

## **Baker Laundry Pilot Funding Request - GBM 02122026**

### **Category of Funding?**

Category 3: Non-Event Funding

### **How much are you requesting from DormCon?**

~~\$6,031.08~~ \$1,507.77

### **Who is sponsoring the request?**

Baker House

### **How does your funding request involve dorm culture?**

In my extremely professional opinion dorm culture is always greatly improved when everyone smells like they have done their laundry within the past couple of weeks, and nobody is re-wearing their underwear.

Currently doing laundry is a very expensive process if residents are doing it as often as they probably should be. As I have learned over the past three years \$1.25 can really add up over time. This funding would remove financial barriers for our residents surrounding doing laundry and encourage everyone to stay clean, hygienic, and healthy.

Dorm culture is also improved when the laundry machines are not constantly breaking down and forcing students to wait forever for just a couple of machines to open up. Most of the time these break downs happen when they are overfilled by students trying to save money and forcing two or three loads worth of clothes into one machine. This funding would remove the financial incentive to overfill the machines and lead to fewer breakdowns and more available machines in the long term.

Funding this semester of free laundry will also allow housing and residential services to have more data to go off of when deciding on the possibility of an all-dorm laundry pilot.
