Longevity Sector Update: Feb-April 2026

Summary

The longevity sector saw strong momentum over the past few months, with over $5.5 billion in funding spanning home-based care, breakthrough therapeutics, and AI-powered health solutions. Investors doubled down on aging-in-place technologies including senior care platforms, Medicare advocacy services, and brain-penetrating Alzheimer's treatments. Policy developments supported this trend, with the Trump Administration unveiling plans to accelerate clinical AI deployment through a 3-year FDA approval pathway and Congress extending critical telehealth and diabetes prevention programs through 2030.

Domestic Funding

18 companies **$2.4 B+ secured**

- Sage, a New York-based senior care tech platform, raised **$65 million** in Series C funding led by Goldman Sachs with continued support from IVP and Goldcrest.
- Solace Health, a Silicon Valley-based company providing healthcare advocacy services for Medicare and Medicare Advantage members, raised **$130 million** in Series C funding led by IVP, achieving unicorn status with a valuation exceeding $1 billion.
- Korsana Bio, a Massachusetts-based startup, announced **$175 million** in total funding across seed and Series A rounds between 2024 and 2025, led by Wellington Management and TCGX, to develop brain-penetrating Alzheimer's antibody therapies.
- ProSomnus Sleep Technologies, a San Francisco-based health tech company, secured **$38 million** from Catalio Capital Management to advance its tech-enabled non-CPAP obstructive sleep apnea therapy.
- Avisi Technologies, a California-based ophthalmic medical device company, raised **$10.7 million** in Series A funding led by MedVenture Partners to advance vision-preserving devices, including treatments for glaucoma and cataract surgery.
- Kinderhook, a private equity firm, acquired Enhabit, a leading national provider of home health and hospice care, for **$1.1 billion**.
- Nanochon, a Washington, D.C.-based orthopedic device company developing an implant for treating articular cartilage defects in the knee, raised **$4.1 million** in Seed Prime II funding led by cultivate(MD).

- Corxel Pharmaceuticals, a Berkeley Heights, NJ-based clinical-stage biopharmaceutical company developing therapies for cardiometabolic conditions, **$287 million** in Series D1 funding to advance its Phase 2 clinical trials for obesity and diabetes.
- L-Nutra, a Los Angeles-based nutrition-longevity driven technology company, secured **$36.5 million** in Series D funding led by Mubadala Investment Company.
- Claim Health, a NYC-based company empowering AI-native revenue operations for post-acute care, **$4.4 million** in Seed funding led by Maverick Ventures.
- Juvena Therapeutics, a Redwood City, CA-based clinical-stage biotechnology company advancing a pipeline of programs targeting neuromuscular and age-related diseases, raised **$33.5 million** in Series B funding led by Bison Ventures.
- Stratus Medical, a Magnolia, TX-based company focused on advancing radiofrequency (RF) ablation treatment for chronic pain, raised **$10 million** in Series B funding led by Wasatch Health Partners.
- WHOOP, a Boston-based wearable health platform, raised **$575 million** in Series G funding led by Collaborative Fund, reaching a $10.1B valuation. The platform tracks sleep, activity, heart health, and menstrual cycle data while providing personalized insights into how daily habits affect long-term wellbeing.
- Sage Health, a Phoenix, AZ-based primary care and wellness provider for Medicare-eligible adults aged 55 and older, received **$50 million** in growth financing from Trinity Capital, supporting its integrated model of primary care, cardiology, and wellness services for seniors.
- Conduit Health, a NYC-based provider of insurance-covered medical supplies and services for Medicare and Medicaid patients, raised **$17 million** in Series A funding led by Drive Capital.
- Vima Therapeutics, a Cambridge, MA-based startup, expanded its Series A to **$100 million** with new investor Frazier Life Sciences joining the round following early clinical proof-of-concept for its drug in isolated dystonia. The company is now expanding its scope to Parkinson's disease, with the thesis that its drug may address shared biological mechanisms across multiple movement disorders.
- MindImmune, a Cambridge, MA-based biotechnology company, received a **$5 million** investment from the Alzheimer's Drug Discovery Foundation to advance immune-focused therapies for neurodegenerative diseases, including Alzheimer's.
- Prickly Pear Health, a Phoenix, AZ-based digital health company, expanded its pre-seed funding to over **$600K** with new participation from Emmeline Ventures. The platform uses voice AI, behavioral analytics, and wearables to support women's brain health and cognitive resilience across hormonal life transitions, including perimenopause and menopause.
