

Jianan (Jonathan) Li has a master's degree in science majored in Nanotechnology from University College London (UCL), where he worked on the resistance switching in silicon oxide memristors. He also received the bachelor's degree in electronics engineering from Chang Gung University, Taiwan, where he gained technical experience in biosensor fabrication, autonomous vehicle, and semiconductor advanced characterization skill. Currently, he is a PhD student under Professor Aaron Thean in National University of Singapore (NUS). He is working on using two-dimensional materials as well as their heterogenous structures for electro-optic modulation and in-material computation.
