# Changing Themes

ODU's WordPress system provides various themes for changing visual layout and style options. To change your theme, you have to click on the "appearance" tab, which will be on your menu on your dashboard.
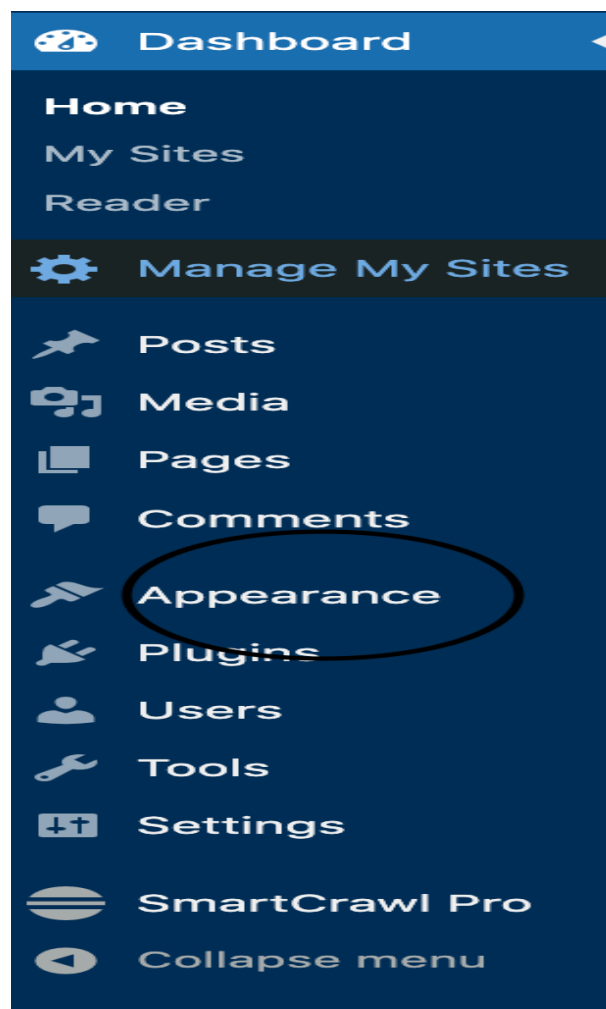

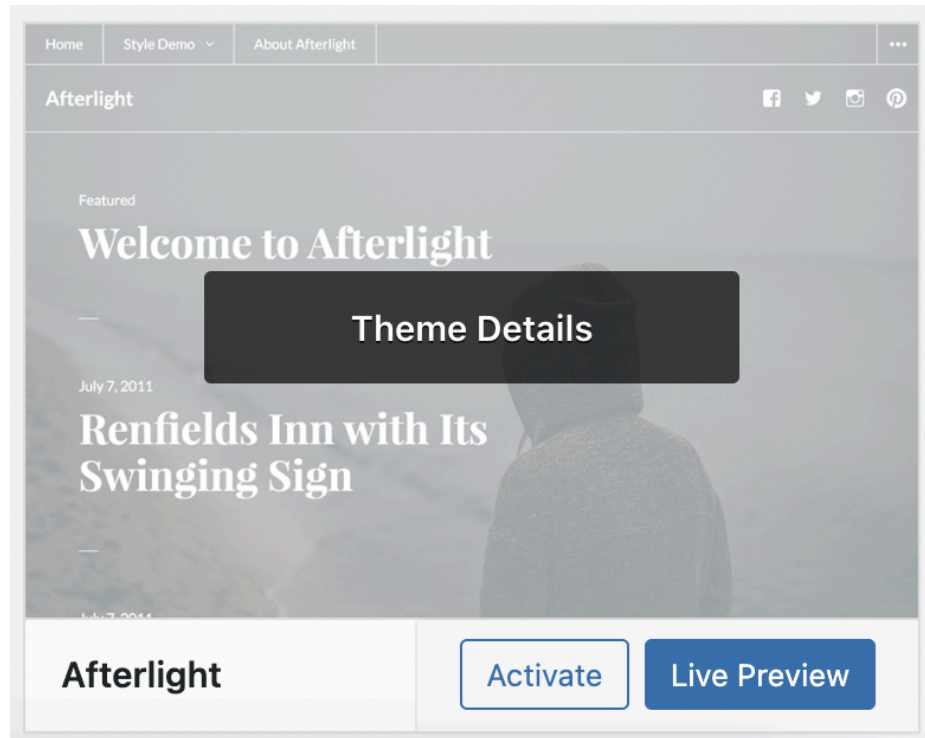

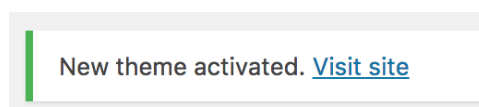

Accessing Themes

From Dashboard, go to Appearance → Themes.

After scrolling the themes listing, clicking on a theme provides more information about it and two options:

- Activate: The site will be updated with the new theme

- Live Preview: View the site with the theme before activating

New theme activated. Visit site

Once activated, a notification will provide a link to visit the site and see the new changes.
