

Niyyah AI ("the app") is built privacy-first. Almost everything happens on your device, and we do not require an account.

WHAT STAYS ON YOUR DEVICE (never leaves it)

- Camera photos. The "prove you're up" and prayer-confirmation checks run entirely on-device using Apple's Vision and Core ML. Photos are analyzed locally and are never uploaded, stored on a server, or shared.
- Location. Used only to calculate prayer times for your city. It is processed on-device and is not transmitted to us or third parties.
- Blocked-apps selection & Screen Time data. Managed by Apple's Family Controls framework. We cannot see which specific apps you choose or read any of their content — we only apply and lift the block.
- Prayer records, settings, and schedules — stored locally on your device.

WHAT WE COLLECT

- Anonymous usage analytics. We use TelemetryDeck to understand how the app is used (e.g. app launched, prayer confirmed, alarm enabled). Events are tied to a random, salted, anonymized identifier that cannot be traced back to you, your Apple ID, or your device identity. No content, photos, or location are included.
- Purchase data. Subscriptions are processed by Apple and managed through RevenueCat to unlock premium features and restore purchases. This is tied to an anonymous app user ID, not to your name or email.

WHAT WE DO NOT DO

- We do not collect your name, email, phone number, or contacts.
- We do not sell or share your data with advertisers.
- We do not track you across other apps or websites.

CHILDREN

The app is not directed at children under 13 and does not knowingly collect personal data from them.

DATA RETENTION & YOUR RIGHTS

On-device data is removed when you delete the app. Analytics are anonymous and cannot be linked to an individual. Purchase history is retained by Apple and RevenueCat per their policies.

THIRD-PARTY SERVICES

- Apple (App Store, StoreKit, Family Controls) — apple.com/legal/privacy
- RevenueCat — revenuecat.com/privacy
- TelemetryDeck — telemetrydeck.com/privacy
