## <Wiki> Satu-Morning Mod By: ExiledLizard365

This Mod tells you your food level and it tells you "Good Morning", for when you wake up/ get out of bed.

The text appears in the action bar.

The other modifications are just other mods that I downloaded.

Curious? Here are the 1.19.2-1.19.3 mods! (They still work on 1.19.2-1.19.3, even if they are for 1.19.1!).

Mods:

1. Range Finder Hud: (green text under the crosshair, tells you distance between you and the block that you are looking at).

https://modrinth.com/mod/rangefinderhud/version/1.1.1-1.19.1

2. 100 Days Hud: (the text element above the hot bar: a day counter with a server-side title that announces the days to all players) https://modrinth.com/mod/100days-plugin

3. Sodium Extra: (Coordinates/Other Info on top left corner of screen) https://modrinth.com/mod/sodium-extra
