

How to define a static const member variable

Jing, mqjing@gmail.com

GitHub: [Download](#)

Google Doc: [This Document](#).

```
const port = 33;

class MyClass {
  static get port() {
    return port;
  }
}

function main(){
  console.log('static const member' , MyClass.port); // print: 33
  MyClass.port = 45;

  console.log('static const member' , MyClass.port); // print: 33
}

main();
```

e.g.

```
jing@jing-Lenovo-G510s:~/test/lab-nodejs/example/class_static_const_member_variable$ ./docker_run.sh
static const member 33
static const member 33
```
