(Grade 9) Academic Excellence

This course is designed to give students the practical study skills they need for success in high school English and History. Each session starts with dedicated time for us to build essential techniques in organization, active reading, note-taking, brainstorming, analytical writing, test preparation, and academic research. Then, in the second half of class, students get to immediately apply these new skills to humanities coursework. By the end of the course, students will have strengthened their core academic skills. (NOTE: Space is limited.)
