

# Light Lyrics

## Inevitable

Inevitable, how inevitable

How patterns come around

How light comes before sound

Irreversible the rolling ball will fall

Inevitable impenetrable wall

Pray what can I do what can I do with you

But cut it from your hair

The lion in your stare

I love you like I do x 4

Inevitable how inevitable

Drawn towards your light your oh so holy tights

Your silken silver tongue

I'm face down I'm undone

January bind

Be resolute, be kind

Broken open

Open ocean holding all

We are all x 3

Broken open open motion

Holding all

We are whole x3

Centrifugal pull

The sea is never full

Don't tell me what I know we have to let this go

Just press me to the floor and kiss me just once more

I reach toward the sun x 2

My wings become undone

I reach toward x 3

---

## **Untrimmable Light**

I walk till I meet the sea

I was a bird until I was me

I was a bird, salty and free

The line it is blurred between the sky and the sea

The line it is blurred, between the bird and me

Where the sea meets the sky  
Where your opening hand reaches mine  
Will we entwine and be weathered by time  
Or witness our holy design  
The Untrimmable Light we enshrine

I'll walk till my wings return  
Feel the heat from the sand on my feet gently burn  
Hold me my love  
And help me discern  
My heart flies above while my head tries to learn.  
Hold me my love for this ground is not firm  
Hold me my love while I beat and I yearn  
For what was above  
To someday return  
And find I'm enough

Where the sea meets the sky  
Where your opening hand reaches mine  
Will we entwine and be weathered by time  
Or witness our holy design

The Untrimmable Light we enshrine

---

## **Butterfly**

You landed on my shoulder

Your wings were stuck

Humble monarch leaning

Into my touch

My breaking heart

Your shaking touch

When you fly across the trees

You remind me I can lean into this love is like mycelium

And I am just a part of it

And I am learning how to give

Porous body

Land I am ready

Softly behold me

Deeply embed bed me

You plant me deeply

Deep down in love

Deep down in love

Deep down in love

You landed on my shoulder

Your wings were stuck

Humble monarch leaning

Into my touch

My breaking heart

Your shaking touch

When you fly across the trees

You remind me I can lean into this love is like mycelium

And I am just a part of it

And I am learning how to give

Late night

Owl cry

Cut through the tangle of my mind

Moonshine

Hillside

I am the love I long to find

You plant me deeply

Deep down in love

Deep down in love

Deep down in love

---

## **Nothing Is Lost**

I am a planet I move round the sun

You are the moon we've been moving in circles so long

No nothing remains

But nothing is lost

All of the intricate beauty that falls with the frost

But nothing is lost

You sung like a sparrow

You light up the room

You spun me in circles till everything blurred except you

No nothing remains

But nothing is lost

All of the intricate beauty that falls with the frost

But nothing is lost

Just like a comet you burnt through my skies

Loved me so bright me burnt up before we'd learnt to fly

No nothing remains

But nothing is lost

All of the intricate beauty that falls with the frost

But nothing is lost

---

## **BTTFL**

There is a beauty

To the fading light

All that was bright my love

All that was bright

All that we are

---

## **Limerence**

I am wrapped in your wings

And the arms of our tree

You move like water inside of me

You dark hair is framed by the light through the tree

This feels holy

This feels holy

I am of the earth

I am of my birth

I am blood I am grit

With my thighs around your hips

I am the waves crashing cliffs

I am tectonic shifts

Soft as the dew I am falling

Two voices arise in the beating of wings

You move towards me like the coming of spring

1000 more voices rejoice as we sing

This feels holy

This feels holy

I am of the earth

I am of my birth

I am blood I am grit

With my thighs around your hips

I am the waves crashing cliffs

I am tectonic shifts

Soft as the dew I am falling

I am falling

Into widening rings

I'm losing my edge I am falling

Oh lord give me wings

I jumped off the edge

I'm transforming

I breaking apart

Atoms collide

Will you fall in

Two bodies breathing

Two bodies lie

As naked as children we look to the sky

How can a tender, fragile life

Hold what's holy

Hold me

We are holy

Hold me

We are holy

Hold me

---

## **Oshun**

Down by her water a shrine I adorn

Proffer my body though weary and worn

Her waters receive me again I'm reborn

Ide were were nita ochun

Ide were were

Ide were were nita ochun

Ide were were nita ya

Light is the line where her body meets mine

Kiss and caressing the land for all time

Envelop me into your formless design

Ide were were nita ochun

Ide were were

Ide were were nita ochun

Ide were were nita ya

---

## **The Moon**

The moon moves away at the speed that the ferritin forms at the end of your  
toes

My grandmothers grandmas were fishes

The ocean is all that she could ever know

Daughter of sea

Grandmother tell me

Did you long for the land

What old song drew you up from the deep

Where can we go?

Where could we go?

Fins into fingers we're scraping the sky as we go

Or is it all here after all

Or is it just here after all

Before the explosion that put into motion

The whole of whatever could be

All that there is, it existed at one single point, one singularity.

Our mum sung our songs, dad taught us we belong

As they named our whole world into form

We broke and remade them

Made pictures in autumn the leaves pressed and loosely stuck on

---

## **Sun to the Bird**

Somebody had painted the hospital benches

Colour against the colour of grey

You were inside and we were both waiting  
For doctors to tell you if you'd be ok

Come trouble teach me trust  
13 billion lightyears of dust  
Found a way to be us

In Harry's bed floating on oceans of codeine  
We could have stayed watching those coloured cartoons  
But pandora couldn't help it either  
Opening boxes is easy to do

God was alone when she sung the first word  
With a longing that calls the sun to the bird  
A morning that spilt into all we allowed  
I love you then and i love you now

Come trouble teach me trust  
13 billion lightyears of dust  
Won't end with us

---

## **Promise of Light**

Its quiet now your gone

I open the window at night to hear the wind through the trees

Before the winter came

You climbed all the way to the roof just to bring that bird down

Her feet had got bound up in plastic and aerial and she was hung upside  
down

She looked like Jesus Christ

With her wings open wide and still

As the morning we rise

Plastic bind did we die for her sins

As the new day begins and you reach for the sky

In the promise of light

We all find a way

In the heart of the night is the start of the day

I can't find the words to forgive you and stay

But the truth is my love you still shine

And my heart is a crack you still shine though

The winter lost her bite

And snowdrops are lining the path like the light round a cloud

Hope, rejoice the sound

The ground reaching up to the light in the white of her wings

When I heard the bird sing and knew you were gone

We broke into spring

In the promise of light

We all find a way

In the heart of the night is the start of the day

I can't find the words to forgive you and stay

But the truth is my love you still shine

And my heart is a crack you still shine though
