

Privacy Policy

Echo Maze

Last updated 30 August 2026

Echo Maze is a game intended for both children and adults. This policy explains how the game handles gameplay information, motion-sensor input, and optional in-app purchases. Echo Maze is designed to minimize the collection of personal information.

1. Information used by the game

Gameplay input. Echo Maze responds primarily to touch input. Some game elements use the device gyroscope or related motion sensors. Sensor readings are used to control or influence gameplay and are processed transiently on the device.

Local game information. Game progress, unlocked content, settings, language choices, and similar preferences may be stored locally on the device.

Purchase information. If you make an optional in-app purchase, the app store processes the transaction. Echo Maze may receive the product identifier, purchase status, and information needed to unlock or restore purchased content. The developer does not receive your full payment-card details.

The current version does not require a user account and does not intentionally collect names, email addresses, precise location, contacts, photos, microphone recordings, or biometric data.

2. How information is used

Touch and motion-sensor input is used to operate game mechanics. Local game information is used to save progress and preferences. Purchase information is used only to complete, acknowledge, restore, and provide purchased digital content.

3. Gyroscope and motion sensors

The gyroscope is used only for gameplay elements that react to the orientation or movement of the device. Echo Maze does not use gyroscope data to identify you, determine your geographic location, create an advertising profile, or track you across apps. Sensor readings are not stored as a motion history or transmitted to the developer.

4. In-app purchases

Echo Maze is free to download and may offer optional digital items or features for purchase. Purchases are handled by the store through which the app was obtained, such as Google Play, and are subject to that store's terms and privacy policy. Purchase availability, authentication, refunds, parental controls, and payment processing are managed by the applicable store.

Parents and guardians should configure purchase authentication and parental controls on devices used by children. No purchase is required to download the free app.

5. Children's privacy

Echo Maze is suitable for a mixed audience of children and adults. The game does not knowingly request or collect personal information from children, and the current version does not include chat, social posting, user-generated content, behavioral advertising, or account registration.

If you are a parent or guardian and believe that a child has provided personal information to the developer, contact us using the details below. If such information is identified, reasonable steps will be taken to delete it.

6. Sharing and sale of information

The developer does not sell or rent personal information. Information needed for a purchase is exchanged with the applicable app store to provide and restore purchased content. The operating system and app store may independently process technical, account, and transaction information under their own privacy policies. The current version does not include third-party advertising or analytics services.

7. Retention and deletion

Local progress and settings remain on the device until they are reset, the app's data is cleared, or the app is uninstalled. Purchase records may remain associated with the user's app-store account according to the store's retention requirements. The developer does not maintain a separate user-account database for Echo Maze.

8. Security and your choices

Echo Maze limits data handling to what is needed for gameplay and purchases. Users can manage app data through device settings and manage purchase controls through the app store. Depending on applicable law, users or their guardians may contact the developer about privacy rights or concerns.

9. Changes to this policy

This policy may be updated when the game, its services, or legal requirements change. The revised policy will show a new 'Last updated' date.
