We Can Handle Any Type Of Bed Bug Job

Unfortunately, it isn't just the residents of the Portland area that have been affected by the rise of bedbug infestations. In fact, tons of local hotels have even been hit with this infestation. Hotels are extremely hard to rid of bed bugs, because they just travel from room to room. Once you have one room cleared, they simply travel to the next room and back. However, you should be aware of the fact that our company offers how building fumigations and treatments as well as residential fumigations and treatments.

There really is no job that is too small or too large for our company to handle, as we have a variety of techs and teams that can handle any sized job.

Taking Advantage Of The Latest Technologies

Technology is constantly changing, and it has even affected the bed bug industry. There are now new tools, and equipment available that can help our techs quickly identify, locate, and eliminate infestations in half that time that it used to take. Despite these new advances in technology there are still a lot of local bed bug extermination companies in the Portland area that are hesitant about taking advantage of these new technologies. However, that is not the case with our company, as we embrace this new technology.

This not only allows us to better serve the local community, but we can do it at cheaper rates because it takes us half the time.

Services That We Provide

You can see from the short list of services that we are truly a unique and diverse company with highly trained techs that are capable of handling a variety of different situations. With that being said, if you need more proof that we really are the most reliable in the area, just take a look at everything that we have to offer.

- Always ready to go for our customers
- Dressed in professional attire with company vehicles
- Our techs are always willing to learn more about the industry
