## VISUAL ART CLASSES

### Foundations of Art, Freeport High School

2020-2021

In Foundations we did a variety of projects with different materials to learn how to make different forms of art and what suited us best. This included charcoal drawing, painting, clay, sgraffito, and more.

### 2D Design, Freeport High School

2022

In 2D design we were given specific mediums to work with like oil pastels and Photoshop, but were also given the opportunity to work with whatever 2D medium we wanted for most projects.

### 3D Design, Freeport High School

2023

In 3D design we worked with paper, clay, and materials of our choice. Two assignments that stood out in particular are how we made both a clay tile and animal and then did sgraffito on them.

### Advanced/AP Art and Design, Freeport High School

2023-2024

In AP Art and Design we individually focused on a sustained investigation for the majority of the year that would then be submitted for the AP exam. We also dedicated time to create art for a few different competitions including the Duck Stamp, Donate Life, Tidal Shift, and Arrive Alive.

## DESCRIPTION OF INSPIRATION

**Space** — *Everything from stars to sci-fi I've been inspired to make work that is out of this world. My sustained investigation revolves around an alien abduction.*

**Robots** — *Using both 2D and 3D materials I have drawn and made sculptures of robots or robotic parts. This connects partly to my sci-fi inspiration.*

## MATERIAL FOCUS

I've mostly focused on 2D art, most sketching is done traditionally with pencil on paper. When continuing with traditional art I often use alcohol markers, sometimes I paint and collage as well.

Most of my art is done digitally on a drawing program like Procreate.

## AWARDS

### STATE AWARDS

Junior Duck Stamp-  
Honorable mention

Scholastics Honorable  
Mention - Paper Me, Friends  
Forever, Birds of the Cosmos

## EXHIBITIONS

**Freeport Library — Snow  
Days print**

**Freeport High School—  
End of year exhibition,  
senior year portfolio**
