**Biography:**

Maxis Wellington was born on July 11th, 1988 in the coastal city of [REDACTED], Florida. Growing up near the ocean, he developed a calm demeanor, shaped by both the beauty and unpredictability of the environment around him. His early life was unremarkable – until a wrongful accusation turned his world upside down. At the age of 31, Maxis found himself in a high security prison serving time for a crime he did not commit.

During his incarceration Maxis was approached by representatives of an organization he had never heard of the S.C.P. Foundation. They offered him a choice.. Remain behind bars and fade into obscurity, or sign a contract and begin a new life in service to something far greater than himself. He accepted without hesitation. Shortly after, he was quietly removed from prison records and transferred to **Site-43**, where he began his new career as a General Security Officer.

For nearly two years, Maxis worked diligently, learning the inner workings of the Foundation and earning the respect of his peers. But on February 3rd, [REDACTED], his life changed again. Assigned to escort a Senior Researcher through the Heavy Containment Checkpoint he suddenly found himself in the middle of a Code - 1 lockdown. Chaos Insurgency operatives had infiltrated the site. In the ambush, the Senior Researcher and the MTF E-11 Operative were killed, and Maxis was gravely injured.

During his recovery in the **Site-43** Medical Wing, Maxis passed a recruitment poster that read: "*Join the Department of External Affairs and keep the Chaos out of here!*". He realized that preventing external threats before they reached Foundation walls was his true position. He applied for the DEA, passed the tryouts, and soon found himself transferred to **Site-65** to meet the growing challenges posed by Groups of Interest.

At **Site-65** Maxis excelled. From leading raids against hostile GOI's to negotiating high stakes agreements and training new agents. These accomplishments earned him the rank of Senior Agent, To Special Agent and eventually, Department Manager.

Maxis seeks the position of Director of External Affairs not for prestige, but to build a department so resilient that no breach, no GOI, and no political maneuvering could ever cripple it.
