

Superpacman04 Waves to Crowd at AC GOP Headquarters

Superpacman04 Campaign Kickoff NYC, NY

Hello New York City! Welcome to the AC GOP HQ! Today is my kickoff event for AC-2. You know what's great? I'm already 12 points ahead of my Socialist opponent. Thank you all so much for showing that True Conservatism is what the people of AC-2 want. I am so excited for this election!

Now I should probably get on to my speech but first I'd like to answer the question you're asking, how can I reach this podium? Yes, it's true I'm only 5' 4" but that shouldn't be a detractor from my ability to be a Giant for AC-2 in the House of Representatives! Anyways, it's time for my speech!

This election my main goal is to bring back True Conservatism to mainstream politics. The True Conservatism that Calvin Coolidge so greatly displayed during his presidency. This conservatism is one that we can not let go of. As Calvin Coolidge once said, "It is much more important to kill bad bills than to pass good ones." This is my motto. That we should strive to be more critical of the legislation we propose. Because if we do not, then we risk passing bills that could someday ruin our nation. This is the True Conservatism I speak of. It also simplifying the amount and complication of the laws that we have put in place today. These are the things I wish to speak to you about today.

On to being more critical of our legislation. This is one of the most important policies I have this election. I want to make sure that our Congress spends more time thinking about the bills they write and vote on. Because as Representatives of the American people, we are charged with making the best possible decisions for the future of our country. And we can not do this if we do not spend more time thinking and listening to the people. Calvin Coolidge said, "It takes a great man to be a good listener,". I want this to be something that every Representative, Senator, and Executive's main focus. Because as the representatives of the people we must ensure that we are consulting the people.

Now, to talk about simplifying our legislation. Estimates range the amount of laws on our books to be anywhere from 8,000 to 15,000. This amount is absolutely ludicrous. There is no need for there to be so many over complicated laws on our books. That is why I desperately want to work to cut down on not just the amount of bills but the complication of bills. This can be done through my policy of requiring all bills to have a plain english section that sets out what the bill does. If we do not strive to make our laws less complicated and less abundant than we are not doing our jobs to keep the government out of the business of the people. That is why cutting the numbers and complication of laws is one of my most important policies.

So now, to poke fun at my height some more. One second. Here is the step stool I am standing on. I hope you enjoy that cause I can't see over the podium anymore. Anyways, I am so glad all of you came out to hear my two big policies. Join me tomorrow in Utica to hear me speak about ending the war on drugs with AC Senate candidate Fire! Also, tomorrow I will be unveiling my platform along with a fun event in Albany!

God Bless you All!
