Software System Development

DELIVERABLE #8:

Project Coding and Testing

Due Friday, May the 9th, 11:59pm

- As indicated on the syllabus, the Project Coding and Testing is 15% of your grade.
- Each member of the group will obtain the same grade.
- The chairman will do the grading.

Template:

Your deliverable should be composed of three parts:

1. **Projects Source Code:** The source code of your project.
2. **Implementation Companion Document:** In this document you will describe each major component of the implementation (modules, directories, jar files, etc..) and a description of every file. I shall be able to find the classes described in your design on your sourcecode. Also, include instructions and requirements for compilation.
3. **Testing Methodology Documents:** In this document please describe the methodologies and policies you followed to test and validate the different components of your Implementation.

Submission:

- Submit a single compressed file (.zip, or .tar.gz).
- Put your source-code in its own directory inside the compressed file.
- Place the documents at the root level of your compressed file.
- The compressed file name must be in the format
`code-LASTNAME-FIRSTNAME.zip`
- Submit your compressed file by 09/05/14 11:59 PM via Blackboard.
