DPI Web Content and Mobile Apps Inventory

This document is designed as an optional support tool to help DPI teams identify and inventory various types of digital content created/procured, offering a non-exhaustive list of content categories to consider as teams assess the current landscape of digital resources.

Web pages

Web page	URL	Content admin/manager(s)	Content types

Digital content	URL	Content admin/manager(s)	Notes

Accessibility commitment

This resource was designed with accessibility in mind:

- High color contrast
- Readable font
- Use of heading styles
- Consistent formatting
- Tables with tagged header row/column and simple structure
- Descriptive link text
- Bulleted lists
- Use of plain language
- Checked for accessibility using Grackle Docs and manual check
