

Milestone Deliverable Review Report

Deep Funding Round: 4B

Project code: DFR4B-NEW3

Project title: AI Satellite Insights for sustainable farming

Milestone number: 5

Milestone deliverable: Service Link:

<https://beta.singularitynet.io/servicedetails/org/EnigmaAi/service/farmingID>

Dashboard Link: <https://huggingface.co/spaces/DeepFundingAgriAI/Field-Monitoring>

Date: 13/08/2024

Status: Accepted

Feedback (Why accepted, why rejected?):

- Requested API tokens on the DF beta site.
- Created a new account and signed up, rather than using the login for testing purposes.
- Drew and saved an existing field.
- Navigated to "Monitor Fields" and successfully used all metrics (NDVI, LAI, and CAB), each providing unique and similar results with downloadable reports.
- API token usage lasted for 15 minutes, with the option to select the Observation Date for fields.

Everything has been successfully delivered as reported for this milestone. Integration into SNET is complete!

If rejected, suggested changes:
