

**Grading for Semester 2** *(Note change from Semester 1 Grading):*

Your Unit Average for each of Units 4, 5 and 6 will be a weighted average according to the following:

- 20%- Quiz 1  
*(If you score below an 80% on Quiz 1, you can revise and bring your grade up to an 80%, just like before.)*
- 10%- Quiz 2 *(This will sometimes be a partner quiz, like before, and you will not have a chance to make revisions on this if you get a low score.)*
- 50%- Unit Test
- 15%- Delta Math and other submitted HW
- 5%- Class Participation (Potential scores: 95, 93, 90, 85, 80, 75, 65. One exception, if your average without participation is above a 95 and your class work and participation are strong, see below, I will raise your CP grade to match your average.)

Your Semester 2 grade will be the average of your Unit 4, 5 and 6 grades.

**Notes on Geometry Work:**

**Skills based problems on Delta Math.**

You will need to complete learning targets or skills to show basic understanding of the topics discussed. These will be completed on Delta Math. These are the skills that you should be proficient in at a minimum. There will be a set number of problems for each skill you will need to complete. You can also use the Delta Math solutions and videos to help you learn. You will have book homework as well.

***Advice:** Try not to leave this Delta Math work until the last minute, learning geometry is very cumulative, if you keep up practicing often, you will have a good base for building a strong understanding of new/future material.*

**Class Participation:** Each unit will include (or simply be) an assessment (or self-assessment) of your class participation for the unit. You may be asked to provide evidence that you are enriching the classroom with your questions, solutions, ideas, and/or support for your classmates; that you are an active listener; and that your behavior in general is evidence of your commitment to our WHS Core Values of:

- Academic Excellence
- Commitment to Community
- Respect for Human Differences
- Cooperative & Caring Relationships

**Unit Tests**

You will take an in class paper and pencil assessment at the end of each unit. You may use your Postulates and Theorems packet as a reference for these tests.

*Invest in learning daily! Make your classroom better, your classmates days better, your teachers days better. And do your best with the time you have, that's enough. Health and safety should be prioritized.*

**WHS Core Values**

*Academic Excellence---Commitment to Community---Respect for Human Differences  
Cooperative & Caring Relationships*
