Please note that publication of your manuscript implicates that you must make all materials, data, computer code, and protocols associated with the publication available to readers. Please disclose at the submission stage any restrictions on the availability of materials or information. New methods and protocols should be described in detail while well-established methods can be briefly described and appropriately cited.

Interventionary studies involving humans and other require ethical approval must list the authority that provided approval and the corresponding ethical approval code.

4. Results (Font: Georgia, Size: 12)

(Font: Georgia, Size: 11). Result should describe a brief and precise the results of research and/or experiments, interpretations and conclusions that can be drawn. This section can be divided to sub-sections.
