<u>Introduction</u> -grabbing lead -state main idea & preview structures	WOW!!!!!! It's a giant Elephant blowing water out of its trunk. The asian elephant can grow up to 8 /13 ft the trunk itself is 7 feet the elephant is the biggest land animal on earth. Emagen only eats trees and leaves. The elephant is a fantastic special animal and has many physical features that help this animal survive in its environment.
<u>Body Paragraph</u> -main idea sentence -structure and how it functions -explain/site -structure and how it functions -explain/site -structure and how it functions -explain/site	The Asian elephant's trunk helps them eat and it lifts up to 500 pounds. It has a little pincher on the end of the trunk that helps them pick up things on the ground like food. The pincher is important to the animal by picking up small things .The special animal has big teeth that weigh up to 11 pounds . The teeth get dull and new teeth come in so it can eat the trees and sticks.ther big strong legs help hold that big heavy body thay can run 25 mph now that's fast.The big animal has a weird diet it eats trees and sticks. they it whatever they fined on the ground like mushrooms
<u>Conclusion</u> -restate main idea and -wrap it up	It's amazing to think that the animal is so big and still so fantastic. Maybe an elephant can pick up a person with their trunk?
