

Hello Drs Ivan and Sabrina Sanchez,

I will cut to the chase. I visited your website and I must tell you I'm a huge fan of your profession. Helping people after many years of discomfort and pain while paying much less compared to traditional medical help - it really is inspirational.

With that being said, I want to help you scale your business for further growth or expansion. You might be asking yourself, how could I do that?

I am a copywriter and a strategic partner for businesses, which are trying to increase their social media presence which results in bigger traffic on their site and new potential clients. I am a co-owner of a successful marketing agency.

I noticed you have taken some steps in the advertising field yourself, running your own Instagram and Facebook page. Yet, from what I have seen on your page, in the Meet the Team section, your amazing team is focused on helping others and pursuing their passions in their free time.

That is where I come in. As a remote addition to your Team, my goal would be boosting your presence on social media across all platforms in order to drive more traffic and draw new potential clients to your page.

Opportunities are many, for growth and expansion of your business to a scale 10x at which it is now.

Let me give you a quick insight on what I could do for you, I am sure that will persuade you:

- Facebook ads scripts which will bring more potential clients
- Instagram posts scripts which will grow your social media
- Instagram Reels scripts which will gain popularity of your account
- Tiktok scripts in order to grow your business on every social media platform
- A newsletter containing informational content as well as special offers from your business

As I said, there are many opportunities, which can help you develop as a people and help grow your business. With my experience in the marketing field, your growth is more than certain.

Text me back, so we can discuss further what can I do for your business and how our partnership would look like.

Thank you for your time,
Wojtek
