

The purpose of this document is to serve as a place for the Director to give notes on what we are currently working on. With the limited time we have, this will become a great and helpful way to distribute notes to the Company, so be sure to save a link to this document where you can easily get to it. A link is also available on the department website.

*If you have a question about a note- don't be afraid to ask it but be specific- it should be a conversation*

*I don't know why the notes keep going to the next page....scroll down, please*

Everyone should read the highlights, otherwise look for your name/mono #/scene name for individual notes:
