

Priority needs

1. Determine funds owed for setup and usage
2. Form relationship with Aegir coop or affiliated member so Christopher does not have the burden of managing everything himself
3. [Evaluate options and timeline regarding which version of Aegir to use](#)
4. Determine who/how much time is needed to manage and maintain Aegir and non-customized platforms
5. [Set up easy to use Commit, Test, Deploy environment](#)
6. [Reevaluate/redefine OpenProducer service offering](#)

Aegir Platforms

Currently installed

The following are currently set up on

OpenProducer

These custom Panopoly based platforms can be managed internally.

- https://gitlab.com/gusaus/openproducer_visual
- https://gitlab.com/gusaus/openproducer_network
- <https://gitlab.com/gusaus/openproducer>

Open Atrium

- <https://www.drupal.org/project/openatrium>

Thunder

- <https://www.drupal.org/project/thunder>

Need setup

Open Social

- <https://www.drupal.org/project/social>

Would like to have

LibreTime

- <https://github.com/LibreTime/libretime>

CiviCRM

- <https://civicrm.org/>

Future platforms

Once Aegir supports Wordpress and other OSS platforms, the following could be part of our media toolset:

- [CASH Music](#)
- [Kendraio](#)
- [Pushtape](#)
- etc....

Notes
