2023 Fall Retreat: How to build a culture of feedback

Crowdsourced Resources

What is this? *Use a cell in the table below to share your thoughts, ideas, and resources with other participants!*

Thoughts, Ideas, and Resources	Space for others to comment and build on these
This resource includes language to support Teaching Assistants (especially int'l or multilingual TAs) with language for supporting group work. It comes from an Engineering course (EMA303/ME306) where TAs were available to support students during long problem solving exercises, and focused on the question "How can we support students without just giving them the right answer." It can be useful for everyone. Includes a plan for 60 minute workshop. (from dan.pell@wisc.edu, CTLM) TA Language for Giving Feebdack to Students.docx
