How to Make Simple Coffee Milk

Ingredients:

- Coffee powder
- Condensed milk
- Full cream milk
- Sugar (you can skip this because full cream milk is fairly sweet)
- Hot water

Equipments:

- A tablespoon
- A cup

Methods or Steps:

1. Firstly, add the coffee powder into the cup which you have prepared.
2. Secondly, add sugar (you can skip this if you want to, because full cream milk is already fairly sweet).
3. Thirdly, pour hot water into the cup.
4. After that, stir the coffee.
5. And then, pour in the condensed milk.
6. After that, pour in the full cream milk.
7. Lastly, stir it again.
8. Now the coffee milk is ready to be served.
