

CITRUS LEAF MINER

Active when daytime temperatures are 70-80°+ and night time temperatures are 50-60°+

PREVENTATIVE OPTIONS:

- **Monterey Citrus Leaf Miner Pheromone Trap & Lure**
 - Used for monitoring when adult moths are active
 - When adult moth is visible in traps, preventatively spray with an oil based spray
- **Oil Spray Options (For Preventative Application):**
 - These products are effective for up to a month, multiple applications a year are required
 - **Neem Oil**
 - **Organicide Bee Safe 3-in-1**
 - **Dr Earth Final Stop**

ACTIVE RESPONSE TO CURRENT INFESTATIONS:

- **Spinosad Spray**
 - The spinosad in either one of these products is effective for 3 hours. Apply at dusk.
 - Do not use more than 5x per year or the plant may be damaged
 - **Captain Jack's Dead Bug Brew**
 - **Monterey Garden Insect Spray**

Note: Citrus leaf miners do not affect the fruit, they attack new, young growth only and are cosmetic damage. Treatment is only recommended for younger trees still developing a canopy.
