

Annual Asbestos Management Plan Availability Notice

This information is being made available in compliance with the regulations of the federal Asbestos Hazard Emergency Response Act (AHERA) guidelines for management of materials containing asbestos in schools.

As required, the building(s) at Ladue School District were initially inspected for asbestos and the findings of the inspection were documented in the district's Asbestos Management Plan. As required under AHERA Rules and Regulations, six-month surveillances, and three-year re-inspections are routinely conducted and any changes in the condition of the materials containing asbestos are documented.

The Asbestos Inspection Report and Management Plans are on file in the district's Facilities Department and are available to the public for review during normal business hours. Individuals interested in reviewing the Management Plan(s) are asked to submit a written request to the district, as follows:

Mike Noonan
