

Java Education Officer Deliverable SP26

Hi Spring 2026 Java Officer candidate! Thank you for your interest in this position, it fills me with great joy to know that the Java legacy continues to thrive through future education officers. I am excited to see your take on this role and how you go about explaining challenging Java concepts to students.

To be eligible as a candidate for the Java Education role, the following deliverable must be completed in its entirety. There is no right or wrong way to go about this, it is simply a way to gauge how the next officer will perform in this position.

1) Record a video explaining (1-2) of the following concepts:

- Classes and Objects
- Methods
- String Manipulation
- Arrays and Loops
- Inheritance
- File Processing

2) What is a way to increase Java Nation engagement? In what direction do you want to take the Java Nation?

3) Create a basic outline for a Java Workshop targeted towards beginner or intermediate students. Include:

- A topic for e.g. (Arrays in Java, Using loops in Java)

Please submit your deliverable as a Word Doc/PDF. The simplest way to incorporate the video is to upload the video as "unlisted" to YouTube and paste the link into the document you will submit.

Best of luck! Have fun with this and feel free to reach out if you have any questions!

Best,
Nicholas Salva
