

DNR: [Wisconsin wolf population likely now 972 animals](#) September 30, 2022

wxow.com

... Department of Natural Resources officials released their latest population estimates at the agency's board meeting on Wednesday. They said they estimate between 812 and 1,193 wolves currently roam the state, with 972 likely the best estimate... [Wisconsin's current wolf management plan, which dates back to 1999, calls for capping the population at 350 wolves..](#),

[Wild Things: Updated Wolf Plan Expected Soon](#) October 19, 2022 Wisconsin, Door County Pulse

... the DNR recently released its 2021-22 overwinter wolf-population estimate. The computer model – based on winter monitoring surveys covering more than 16,700 miles and involving DNR staff, tribal members and volunteers – estimated that there were likely somewhere between 812 and 1,193 wolves in 243 to 352 packs. A best estimate, according to the DNR, is that there were at least 972 wolves in 288 packs...
