

Module 1 Topic 1 Quiz Corrections

The ultimate test to understanding is being able to teach someone what you know. Have your child explain the following five problems to you. I have listed where the content can be found in the textbook. When complete please review their quiz with them and sign the bottom of this sheet. QUIZZES AND SIGNATURES NEED TO BE RETURNED MONDAY.

1. Use the distributive property to write an equivalent expression in the form $a(b + c)$. Pages 5-7 60 + 35	2. Explain how to find the greatest common factor (GCF) of the pair of numbers using prime factorization. Pages 14-15 24 and 36										
3. Explain how to find the least common multiple of the pair of numbers using a table of prime factors. Pages 17-18 12 and 15 <table border="1" style="margin-top: 20px; width: 100%; height: 40px; border-collapse: collapse;"> <tr> <td style="width: 20%; height: 20px;"></td> <td style="width: 20%; height: 20px;"></td> <td style="width: 20%; height: 20px;"></td> <td style="width: 20%; height: 20px;"></td> <td style="width: 20%; height: 20px;"></td> </tr> <tr> <td style="height: 20px;"></td> <td style="height: 20px;"></td> <td style="height: 20px;"></td> <td style="height: 20px;"></td> <td style="height: 20px;"></td> </tr> </table>											4. Give an example of a pair of numbers that are relatively prime. Page 20
5. Explain how to divide the following fractions. Pages 37-38 $2\frac{1}{2} \div \frac{1}{5}$	Work Space:										

My student and I have reviewed the quiz.
