

[Survival and Cause-Specific Mortality of a Southeastern Kentucky Deer Population](#)

February 2018

CA Haymes

... While much of the Commonwealth boasts high deer populations, those in southeast Kentucky are viewed as relatively low compared to other regions, even after a decade of restrictive doe harvest and multiple years of population supplementation via translocation... Deer vehicle collisions and poaching were the most frequent mortality causes and represented 13 of 18 (72%) of mortalities..,
