

Julian Assange's current predicament - tortured through institutional depravity and subject to a Kafkaesque extradition process with evidence free phony conjured up charges suffering from health needs and nutrition neglect, subjected to COVID-19 rip through the very prison section where he is housed - all as a demonstration trial to show the world what will happen if you show the truth about how the US commits war crimes all over the globe.

It is a sad and sorry comment that the best action we can take right now is to pressure Trump For a pardon.\ I hear nothing but continued silence from Sanders, the squad — even parts of the peace movement. Has the DSA taken a stand? Our political “leaders” have taken an oath to uphold the Constitution. Well right now their oath rings as hollow as the old Constitution itself.

FightBackBetter.com Narrative Work Sheet

This is for those who are volunteering to write a draft for a narrative for the FightBackBetter.com site. The narratives should be short - 5 - 10 sentences.

If you have links - put them in here too. We want supportive links on the topic of Biden (or some aspect of Biden incoming administration) that bolster the narrative. The narrative should answer the following questions.

State / Name the problem or issue: E.g.

Lack of health care in the USA results in 30,000 unnecessary deaths and there is not going to be any improvement under the incoming Biden administration.

A little more detail as to how bad the problem is (optional)

What has Biden policy been on the issue, what is his history.

What is expected to happen under Biden in regards to the issue.

What SHOULD HAPPEN and NEEDS TO HAPPEN for there to be - what improvements - on the issue.

Can't hurt to make references to points within the supportive links.

What are the efforts under foot to do something about it.

(There will be a button leading to groups organizing on the issue at the bottom of the narrative page).

Links on issue as related to Biden - the transition - his cabinet, harris - on the issue.
