OSS schedule: <https://acmcsuf.com/oss-schedule>

Summary

Welcome to the [Open Source Software team document](#) ! This document is designed to keep track of all the exciting open source projects hosted by our club's GitHub organization.

By attending our meetings, you'll be part of a team of driven and curious computer science students and have the opportunity to collaborate with your peers and make real progress on our projects. We are constantly pushing the boundaries of what's possible and learning new skills along the way. Our meetings are usually held in the comfortable meeting rooms of our school library, creating a relaxed and inviting atmosphere where we can exchange ideas, share our experiences, and catch up on our latest projects. Whether you're an experienced open-source contributor or just getting started, you'll feel right at home and have a great time with our team.

Participant rules

Below are some rules to follow if you intend on editing this document. Come to in-person meetings to get edit access to this document.

1. Be kind to others.
2. Learn as much as you can.
3. Have fun!
4. DO NOT EDIT THE DROPDOWN SCHEMAS! Only create, update, and delete existing dropdown instances.
5. If you do not know what something means, check the [Document glossary](#). If it does not appear in the glossary, request a new glossary entry by creating a new row and leaving a polite comment requesting another participant to fill it. Pro-tip: Nudge them on Discord to expedite the process. Or bring your idea to the #just-chatting channel.
6. If you have ideas for new initiatives that are in the best interest of the club, add them as a new row at the bottom of the [Initiatives table](#).

Initiatives list

acmcsufoss.github.io/docs lists all the open-source software projects we're working on as a team, along with their descriptions, resources/links, and participants (the first participant in the list is the owner/lead of the project). It's the perfect way to stay up-to-date on what's happening, connect with other talented members, and jump in on any projects that interest you.

While we use GitHub's project management features to keep track of our specific project tasks and progress, this document serves as a complementary resource to provide a broader overview of all our projects, updates, and plans in one centralized location.

Our legacy initiatives table (dated from February 2023 to February 2024) are archived in a separate document:

 [ARCHIVED] Fall 2023 Initiatives Table

Document glossary

Word/phrase	Author	Definitions
TBD	Ethan ▾	To be determined; not yet agreed upon. Often used

Word/phrase	Author	Definitions
		as a placeholder.
Document glossary	Ethan ▾	A table devoted to defining uncommon words/phrases found within this document. Participants, please feel free to add your own additions to the glossary. Request a new glossary entry by creating a new row and leaving a polite comment requesting another participant to fill it. Pro-tip: Nudge them on Discord to expedite the process.
A11y ▾	Ethan ▾	Accessibility is important for our club's official website to ensure that all members and interested parties, regardless of ability, have equal access to and can fully participate in the information and resources provided on https://acmcsuf.com/.
status:act... ▾	Ethan ▾	An initiative status of “active” conveys that the initiative has been actively attended since our last team sync.
Exercise ▾	Ethan ▾	A form of physical activity that requires you to leave the comfort of your computer chair and move your body in a repetitive manner for the purpose of keeping it from turning into a lump of flesh. CSUF’s Student Recreation Center is free and open source to all CSUF students.
TBA ▾	Ethan ▾	To be announced; information is not yet public. Often used as a placeholder.
