NOTES

- You must be in the Paradoxum Roblox group for this to work. (\$100 bonus starting cash)
- Be sure to ROTATE your Minis/Turrets from the front to the back once Penumbras gets outside of their range.
- You're gonna leak a Pike on wave 2, but don't worry about it.
- If you die to a Bat on Wave 8, have Player 4 place a Minigunner after they place their first Hunter.
- If all 4 players have Turret you should use Turret instead of Minigunner.
- **EDIT: People saying the strat kills you on wave 2 so I made a change to what player 2 does, should work now.**
