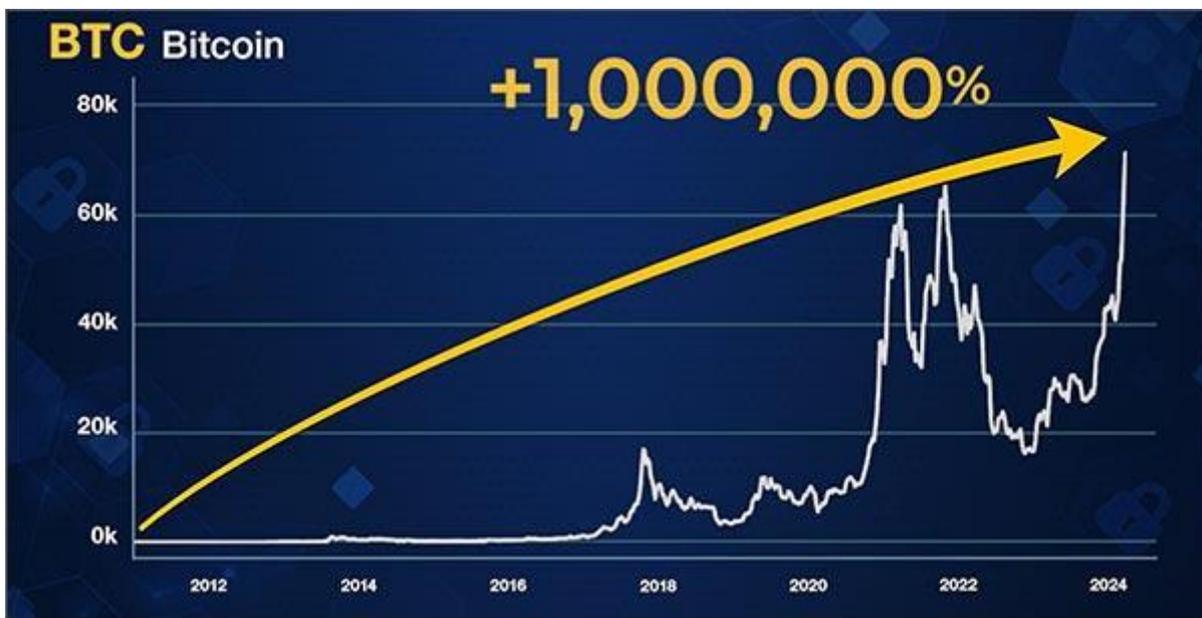

yahoo!finance

Is Warren Buffett Warming Up To Bitcoin? Berkshire Hathaway Profits Big From Crypto Investment

And so should you ...

Not only is Bitcoin a great way to move your money away from the government's prying eyes, but it's also been one of the best ways to grow wealth exponentially.

Since its launch in 2009, Bitcoin is up over 1 million percent ...

Meanwhile, the U.S. dollar lost 20% of its value in the four years since 2020

But get this: Bitcoin went up 1,256% during the same period.

Think about it ...

If you had put \$1,000 in the bank at the beginning of 2020, you would have lost 20% of your purchasing power.

On the other hand, ...

Investors who bought \$1,000 worth of Bitcoin could be sitting on over \$13,000 right now.

Even Larry Fink, the CEO of the biggest asset management firm in the world, BlackRock ... has had a change of heart about Bitcoin ...

BITCOIN

BlackRock CEO Larry Fink calls bitcoin an ‘index of money laundering’

Back in 2017, he famously claimed that “Bitcoin is an index of money laundering” ...

But recently he reversed his opinion, announcing that, “Bitcoin could revolutionize finance ...”

Finance

BlackRock CEO Larry Fink Says Bitcoin Could ‘Revolutionize Finance’

And then he launched one of the world’s first and biggest Bitcoin ETFs.

As you may know, the Securities and Exchange Commission (SEC) approved 11 spot Bitcoin ETFs on Jan. 10, 2024 ...

The very next day, on Jan 11, they started trading ...

And since then, they’ve accumulated over \$63 billion in Bitcoin, helping to drive up the price of Bitcoin by nearly \$27,000.

But that’s just the beginning ...

The arrival of ETFs means that millions of average investors will now have easy access to Bitcoin, which is bound to push its price even higher.

Analysts at the research firm Bernstein expect Bitcoin to reach \$150,000 by next year.

Bernstein doubles down on \$150,000 target for Bitcoin price

And, Cathie Wood, the famed money manager and CEO of ARK Investments, recently said Bitcoin could hit \$1.5 million per Bitcoin by 2030.

Bitcoin Price Could Reach \$1.5 Million By 2030, Predicts ARK Invest CEO Cathie Wood

That would be a 2,182% increase in just five short years.

So, if you don't own Bitcoin yet, now is the right time to get in — while you still can.

I'm not suggesting you sell the farm. But as you can see, if you don't allocate some portion of your portfolio to Bitcoin, you could not only lose money, but you remain vulnerable to government control.

We will give you simple instructions on the best way to buy Bitcoin, and then the best way to safely move it off the Web — so that you're off the grid and fully protected.

But here's the thing ...

Historically, every time Bitcoin goes up, the prices of newer cryptos have moved up even more.

Like we saw recently, when select coins with our highest ratings brought back returns of:

2,001% ...

5,400% ...

Even 10,200% or more.

We predict similar kinds of crypto gains could be dead ahead, and what's more ...

We've identified a handful of lesser-known coins we think everyone should consider owning right now, together with Bitcoin.

These are all projects working on improving our current financial system, helping to make it decentralized and harder for the government to seize total control.

Right now, you can still get in for a small fraction of Bitcoin's price, but I don't expect that to be the case for very long.

I'll share all of the details about these unique coins with you in my special report, "***AI Menace: How to Protect Your Money from Government's Control.***"

I will also show you, step by step, how to buy them and then store them away from the government's reach.

I'll share the details of how to get this report in just a minute.

But while buying digital assets like Bitcoin and similar cryptos is a great Step 1, it's not enough. You also need to take ...

Step 2:
Buying Gold the Right Way

As I mentioned a moment ago, it's always a good idea to have some portion of your cash in physical gold.

This is an asset my family and I have been pounding the table about since the 1930s.

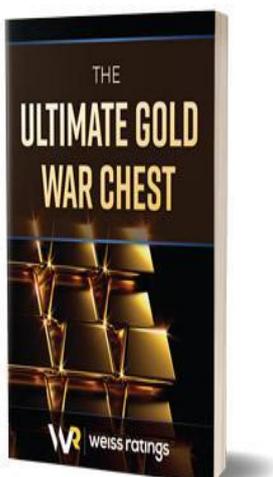

We've seen throughout history, when paper money's value has fizzled, gold has maintained its value with a 5,000-year track record.

But unfortunately, most people buy gold the wrong way. If you want to keep your gold safe, without the risk of it being confiscated or frozen ...

You must learn the secret to buying and storing gold the right way.

The same way the ultra-wealthy do it.

That's why, I want to send you another bonus report called "***The Ultimate Gold War Chest.***"

In this report, we reveal:

- How to get the best deals in gold ...
- How to buy gold the right way and avoid the scams many Americans fall for ...
- How to store gold correctly so your wealth is protected in any kind of Doomsday scenario ...
- How to avoid losing your gold by spotting all the sneaky tricks used by thieves ...
- How to prevent your gold from ever being confiscated again by implementing this little-known “Gold Confiscation Loophole” ...

And so much more!

On top of that, I will reveal how, in an environment similar to today’s, investors have used gold to grow their wealth by 5x or more ...

Simply by buying gold at the right time.

Many years ago, when gold was still selling around \$100 an ounce, we predicted it would soar past \$1,000, and nearly everyone thought we were crazy. Now, gold is closing in on \$3,000 per ounce and anyone who bought gold on our recommendation is sitting on about 28x gains.

But based on the dollar’s devaluation over the years and the limited supply of bullion today, gold is still grossly undervalued.

It’s all in your bonus report, and I’ll share the details of how to get it in just a moment.

Which leads me to ...

Step 3:
Move Your Investments off Wall Street

Now, I must warn you. This step may not be for everyone.

So, no matter what you do, make sure you have at least the first two steps covered as soon as possible ...

Before the government has the capacity to usher in AI surveillance and total control.

However, if you decide to keep some — or most — of your money in the stock market, on Wall Street ...

Your financial future could be in greater danger than most Americans realize.

This is why I believe the types of investments we’re recommending in Step Three are so important.

They keep you away from traditional brokers ... exchanges ... banks ... and other institutions that may soon be swallowed up by AI-powered FedNow.

Plus, they will keep you protected from inflation, bank failures, recession or worse.

This is the secret ultra-wealthy elites don’t want you to know ...

But it’s one of the reasons why many of today’s hedge fund titans, venture capitalists, banking elites and royal families ...

Are not only able to preserve their massive wealth — but they’re able to grow it even further *in nearly all market conditions!*

For example, over the years, one of these alternative investments has surged 2,341% ...

Another one appreciated 22,627% ...

And a third one of these off-the-grid investments is off the charts. It has skyrocketed a staggering 447,268% ...

How is this possible?

It’s because these “secret” investments have one unique quality.

When the economy is in shambles, be it recession or inflation, stock market crash or bond market collapse ...

These investments rarely go down.

For example, in 2022, one of the worst years in the market's recent history.

The S&P 500 fell almost 20%.

The Dow Jones dropped by over 25%.

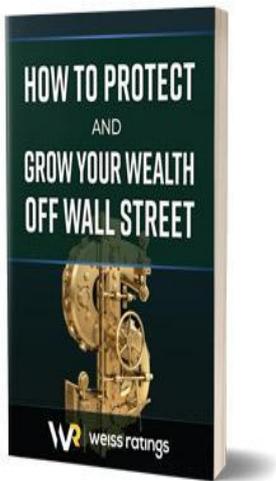

Even the U.S. bond market was down 13%.

In contrast, the off-Wall Street investments I'm talking about here went up by 29% — on average — during the same period.

As you can see, this is a great way to get your money away from banks and away from Fed control.

Moreover, it's a great opportunity to watch your money grow and compound, especially if you can wait for the passage of time to work its magic.

I reveal everything you need to know about these little-known investments ... and how to get started ... in my third bonus report called "***How to Protect and Grow Your Wealth off Wall Street.***"

When you're armed with all this valuable information, together with your other two bonus reports, "***AI Menace: How to Protect Your Money from Government's Control***" and "***The Ultimate Gold War Chest***" ...

[Download All 3 Reports Now!](#)

You can be well on your way to protect your — and your family's — financial future, starting today.

Which brings me to, perhaps, one of the most important steps of all ...

Step 4:
**Turn the Tables on the AI Elites
by Fighting Fire with Fire**

Like I mentioned at the very beginning — AI is a tool.

In the wrong hands, it's a deadly weapon.

But in the RIGHT hands — it can turn into a HUGE advantage.

Especially when you can deploy it for yourself to do what YOU want to do ...

And best of all, to help build the wealth and financial independence YOU will need to fight the battles ahead, to retain your freedom.

I also told you that I myself have used AI to guide my own investments.

Well, here's the big potential payoff for you ...

In a new special report that I've just finished writing, I will share with you the names of three stocks that my team has chosen for my personal portfolio using our Weiss Stock Ratings and our proprietary AI. I name them in your fourth special report, *Turn the Tables on the AI Elites with These 3 Stock Superstars*.

[Click to Access All 4 Reports Instantly](#)

Since we first began upgrading these stocks, they're up 460%, 799% and 837% respectively.

No matter how much I fear what AI can do to our country, I cannot ignore how high our AI-assisted stock picks could surge in the meantime.

I name them. I tell their full story. I give you their tickers and provide specific buying instructions in your special bonus report.

How to Get Started Right Now

Now, I want to be clear ...

The amount of research that goes into these kinds of reports is extensive.

That's why I normally restrict access to this information to my paid subscribers only.

But these are unprecedented times.

The way we live our lives in America is about to change drastically ...

And I want to do everything in my power to help you protect your family from what's coming.

It's critical that you start taking these four steps now — while you still can ...

Before AI completely takes over.

And before it's too late.

That's why I want to make the decision a no-brainer for you and rush these four reports to you right away.

The only favor I ask in return is that you give our members-only service, *Safe Money Report*, a risk-free trial.

[Secure Your Risk-Free Membership Now!](#)

The vital information you've learned today is the kind of intelligence my team and I have been gathering for years ...

And it's available to our Safe Money Members every month ...

We warn you about threats to your savings and retirement that are right around the corner ...

So you're always one step ahead of the crowd.

You'll also get regular updates on our Safe Money model portfolio, so you'll know exactly when to get in on an investment, and how much to allocate.

And when it's time to take out any profits, we'll send you an alert.

Rest assured, no matter what happens, my team at Safe Money will help you navigate every step of the way.

Like when we helped our members avoid hundreds of bank failures.

Or when we warned our subscribers about the tech meltdown.

And those who listened to our advice could have avoided the bloodbath and a drop in their portfolios of as much as 75%.

Or when we warned before the collapse of Bear Stearns ... Lehman Brothers ... Washington Mutual ... Citigroup ... and Wachovia.

People who listened to our advice could've kept every single penny of their retirement savings and investments ... while others risked losing practically everything.

Investors who acted on our very first “Buy” rating for Nvidia could have made 34,098%.

And those who acted on our very first “Buy” rating for Apple could have made 41,144%, not to mention 495 other stocks that have risen 10x or more.

When you join Safe Money today

You have the chance to get the same kind of foresight and expertise working to protect and grow your retirement ...

For over 40 years, Safe Money Report has published lists of the most vulnerable banks and stocks BEFORE a crisis sent them plummeting.

Not only that, but we’ve also published lists of companies that are the most likely to survive and THRIVE despite any chaos.

We have built a massive database on more than 53,000 companies and investments — with the world’s only rating system that’s 100% independent.

Our team of analysts, data scientists and software developers use this system to cut through all the noise and detect early warning signals.

This is how we were able to accurately predict the bank failures of the 1980s ... the Dot-Com collapses of the early 2000s ... and the Great Financial Crisis of 2008.

This is how we were among the first to issue “buy” ratings on Apple, Nvidia and the 495 other stocks that have since surged 10x or more.

As a member of Safe Money, you get access to all of that — and more.

Here’s Everything You Get ...

When you join Safe Money today, you get ...

Our complete solution designed to protect your money and grow your wealth outside the government’s control. That includes immediate access to your four bonus reports:

- Special report #1: ***AI Menace: How to Protect Your Money from Government Control*** (sold separately for \$79)
- Special report #2: ***The Ultimate Gold War Chest*** (sold separately for \$79)
- Special report #3: ***How to Protect and Grow Your Wealth off Wall Street*** (sold separately for \$79). And ...
- Special report #4. ***Turn the Tables on the AI Elites with These 3 Stock Superstars*** (also sold separately for \$79).

You get a full year of our monthly Safe Money **Report** (normally sold for \$129) with our model portfolio based on our prize-winning ratings

Plus, you also get ...

- **24/7 premium access to all 53,000 of our Weiss ratings.** That includes nearly every bank, credit union, insurance company, stock, ETF and mutual fund in America (previously sold for \$228 per year).
- Our **Weiss Ratings Daily.** This is our members-only news alerts delivered to your inbox every morning (priceless).

All told, that’s a value of \$673.

But you won’t have to pay nearly that much.

We’re living in unprecedented times. There’s no time to waste, and waiting on the sidelines could cost you dearly.

That’s why I’m doing everything in my power to make this decision as easy as possible for you.

Today, your cost for this entire package is **just \$49**, less than 14 cents a day.

You save 93% and get an extra \$624 in value beyond your meager cost.

[Yes, I want to join now and save 93%](#)

All with a full year to decide if the Safe Money Report is right for you. And all with my ...

100% Money-Back Guarantee

That's right. Your subscription cost is risk-free.

Download your four bonus reports now. Get our Safe Money reports and investment recommendations for the next 12 months. Stay up to date with our daily alerts for the next 365 days.

Then make your decision ...

If you're not happy with everything that Safe Money can do for you, just let us know and we'll give you a 100% refund, no questions asked.

Even if you cancel on the very last day of your subscription, you can keep everything we've sent you all year long, my way of saying "thank you" for giving Safe Money a try.

I want you to feel comfortable with our research and recommendations.

Because I'm 100% convinced that once you have the chance to dig into your four bonus reports and see the potential value of our service ...

You'll want to stick around with us for the long haul.

That's why I'm confident in giving you such a generous refund policy.

If this sounds like a good deal to you, then please click the button below to get started ...

And don't worry, when you click the button, you'll get the chance to review all the details of this offer before you sign up.

[Yes! I want to get started now!](#)

The time to act is now ...

The longer you wait ...

The higher the risk for your financial future.

Right now, you have a decision to make — for yourself and for your family.

When AI's reign of terror and total government control of your bank account potentially descend upon us ...

When nearly everybody gets caught up in turmoil ...

You'll want to feel reassured that today you've made the right choice ...

[Click here](#) to get started with Safe Money Report now.

Give yourself the opportunity to escape government control ... and a chance to grow your wealth along the way.

This is Martin Weiss, founder of Weiss Ratings, wishing you good luck and God bless!

Martin D. Weiss, PhD
Weiss Ratings Founder

こんにちは、私はマーティン・ワイズです。

DR. マーティン・ワイズ

50年以上前、私はワイズ・レーティングスという会社を設立しました.....

それ以来、当社はアメリカで最も信頼される独立系金融格付け会社となり.....

一般投資家が大規模な金融危機を回避し、最高の利益機会を得る手助けをしてきました。

私は1980年代と1990年代の銀行破綻を正確に予測しました.....

2000年代初頭のドットコムバブルの崩壊も.....

そして、2008年の世界金融危機もです。

実際、ウォール・ストリート・ジャーナルは、私の株式格付けが収益パフォーマンスでトップだったと報じました。

ドイツ銀行、メリルリンチ、JPモルガン・チェース、ゴールドマン・サックス、スタンダード&プアーズ.....

そして、他のすべての金融機関よりも優れていたのです。

私は常に最先端のテクノロジーを駆使して、この会社を築き上げてきました。

たとえば1990年代には、当社は業界でいち早くデータの完全デジタル化を実現しました。

さらに8年前には、株式格付けを強化するための人工知能(AI)の開発を開始しました。

ですから、私は決してテクノロジーや進歩に反対しているわけではありません。

しかし最近、ビッグテックのエリートたちと政府がアメリカに対してどのような計画を立てているのかを知ったとき.....

私は背筋が凍る思いをしました.....

そして、もはや沈黙していることはできないと確信したのです。

だからこそ、私は今日、この緊急のメッセージをあなたに届けることを決意しました。

これは警告です。

我々は、国家の歴史上、最大の脅威に直面しています。

私はホワイトハウスの新しい大統領について話しているわけではありません。

新たな戦争のことでもありません。

いま急速に台頭している脅威とは、**人工知能(AI)**です。

それはビッグテックによって管理され、ビッグガバメント(巨大政府)によって支援されています。

その成長速度は指数関数的です.....それも、制御不能なほどに。

私が特に恐ろしいと感じるのは、それがもはや止められないという事実です。まるで、何者かによって計画されたシナリオのように.....

一方で、テック業界のエリートたちは、人間を機械に置き換えることに何のためらいもないようです。

たとえば、NvidiaのCEO、ジェンソン・フアンはこう語っています。

「未来では、動くものすべてがロボットになるだろう」

— ジェンソン・フアン(Nvidia CEO)

OpenAIのCEO、サム・アルトマンは、日常的な仕事をAIに置き換えることを目指していると公言しています。

さらに、イーロン・マスクは人間の脳にコンピュータチップを埋め込む計画を進めています。

次に何が起こるでしょうか？

たとえば、こんな未来を想像してみてください.....

あなたが病院や薬局に行くと、対応するのはロボットだけ。そこには一人の人間もいません。

想像するだけでゾッとします。

さらに.....

私たちの車.....

私たちの家.....

私たちの銀行口座.....

すべてがAIによって管理される未来。

あなたのあらゆる行動、会話、思考.....

あらゆる取引、購入履歴.....

すべてが24時間365日、AIによって監視される世界です。

これはSFの話でしょうか？ いいえ、現実です。

我々の生活は劇的に変わりつつあり、その変化は誰もが想像するよりもはるかに速いペースで進んでいます。

そして、AIが詐欺師、身元窃盗犯、ハッカーに与える恐ろしい力についても忘れてはなりません。

すでにAIは、単なるテキストメッセージをもとに偽の音声を作成し、あなたの家族や友人の声を完璧に再現できるので

もう、あなたは自分の目や耳を信じることができない世界になりつつあります。

私は、このままでは夜も眠れません.....

そして、これはまだ序章にすぎません。

この技術革新は、何十年もかけて徐々に進むものではありません。

数年後の話でもありません。

それは今まさに起こっています。

この急激な変化が加速し続ければ、適応する時間はほとんど残されていません。

気づいた時には、もう取り返しがつかなくなっているかもしれません。

もし、あなたが「AIを使わなければ、自分には関係ない」と思っているのなら……

残念ですが、それは間違いです。

AIはすでにあなたの生活のあらゆる面を脅かしています。

仕事のやり方……

買い物の仕方……

子供や孫が学校で受ける教育……

人々とのコミュニケーション方法……

貯蓄や投資の仕組み……

これらすべてが、ほんのわずかな期間で根本から変わる可能性があります。

私たちの生きる世界は、まもなく

「これまでとは全く違うもの」

へと変貌するでしょう。

もし、今すぐ準備をしなければ、あなたにはもう何の選択肢も残されなくなるかもしれません。

私は決して軽々しく予言をする人間ではありません。

しかし、私がこれまで警告してきたドットコムバブル崩壊や2008年の金融危機は、ことごとく的中しました。

そして今回、私はかつてないほど重大な警告を発しています。

ここで終わらず、さらに詳細を知りたい場合は、最後まで読んでください。

私はAIによる支配がどのように進行するのかを説明し……

あなたが今すぐ取るべき4つの緊急対策をお伝えします。

あなた自身と、あなたの大切な人々を守るために。

これは大きな話です。2023年、米国連邦保安局(U.S. Marshals Service)は12,117の資産を押収し、6,000億ドル相当の資産を保有していました。そして、それは彼らだけの話ではありません。米国財務省や司法省もまた、この広く利用され、そして広く濫用されている押収システムの主要な関係者でした。

では、あなたに質問します。

今、彼らが高度なAIを手に行っている状態で、このシステムが生み出した無秩序な濫用を突然やめると思いませんか？

もちろん、そんなことはありません！AIは、彼らが市民の権利を侵害する手段として、より迅速かつ効率的に悪用されるだけでしょ。

しかし、私が最も恐れているのは、これまで目にしてきた濫用の中でも、連邦準備制度(Fed)が最も深刻な政府の過剰な権限行使を実施できる力を持つことです。

彼らの新しいプログラムFedNowは、スイッチを切り替えるかのように、あなたの銀行口座のあらゆる取引を管理する力を彼らに与えます。

私は今、AIの判断ひとつで個人の銀行口座が凍結される可能性について話しています ...

そして、自分自身のお金へのアクセスが遮断される ...

ただAIのアルゴリズムの判断だけで。

あなたのほぼすべての資産 ...

あなたの401(k)(確定拠出年金)...

あなたの証券口座や保険契約 ...

それらすべてが、政府の直接的な管理のもとに置かれ、膨大なデータベースによって支えられ、AIによって制御されるリスクにさらされているのです。

今すぐ行動し準備しなければ、逃れる手段は急速に失われるかもしれません。

これは単なる警告ではありません。私は慎重にこの結論に至りました。

私は連邦準備制度、政府、米国の銀行システム、そして技術の進歩について60年以上研究してきました。

実際、私の金融に関する学びは1959年に始まりました。私の父はSound Dollar Committee(健全なドル委員会)を設立し、大統領ドワイト・D・アイゼンハワーのもとで米国の財政赤字を解消し、最後に真にバランスの取れた予算を実現する手助けをしました。

このような経験があるからこそ、私は他の誰よりも一歩先を見通し、普通の人々が気づかない点を結びつけることができるのです。

政府の監視の目から逃れられない日は近い

私は予言者ではありませんし、**「アメリカがAIによる独裁政治に陥る日がいつなのか」**を正確に言い当てることはできません。しかし ...

その兆候はすでにそこにあるのです。

事実として、あなたはこれをすでに目にしてきました。

- NSA(国家安全保障局)の違法な市民監視
- 何十億ドルもの個人資産の不当な押収
- アメリカの民主主義や司法制度に対する大きな脅威

つまり、私が「いつこの悪夢が始まるのか」を予測する必要はありません。**すでに始まっているのです。**

政府とAIの癒着

2023年9月、アメリカ政府の高官と世界の主要テック企業のエリートたちが、「AIの安全性と規制」についての会議を開きました。

しかし、私が恐れているのは、これが単なる「表向きの会話」であり、**本当の狙いは公には明かされていない**ということです。

私の考えでは、政府はAI企業に「裏口のアクセス」を提供する見返りとして、ビッグテックに対し、自由にAIを展開する許可を与えている可能性があります。

その結果、AIはアメリカ国民の自由を奪い、生活を崩壊させる武器になりかねません。

政府の狙いは2つ:コントロールとお金

なぜ政府がAIをここまで利用しようとするのか？
理由はシンプルです。

1. **コントロール**(監視と管理)
2. **お金**(あなたの財産)

この2つを確保するために、政府はFedNowを押し進めているのです。

FedNowとAI: 恐るべき組み合わせ

FedNowは2023年7月に静かに開始されました。そして、すでに**900以上の銀行や信用組合が参加**しています。その中には、

- JPMorgan Chase Bank
- Wells Fargo Bank
- U.S. Bank
- The Bank of New York Mellon
- State Street Bank and Trust Company
など、大手金融機関が名を連ねています。

「単なる送金システムの改善では？」と疑問に思うかもしれません。

ええ、連邦準備制度の関係者は確かにそう主張しています。

しかし、歴史が証明しているように、政府は手にした権力を必ず行使するのです。

FedNowがもたらす未来

FedNowは、単なる決済システムの改善ではありません。

これは、政府があらゆる取引をリアルタイムで監視し、制御するための強力なツールなのです。

それは「中央管理された台帳 (centralized ledger)」という形で機能します。

- すべての取引は**政府の中央データベース**で管理される
- **24時間365日**、リアルタイムで監視される
- **すべての金融機関が統合**される

そして、ここが最も重要なポイントです。

→ **あなたはこのシステムを「拒否する」ことができません。**

政府の制御を回避し、財産を守る4つのステップ

このままでは、あなたの金融資産は政府の直接的な支配下に置かれることとなります。しかし、**今すぐ行動すれば、まだ回避のチャンスはあります。**

ステップ1: 資産を「オフグリッド」に移動する

- 銀行に依存しない資産を持つ(例: ビットコイン)

ステップ2: 金(ゴールド)を適切に購入する

- 政府の押収を防ぐため、正しい方法で金を保管する
- **和訳:**
- さらに、時間の経過がもたらす魔法を活用できるのであれば、自分の資産が成長し、複利効果を発揮するのを見るのは素晴らしい機会です。
- 私は、あまり知られていないこれらの投資について知っておくべきすべてのこと、そしてその始め方を、「ウォール街の外で資産を保護し成長させる方法」という第3のボーナスレポートで明かします。

● レポート

- この貴重な情報を、他の2つのボーナスレポート「AIの脅威: 政府の支配から資産を守る方法」と「究極のゴールドウォールチェスト」と併せて手にすれば……
- あなたとあなたの家族の財政的未来を守るための道を、今すぐ歩み始めることができます。
- そして、これが私が特に重要だと考える次のステップです。

● ステップ4:

- **AIエリートに対抗するために、火には火をもって戦う**
- 最初にお伝えしたように、AIは「道具」にすぎません。
- 悪用されれば、危険な武器になります。
- しかし、正しく活用すれば、それは莫大な利益をもたらす強力なツールになり得ます。
- 特に、それを自分自身のために活用し、自分が望むことを実行できるようになれば……
- そして何より、これからの戦いに向けて必要な財産と経済的独立を築く助けになるのです。
- 私自身も、AIを活用して投資の意思決定を行ってきました。
- そして、ここであなたにも大きなチャンスを提供します……

● レポート

- 私は、特別レポート「AIエリートに打ち勝つ3つの株式スーパースター」において、私たちの独自のWeiss株式評価とAI技術を駆使して選定した、私自身のポートフォリオに組み込まれた3つの銘柄を共有します。
- 私たちがこれらの株を最初にアップグレードして以来、それぞれ **460%、799%、837%** の上昇を遂げました。
- AIが私たちの国にもたらすリスクを懸念していても、AIを活用した株式選びの驚異的な可能性は無視できません。
- 私はこれらの銘柄名を明かし、詳細なストーリーをお伝えし、ティッカーシンボルと具体的な購入方法をこの特別ボーナスレポートに記載しています。

● 今すぐ始める方法

- ここではっきりさせておきたいのは……
- このようなレポートを作成するには、膨大なリサーチが必要だということです。
- だからこそ、通常はこの情報へのアクセスを **有料会員のみ**に限定しています。
- しかし、今は前例のない時代です。
- アメリカでの私たちの暮らしは大きく変わろうとしています……
- 私は、これから起こる事態からあなたとあなたの家族を守るために、できる限りのことをしたいと考えています。
- **AIが完全に社会を支配してしまう前に、そして 手遅れになる前に、この4つのステップを今すぐ実行してください。**
- だからこそ、私はこの決断をあなたにとって「考えるまでもない選択」にしたいのです。
- **4つのレポートを即座にお届けします。**
- その代わりにお願いしたいのは、私たちの **会員限定サービス「Safe Money Report」**を **リスクゼロで試していただくこと**だけです。

● 「Safe Money Report」とは？

- 私と私のチームは、長年にわたり貴重な情報を収集し、投資家たちに警告を発してきました。
- ✓ 迫りくる金融危機からあなたの資産を守るための最新情報を毎月お届け
