        - 6 Air Valves
- **/variable Command and alias /var** - Allows you to view and modify GLOBAL_MAP, PLAYER_PERSISTENT, or PLAYER_LIFETIME variables used by the mod.

Usage:

`/var <@a|@s|@p|@r|playername> <get|set> <global_map|player_persistent|player_lifetime> <variablename> <@s|@p|@r|playername> <value>`

- Target(s) to receive command output message.
- What action to do with the command (get or set a variable).
- What kind of variable to interact with using the command.
- The name of the chosen variable.
- The target of the actual command action (if variable type is PLAYER_PERSISTENT or PLAYER_LIFETIME).

- **Gilded Smithing Upgrade Template** - A rare item found in Desert Temple+ loot and Sand Patches. Used to upgrade the Crowbar into the Gilded Crowbar with a Golden Shard. Like other Smithing Templates, this one can be duplicated. For duplication, it uses 7 Gold Ingots, 1 Sandstone, and itself.

- **Gilded Crowbar** - A **DIVINE** item that is a complete upgrade of the regular Crowbar. It supports every enchantment that the regular Crowbar does, and can be repaired with Golden Shards. When right clicked, you can fling yourself forward at the cost of the item's durability, and your hunger/saturation. The vanilla Efficiency enchantment improves how fast you are flung by 10% per level, assuming you are standing completely still. Flinging yourself also gives you immunity to fall damage for a short duration. However, having Efficiency on your Gilded Crowbar will make the fling ability cost more per enchantment level, up to 6 durability at a time at Efficiency V. Hunger loss is not affected by the Efficiency enchantment. This ability cannot be used if you are too hungry to sprint. Enchanting the Gilded Crowbar with vanilla Smite will cause you to get the vanilla Strength status effect for 2.5 seconds when flinging yourself. The status effect's level is:

- 1 at Smite I and II
- 2 at Smite III and IV
- 3 at Smite V

However, enchanting the Gilded Crowbar with Sharpness will give you Resistance instead, and it will last 1 second per enchantment level. Enchanting the Gilded Crowbar with Bane of Arthropods will give you Regeneration for 1.5 seconds. Additionally, if you land a falling hit right after flinging yourself with the Gilded Crowbar, without touching the ground once, five things will happen at once:

- You will be flung vertically into the air at a speed that increases with the level of Efficiency on your Gilded Crowbar (like with Wind Burst on Maces),
- Your time window to land this kind of hit again will be increased by 1 to 1.25 seconds (also dependent on level of Efficiency),
- Your current horizontal velocity will be multiplied (also increased by Efficiency),
- The amount of damage dealt by the hit will be doubled,
- If the mob that was hit dies, it will drop 3-5 Golden Nuggets, and have a 0.5% chance to drop a Golden Shard (unaffected by Looting).

Note: Your attack needs to be at least 75% charged to qualify as a special Gilded Crowbar hit.

Note: A special Gilded Crowbar hit, if it kills a mob, it may cause the mob to sometimes not drop any of its original loot.

- **Warehouse** - A structure that generates very rarely in Plains biomes. It has unique loot tables, including many non-custom Pooltoys, and rarely some custom ones. 18% of all warehouses generate with only 1 basement, and 1% of all warehouses generate with 2 basements.
- **Gamerules** - Added gildedCrowbarCooldown. Determines how long the cooldown for Gilded Crowbars lasts in Survival Mode.

Changes:
Release:

- **12 Pooltoys** - Fixed entity textures.
- **Josh (Folf) Pooltoy** - Fixed entity model.
- **Abadraco (Magic Dragon) Pooltoy** - Fixed shiny entity texture.
- **3 Pooltoys** - Fixed recipes in Pooltoy Printer.
- **Projectile Entities** - Added translation keys.
- **/sqrrkversion Command** - Fixed the command only being usable once per world.
- **Ukrainian (Ukraine) Translations** - Standardized and fixed some phrases.

- **Sounds** - Added new sounds for "sqrrk:sqrrk.entity.pooltoy.creak" sound event.
- **Daz (Dragon) Pooltoy Blueprint** - Fixed tooltip.
- **Vinyl Painter** - Now should be a lot less buggy.

Patch 1:
- **Eira (Wolf) Pooltoy** - Can no longer award the [Dragonmount] advancement.

Additions:

- **Pooltoys** - Added 2 Pooltoys:
  - Added Starflight (Dragon), designed by @ziwolfdonxaeros.bsky.social on Bluesky, requested by @NevrosSorven on Twitter (X).
    Note: Not to be confused with Starflight (NightWing Dragon) by @tuisutherland on Instagram.
    Note: Recipe will be updated in the future to account for the Pooltoy handles on the in-game model.
    Rarity: **MYTHIC**
    Recipe:
      - 40 Black PVC Sheets
      - 16 Purple PVC Sheets
      - 6 Light Gray PVC Sheets
      - 1 Green PVC Sheet

- 1 Red PVC Sheet
- 1 Air Valve
- Added Ziwolfdon (Dragon-Wolf), designed by @ziwolfdonxaeros.bsky.social on Bluesky, requested by @NevrosSorven on Twitter (X). *Note: Despite having a canine appearance, this Pooltoy is still capable of awarding players the [Dragonmount] advancement.*
Rarity: **MYTHIC**
Recipe:
  - 16 Yellow PVC Sheets
  - 12 Brown PVC Sheets
  - 1 Black PVC Sheet
  - 1 Pink PVC Sheet
  - 1 Light Gray PVC Sheet
  - 1 Air Valve
- **Material Crate** - A **LEGENDARY** block that rarely drops from Supply Crates. Drops vanilla materials, such as Iron and Copper, including usually non-renewable materials such as Diamond and Netherite.
- **Paintings** - Added "Boxart" by Nightglide (2x3 size).
- **Gamerules** - Added breakPooltoyDamageMechanic. Makes attempting to damage Pooltoys significantly more buggy, use this gamerule when you are bored.
- **Structures** - Added the Desert Temple+ structure (/locate structure sqrrk:desert_temple_plus). This

structure only spawns in Desert biomes, and is one of the only places where Golden Shards can be found. Chest loot in "treasure" chests can also occasionally contain Blueprints and Pooltoys.

- **Features** - Added 3 variants of Sand Patches:
    - sqrrk:sand_patch_common (1/25 chunks)
    - sqrrk:sand_patch_rare (1/100 chunks)
    - sqrrk:sand_patch_special (1/2000 chunks)

All Sand Patches only generate in Desert biomes. Special

Sand Patches generate with Blocks of Diamond in the middle. Special Sand Patches can also contain SPECIAL

rarity Blueprints and Pooltoys in Suspicious Sand loot. World generation issues may cause problems like gravity

destroying some Suspicious Sand loot, or lower-rarity Patches overwriting loot from rarer Patches.

- **Loot Tables** - Added 9 loot tables:
    - 5 loot tables for Desert Temple+ chests
    - 3 loot tables for Sand Patch loot
    - sqrrk:gameplay/enchanted_book_test (Creative Mode only)
- **Golden Shard** - LEGENDARY item found in Desert Temple+ chests or Special Sand Patches. Applicable to SandWing and SandWing Hybrid Dragon Pooltoys in Pooltoy Printers to create gilded variants that emit

Golden Glint particles when held or placed.

Any other items or entities gilded using NBT/component manipulation will not emit Golden Glint particles.

Golden Shards can be enchanted with the Starbound enchantment to shoot Golden Stars with a 2-second cooldown, using Gold Nuggets as ammunition.

- **Starbound** - A very rare (rarer than Frost Walker) treasure enchantment that cannot be obtained through Villager trading that can only be applied to Golden Shards.

- **Golden Star** - A projectile fired by Starbound-enchanted Golden Shards that doesn't deal much damage or knockback to entities, but is far more useful if it hits sand blocks. If it hits sand, it will make nearby Suspicious Sand blocks emit Golden Glint particles. Only Suspicious Sand blocks within a 17x17x17 cubic area centered on the block that the Golden Star hit will react to this event. Suspicious Gravel will not react to Golden Stars at all.

- **Pooltoy Tiers** - An experimental feature that currently only affects the IW Orca Pooltoys. This feature gives the Pooltoys an appearance like that of an Armor Trim, but entirely dependent on a float variable "tier" that the Pooltoy item/entity has. 0 = default

appearance, 1 = gold trim, 2 = diamond trim, 3 = emerald trim. This feature is currently only accessible with commands. Example commands (copy and paste into in-game chat):
- /give @p sqrrk:pooltoy_ifw_orca_small_blue_shiny[custom_data={tier:1}]
- /give @p sqrrk:pooltoy_ifw_orca_small_black[custom_data={tier:3}]

Known issue: When a tiered Pooltoy entity's chunk is unloaded, it will internally forget which tier it was before unloading, but will visually retain its tiered appearance before it is turned back into an item.

- **Block, Item, and Entity Tags** - Added 3 block tags, modified 1 block tag, 4 item tags, modified 1 item tag, and added 3 entity tags:
  - New Block Tags:
    - #minecraft:carpets
    - #sqrrk:pooltoys_placeable_in
    - #sqrrk:activates_golden_star
  - New Item Tags:
    - #sqrrk:tiers_ifw_orca_small
    - #sqrrk:gildable_pooltoys
    - #sqrrk:gilded_items
    - #sqrrk:pokes_pooltoys

- New Entity Tags:
    - #sqrrk:tiers_ifw_orca_small
    - #sqrrk:gilding_affected_pooltoys
    - #sqrrk:tiers_affected
- **Commands** - Added /sqrrkdiscord. Sends an invite to the ***SQUIRRRK!*** Discord server (discord.gg/CztkpdWxyz) to all players in chat. Usable on a server-wide 5 minute cooldown by all players and Command Blocks.

Changes:
Release:
- **Pooltoys** - Several changes were made:
    - Pooltoys are now nameable in Pooltoy Printers.
        - You can name a Pooltoy for free when first printing it, or rename it with a Name Tag in the "Air Valves" slot. Avoid using characters in Pooltoy names such as: ' " \
    - SandWing and SandWing Hybrid Dragon Pooltoys are now gildable by putting a Golden Shard in the "Air Valves" slot, and the Pooltoy in the "Blueprints" slot.
    - 19 Pooltoys were visually modified (texture update)
    - 3 Pooltoys had their recipes updated:
        - Fatespeaker (NightWing Dragon)

- Bumblebee (HiveWing Dragon)
- Winter (IceWing Dragon)
- **Squeaky Touch Enchantment** - Now applicable to all items in #sqrrk:pokes_pooltoys item tag. That means all of those items (swords, axes, pickaxes, shovels, hoes, and tridents) will be able to damage Pooltoys without the Squeaky Touch enchantment.
- **Crate Drop** - Fixed a bug where **MYTHIC** items had a 5.6% chance to be nothing.
- **IW Orca Pooltoys** - Fixed texture issues.
- **IW Orca Small Blue Pooltoy** - Fixed item name appearing in **MYTHIC** color instead of **DIVINE** color.
- **Sunny (SandWing Dragon) Pooltoy** - Fixed a bug where players would sit inside of its mane instead of on top of it.
- **Abadraco (Magic Dragon) Pooltoy** - Changed model and texture (added whiskers).
- **Pooltoy Interaction UI** - Added "Particles" tab, which manages which particles from the mod a player can emit. Only has one option for now - Golden Glint, which toggles whether the player can emit Golden Glint particles from holding certain items.
- [King of the Squeaks] **Advancement** - Updated description.
- Fixed missing translations for sqrrk:squirking_damage damage type (Thank you @NFM417!)
- + other unrecorded changes (if any)

Patch 1:
- **Ziwolfdon (Dragon-Wolf) Pooltoy Blueprint** - Made accessible in Crate Drop loot.
- **2 Pooltoy Blueprints** - Made accessible in Vinylsmith villager trades.

Rarity: **SPECIAL**

Recipe:
  - 64 Black PVC Sheets
  - 64 Black PVC Sheets
  - 64 Black PVC Sheets
  - 20 Green PVC Sheets
  - 16 Gray PVC Sheets
  - 12 Glow Ink Paste
  - 8 Air Valves
- **Item Tags** - Added 2 item tags:
  - "sqrrk:pvc_items" - All PVC Sheets.
  - "sqrrk:pooltoy_repair_items" - Items used to repair Pooltoys. Includes transparent, black, and white PVC Sheets.
- **Entity Tags** - Added 1 entity tag:
  - "sqrrk:non_dragon_toys" - All Pooltoys that will not reward the [Dragonmount] advancement when ridden.
- **Pooltoy Scrapper** - A simple block useful for scrapping Pooltoys. Suggested by @FermiParadoxic on Twitter (X).

Changes:

Release:
- **Clay (MudWing Dragon) Pooltoy** - Now fire-resistant as an item.

- **"PooltoyPunctureCheck" Procedure** - Updated somehow.
- **Vinyl Repurposer, Vinyl Painter, Pooltoy Printer** - Now accept any PVC color in their crafting recipes.
- [SQRRK!] **Advancement** - Now rewards the player with knowledge of the Glow Ink Paste crafting recipe.
- [Of All Things] **Advancement** - Optimized.
- **Sleeping** - Players now have a 1/200 chance to obtain an Arya (Dragon) Pooltoy when waking up.
- **Vinyl Painter** - Can now recolor any color of PVC to any other color. Recoloring PVC to the same color as before is possible and not a bug.
- **Pooltoy Printer** - Updated rarity from **RARE** to **EPIC**.
- Fixed bugs :3

Patch 1:
- Fixed one tiny little bug

Additions:

- **Pooltoys** - Added 3 Pooltoys:
  - Starflight (NightWing Dragon), recipe:
    - 45 Gray PVC Sheets
    - 2 White PVC Sheets
    - 1 Cyan PVC Sheet
    - 7 Air Valves
  - Turtle (SeaWing Dragon), recipe:
    - 39 Green PVC Sheet
    - 8 Cyan PVC Sheet
    - 1 Yellow PVC Sheet
    - 8 Glow Ink Paste
    - 7 Air Valves
  - Peril (SkyWing Dragon), recipe:
    - 46 Orange PVC Sheets
    - 4 Black PVC Sheets
    - 1 Light Blue PVC Sheet
    - 1 Blue PVC Sheet
    - 1 Glow Ink Paste
    - 7 Air Valves
      All Pooltoys added in 1.7.0 are of characters

owned by @tuisutherland on Instagram. All Pooltoys added in this version have the **DIVINE** *rarity.*

- **Transparent PVC Sheet** - See-through version of regular PVC Sheets. Uncommon rarity item. Craftable in Vinyl Printer:
    - 1 White PVC Sheet
    - 1 Glow Ink Paste
- **Pooltoy Interactions** - Overhauled, adding three new types of interactions with Pooltoys. Default key to open the menu is Right Shift. Interacting with Pooltoys is still done with shift-right-click by default. Types of Pooltoy interactions:
    - **Turn To Player** - Original, pre-1.7.0 interaction. Forces the Pooltoy to face the player.
    - **Turn From Player** - Forces the Pooltoy to face away from the player.
    - **Carry** - Forces the Pooltoy to ride the player. You can evict Pooltoys riding you by crouching.
    - **Do Nothing** - Can be toggled by selecting your current interaction type again. Interacting with Pooltoys with this mode active only causes them to creak.
- **Advancements** - Added 1 advancement:
    - [Problem Solved!] - Repair a Pooltoy in a Pooltoy Printer using transparent PVC.
- **/ds Command** - Alias for /despawn command.

Changes:

- **Advancements** - Updated 2 advancements:
  - [Watch It!] - Updated description.
  - [Unstoppable Force] - Now comes after [Watch It!] in the advancement tree.
- **Pooltoys** - Can now be repaired in Pooltoy Printers using transparent PVC. Place the damaged Pooltoy in the Blueprint slot, 1 Transparent PVC Sheet in the Air Valves slot, and press the "Go" button.

Version 1.0.0
Mod loader: NeoForge for 1.20.6
Download:

https://drive.google.com/file/d/1b6KkI0vq9ATA_TNRdUKx9LjIdS2mtjJy/view

Additions:

- **Supply Crate** - Find these randomly in the world in Forest biomes,
  or have a 2% chance to receive eight of them when you respawn!
  They give loot such as PVC Sheets, Blueprints, and maybe even Crowbars, if you're lucky!
- **Vinyl Repurposer** - Don't need a Music Disc? Turn it into a white PVC Sheet!
- **Vinyl Painter** - Turn bland white PVC into its colorful variants!
  Unless you need white PVC specifically, of course.
- **Pooltoy Printer** - This block can craft the elusive Pooltoy items, with Blueprints providing the recipes!
  It also gives Villagers a new job - the Vinylsmith!
- **PVC Sheet** - The stuff Pooltoys are made of. It comes in all 16 colors!
- **Air Valve** - What else could you use to store Pooltoys safely? Don't worry about inflating Pooltoys,
  the Pooltoy Printer handles that for you.
- **Blueprint** - The very instructions for Pooltoy crafting.
- **Crowbar** - Breaks Supply Crates very easily. But it also breaks Pooltoys just as efficiently.
- **Pooltoy** - The main element of the mod! Each Pooltoy variant comes in shiny and matte skins!

Even if some Pooltoys do not have shiny/matte variants in real life...
