Bet9ja App for Android and iOS 2025

Bet9ja has become a household name in Nigeria since its launch in 2013 by Kunle Soname. For me, the Bet9ja app has always been a superb option for sports betting and casino games, particularly since it is compatible with both iOS and Android devices.

The app looks just like the website, so it feels familiar to any regular punter. Features such as the multiple bet builder, which auto-generates a bet slip, the built-in virtual bank, HD live streaming, and access to over 400 pre-match markets have made using the app a great experience for me. I didn't get the standard sportsbook welcome bonus, but I do get an app-only weekly 30% cash back bonus every Friday. That's in addition to the 10 other bonuses and promos already available.

In this review, I walk through how to download the Bet9ja app, highlight its key features, and share my honest experience using it.

Bet9ja App Download Requirements

	Android	iOS
App Size	26.55 MB	74.1 MB
Latest Version	v 1.6.4	v 1.6.4
Storage Space Needed	Not specified	Not specified
Operating System Compatibility	Android 8.0 (Oreo) and later.	• iOS 14.0 or later • iPadOS 14.0 or later
Device Compatibility	Not specified	iPhone 6s and newer models.

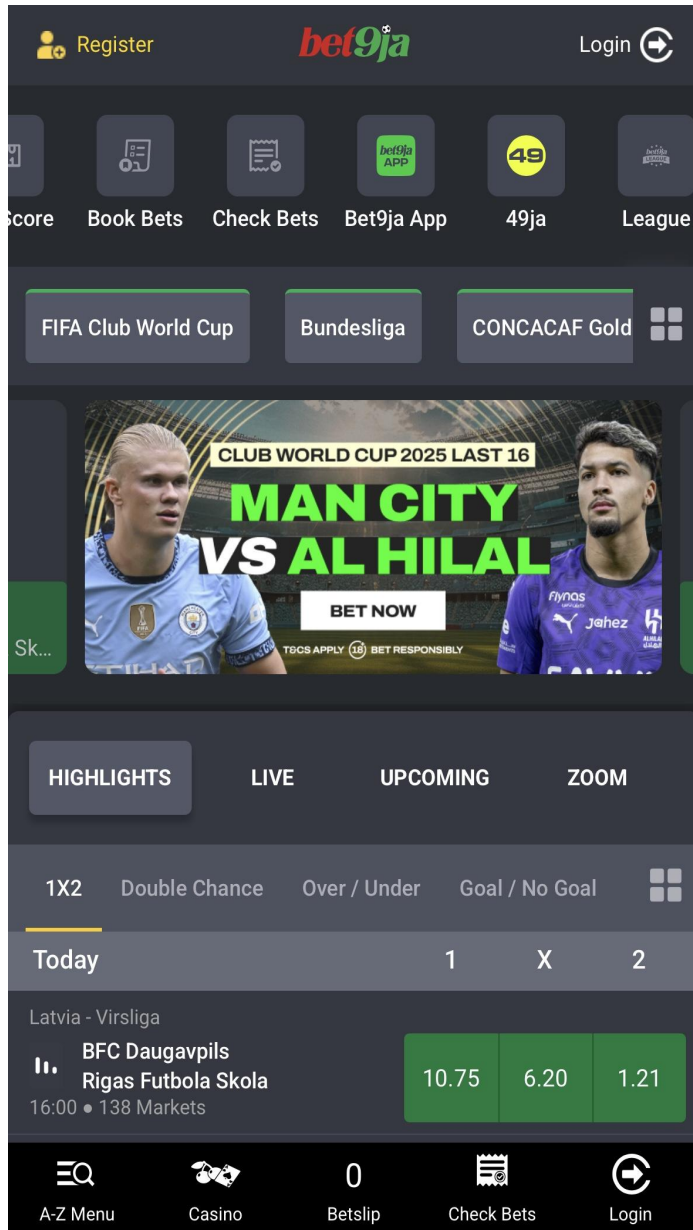

How to Download Bet9ja APK for Android

I visited the official website but was redirected to the Google Play Store, where I was able to download and install the app. The app is just 26.55 MB in size, and it took less than a minute to install. The Bet9ja app download requires Android 8.0 (Oreo) or later versions to work.

Download the Bet9ja app for Android as follows:

From Google Play Store:

- On my Android browser, I visited the official Bet9ja website at <https://www.bet9ja.com>.

- From the homepage, I scrolled through the options stacked at the top menu and clicked on "BET9JA APP." Here, I can download the Bet9ja app directly from the Google Play Store or download the Bet9ja APK file and install it.

Download Bet9ja App for Android

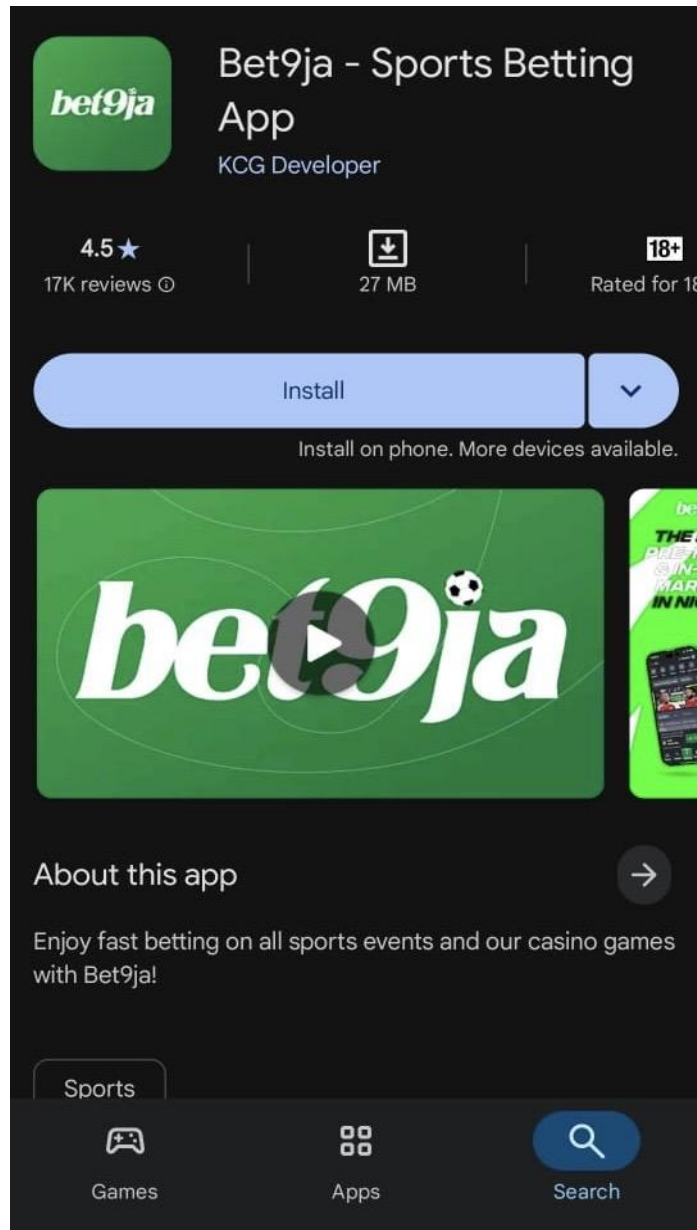

Enjoy the best gaming experience with our App!

Can't access to Google Play Store?

[Click Here](#)

- To download via Google Play Store, I simply tapped "Get it on Google Play."

- This redirected me to the Google Play Store, where I clicked the "Install" button to download and install the Bet9ja APK automatically.

Directly from Bet9ja:

THE MOST PRE-MATCH & IN-PLAY MARKETS IN NIGERIA

 **DOWNLOAD OUR APK**

1. Click the links below to download the APK

2. Open the file

3. Enable the Bet9ja source in the smartphone settings

4. Install Bet9ja app

Available for
Android

- I also downloaded the app by scrolling down the download landing page and clicking on "AVAILABLE FOR ANDROID." However, for this option, you must allow app installation from "Unknown Sources" on your phone. This gives your phone permission to install apps from sources other than the Google Play Store.
- All I had to do was go to Settings > Security. Then, I enabled "Unknown Source."
- Once the Bet9ja app has been downloaded, open the app from your download folder and click on INSTALL, and you're done.

Pro Tips for Downloading Bet9ja APK

- Always download only from the official Bet9ja website to avoid inadvertently installing malicious software on your phone.
- Ensure your Android version is compatible with the OS requirements.
- Ensure you have sufficient space for the installation.
- Reinstall with the latest versions to ensure you're always running the most secure and stable version of the Bet9ja app. From personal experience, betting platforms regularly push updates to fix bugs and tighten app security. In fact, I've seen performance improvements and new features roll out with each new version. The latest update of Bet9ja's app featured odds animation, accurate deep linking, a cleaner design, and easier navigation.

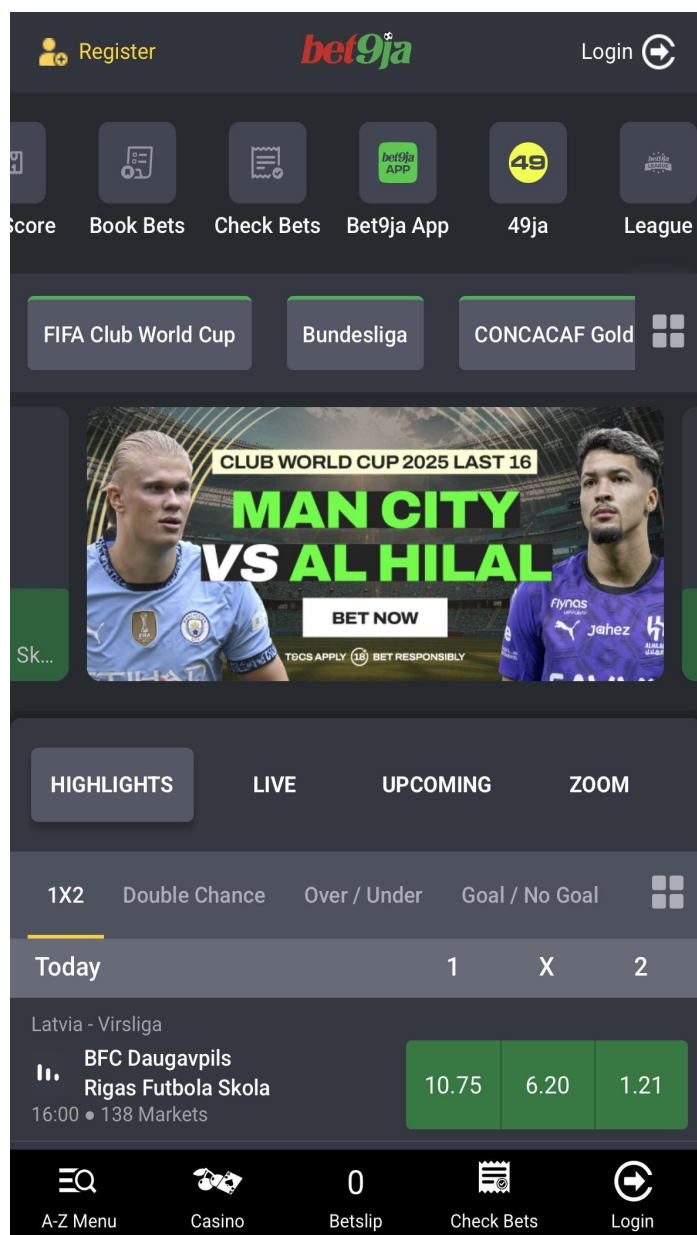

How to Download the Bet9ja Mobile App on iOS

Downloading the new mobile Bet9ja app on iOS devices is just as straightforward as the Android version. Even though the Bet9ja iOS app size is slightly larger at 74.1 MB, I was able to complete the installation within a minute.

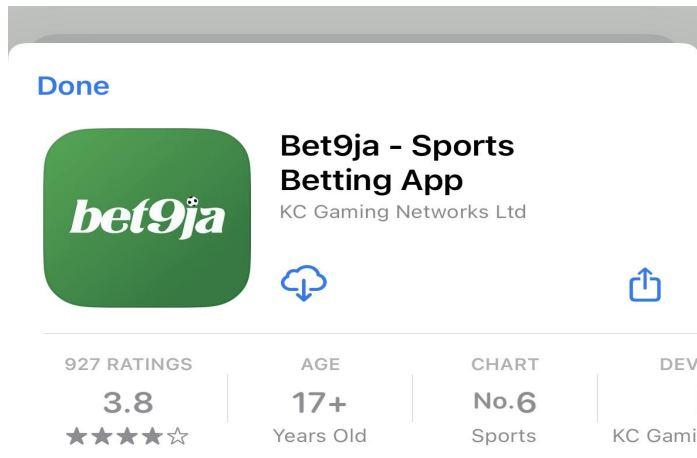

Another thing I love about the app is its basic requirements. As long as your iOS device runs on iOS 14 or later (iPhone 6s or newer models), you're good to go.

The Bet9ja app landing page redirected me to the App Store, where I completed the download by tapping "GET". Here is a step-by-step guide:

- Visit the official Bet9ja website on your web browser.

- Scroll through the options in the top menu and click on BET9JA APP. This should redirect you to the official Bet9ja app on the App Store.

Preview

- Then tap GET to start downloading. Verify the download by confirming your Apple ID with Face ID or Touch ID or by entering your Apple ID password. Within a minute, the app appeared on my home screen.

Top Betting Features of the Bet9ja App

The Bet9ja app excels in functionality and in-app features tailored for betting. It loads fast, and the neatly arranged buttons make navigating the app really easy.

Below are the top 5 features of the Bet9ja app that I find impressive:

Feature	Description	Reason to love this feature
Multiple Builder	An AI-driven tool that automatically helps me build a ticket based on odds and payout.	• The tools have saved me hours of endlessly scrolling through hundreds of games. • I can control the "odds limit" and even the "maximum win limit." • Excellent for new punters.
HD Live Streaming	Allows sports fans to watch their favorite matches live.	• It covers more matches than other Nigerian betting platforms, including popular leagues like the EPL and lesser-known tourneys like the Brazilian Copa Paulista. • Available in HD resolution. • No blurry frames or buffering.
Biometric and PIN Login	The biometric and PIN login brings an upgrade to security and speed when accessing the app.	• Faster one-tap login. • More secure than constantly entering usernames and passwords during logins. • No more forgetting login details.
Trending Bet Suggestions	It shows what other punters are betting on.	• An excellent way to catch hot picks. • It saves time when creating a ticket.
Bet9ja Banking Wallet	The all-new Bet9ja wallet allows users to own a virtual NUBAN bank account for deposits and withdrawals, just like a traditional bank.	• Easier deposits and withdrawals • All transactions are in one place. • No long processes or third-party verification. • It is seamlessly integrated within the app—no need for third-party app download.

ADD TO BETSLIP

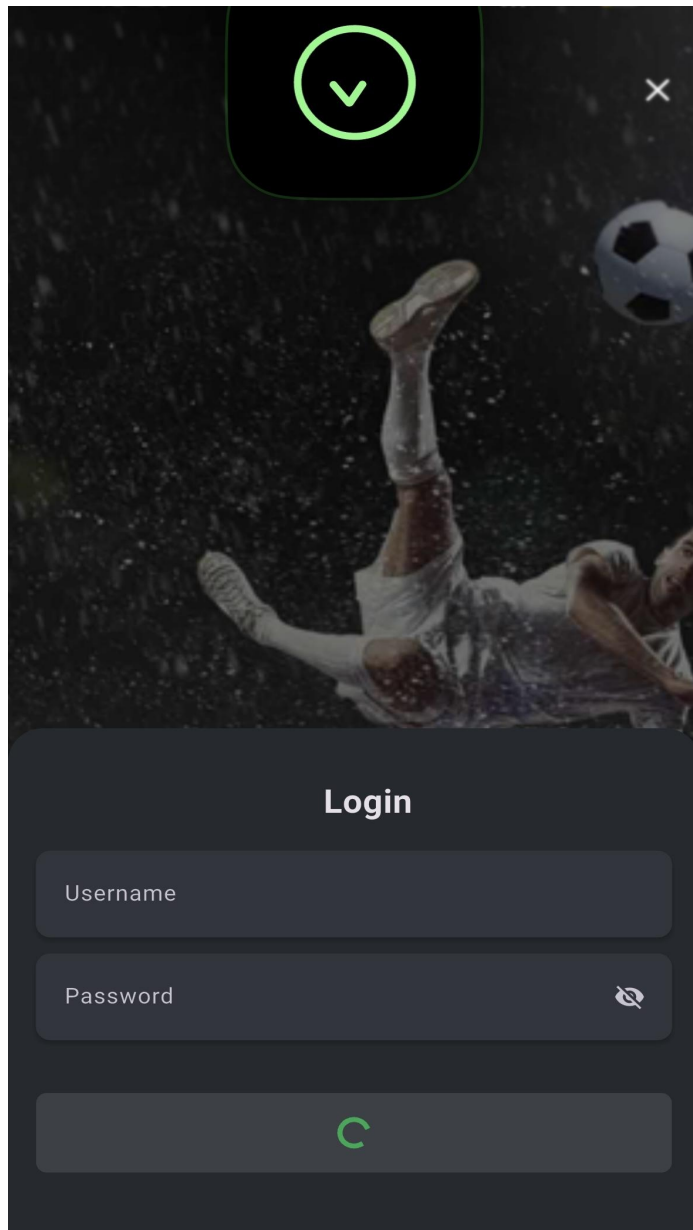

Bet9ja's Multiple Builder is a brilliant AI tool that has saved me hours when building a ticket. It's usually located at the top of the menu. With this feature, all I have to do is input the odds I'm comfortable with or the maximum winning amount I want, and the app will automatically select matches that fit my preferences. It's like having a virtual betting assistant. Additionally, it is significantly faster and more optimised within the app than on the web version.

HD Live Streaming

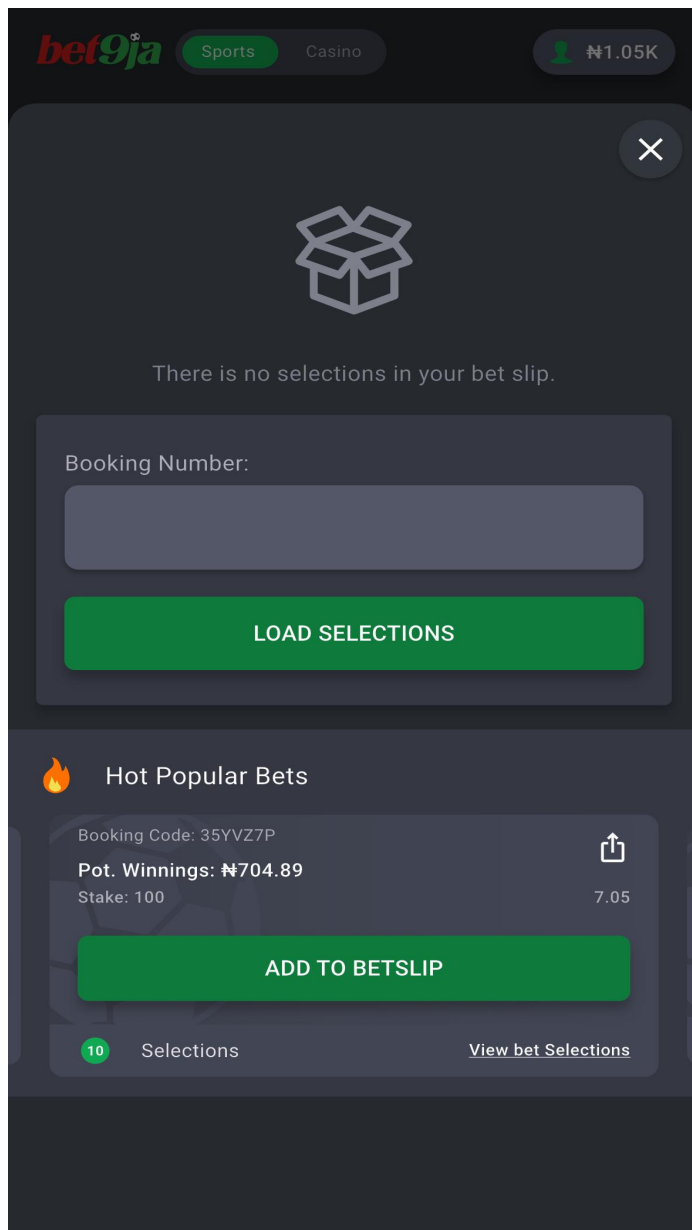

Bet9ja's HD Live Streaming is another top feature that exceeded my expectations. With just a ₦200 deposit, I can watch more matches here than on many other betting sites that offer live streaming, such as 22Bet. The best part about HD Livestreaming on the Bet9ja mobile app is the high-quality, no-buffering video.

Biometric and PIN Login

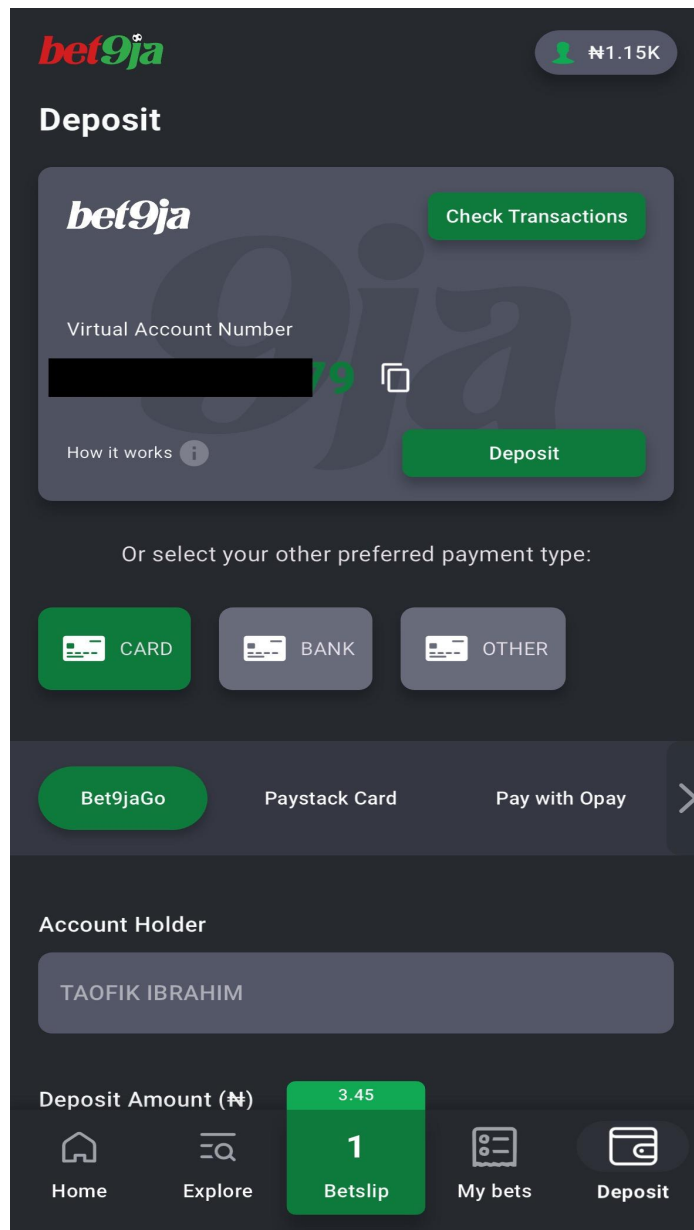

Another good feature of the Bet9ja app is its focus on security, with a one-tap biometric login. I can skip logging in with a username and password by simply unlocking the Bet9ja app with my Face ID or fingerprint in under a second. I can also set a four-digit PIN. This way, if I lose my phone, I feel secure knowing that nobody can gain unauthorised access to my Bet9ja account.

Hot Popular Bets Suggestion

This feature identifies hot picks and betting ideas based on what other bettors are doing. It provides me with insight into betting opportunities and trending bet ideas within the Bet9ja community.

Bet9ja Banking Wallet

This game-changing feature allows me to create a Bet9ja virtual bank account and make payments to it within seconds. I set mine up with just two clicks, and since then, I don't have to go through the usual long wallet top-ups or third-party payment networks like in other betting platforms.

Registering on the Bet9ja App

Registering on the Bet9ja mobile app is as simple too. You'll find the REGISTER button boldly situated at the top right corner of the homepage.

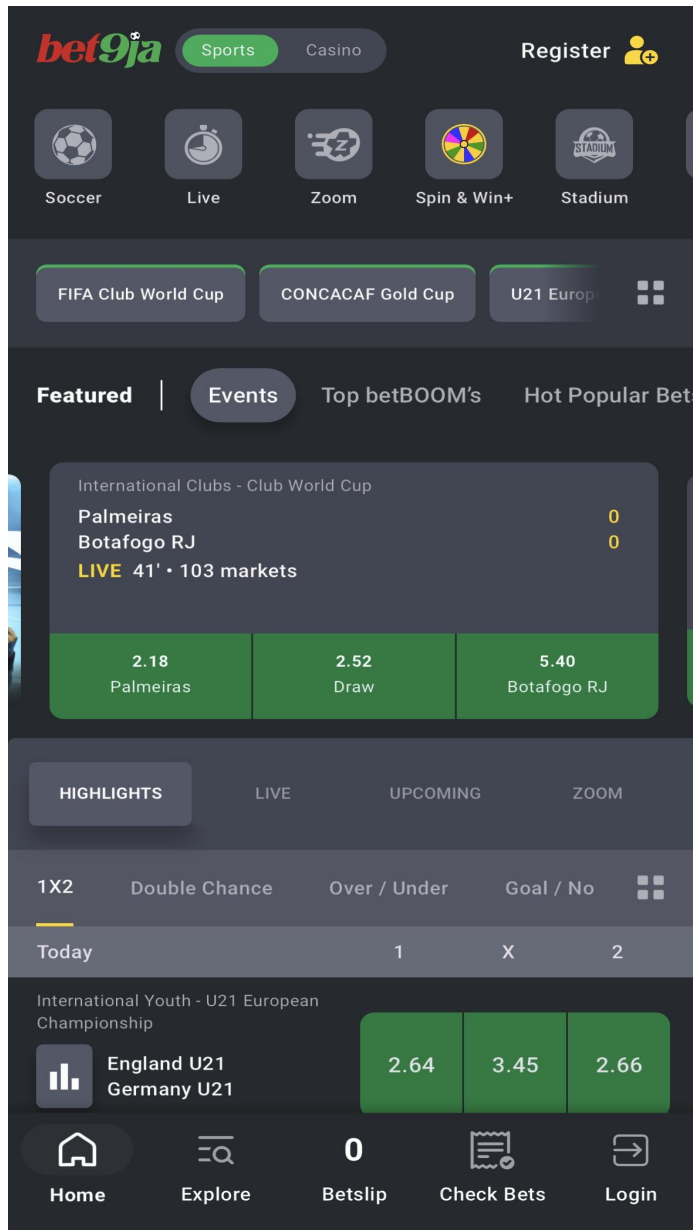

To get started, I had to enter my personal information, including my name, phone number and email address, in the provided fields.

However, it came as a surprise to see that such a reputable betting company had no quick signup process with Google, Apple ID or social media, as you'd find on the 1xBet app, for instance.

Nonetheless, I was able to create an account within 2 minutes.

Here's how to sign up on the Bet9ja mobile app:

- Open the Bet9ja app from your app menu on Android devices or home screen on iOS devices.
- From the top right corner of the homepage, click on REGISTER.

- On the registration page, input the required personal information, including your name, email address, and phone number.

CREATE AN ACCOUNT

Still having trouble? Please contact our [Customer Support](#)

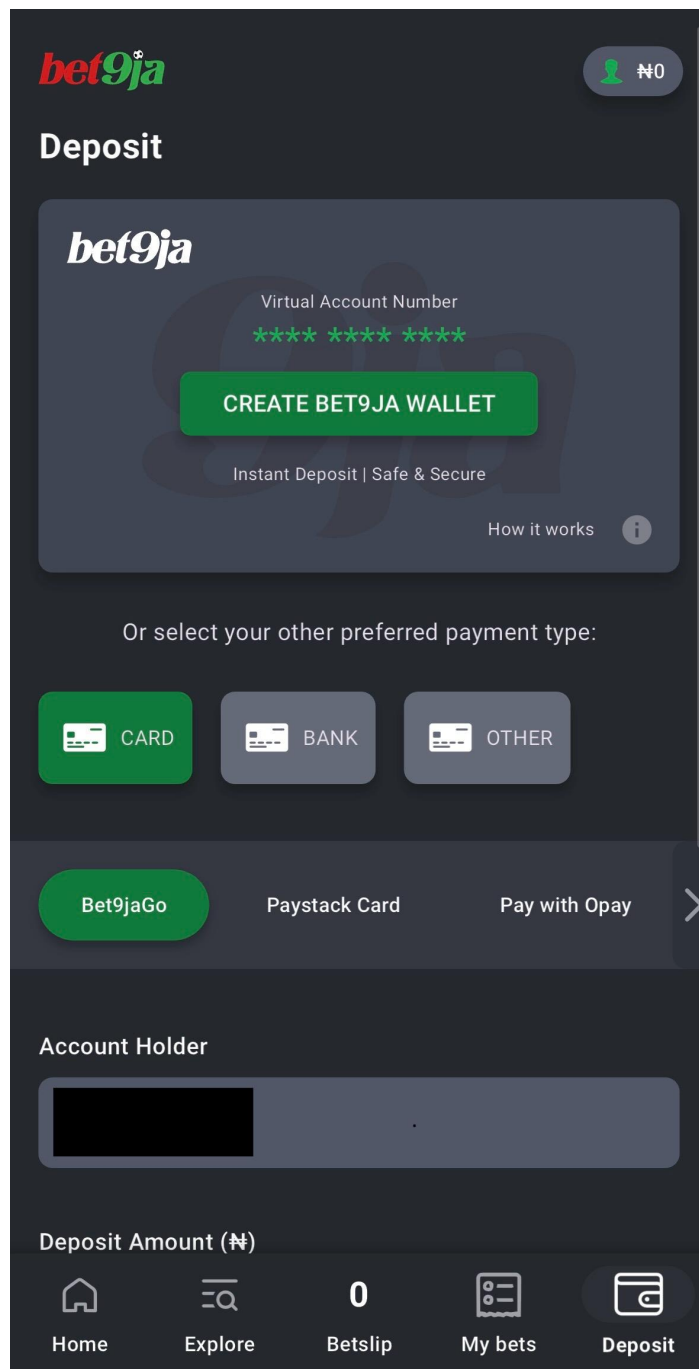

- A verification code will automatically be sent to you within 10 seconds. Input the code in the field provided on the verification page and click on CREATE AN ACCOUNT. That's it! Your Bet9ja App account is now active.

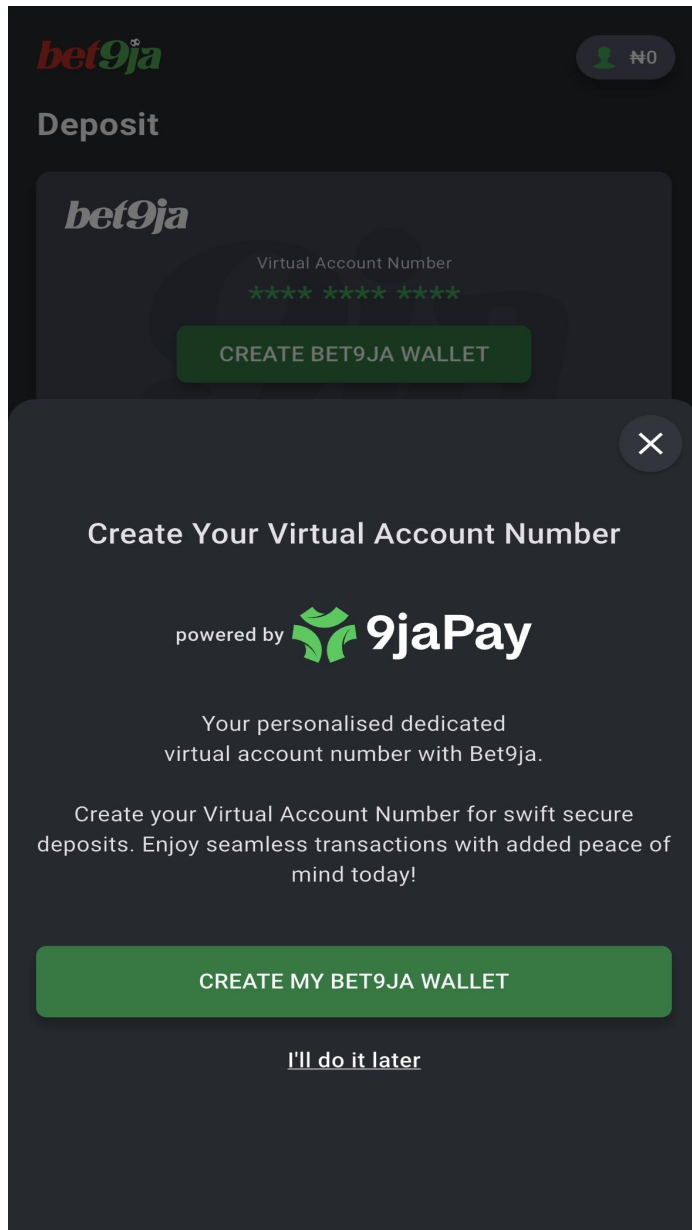

- Once you're in, you can deposit funds, play your favourite games and tweak security settings.

After creating an account, I created a new Bet9ja wallet to fund my account. For me, it's one of the fastest and simplest ways to get started with playing my favourite games. Here's how I did it:

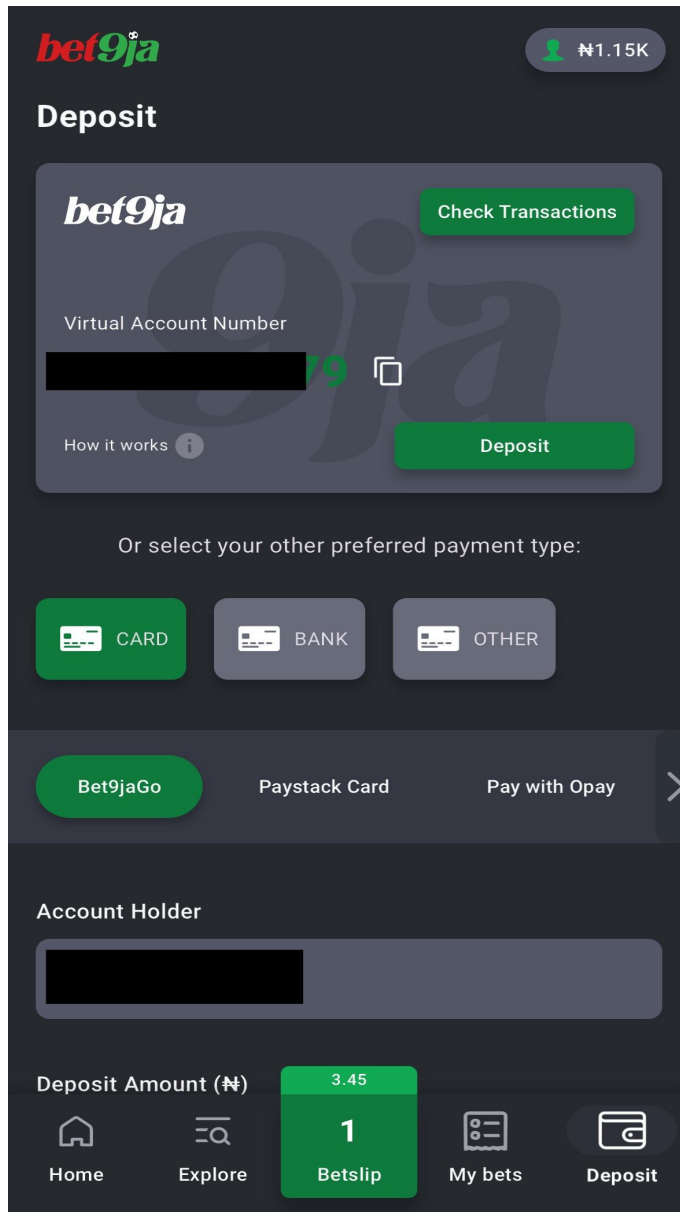

- From the bottom right corner, I click on DEPOSIT.

- On the deposit page, I had the option to create a Bet9ja wallet by tapping the green "CREATE BET9JA WALLET" button.

- A confirmation message popped up instantly, and I confirmed the action by tapping the green "CREATE MY BET9JA WALLET" button again, and that's all!
- Since the wallet is affiliated with the 9jaPay Micro Finance Bank, I only had to copy the 10-digit NUBAN number and make a transfer to the 9jaPay MFB.

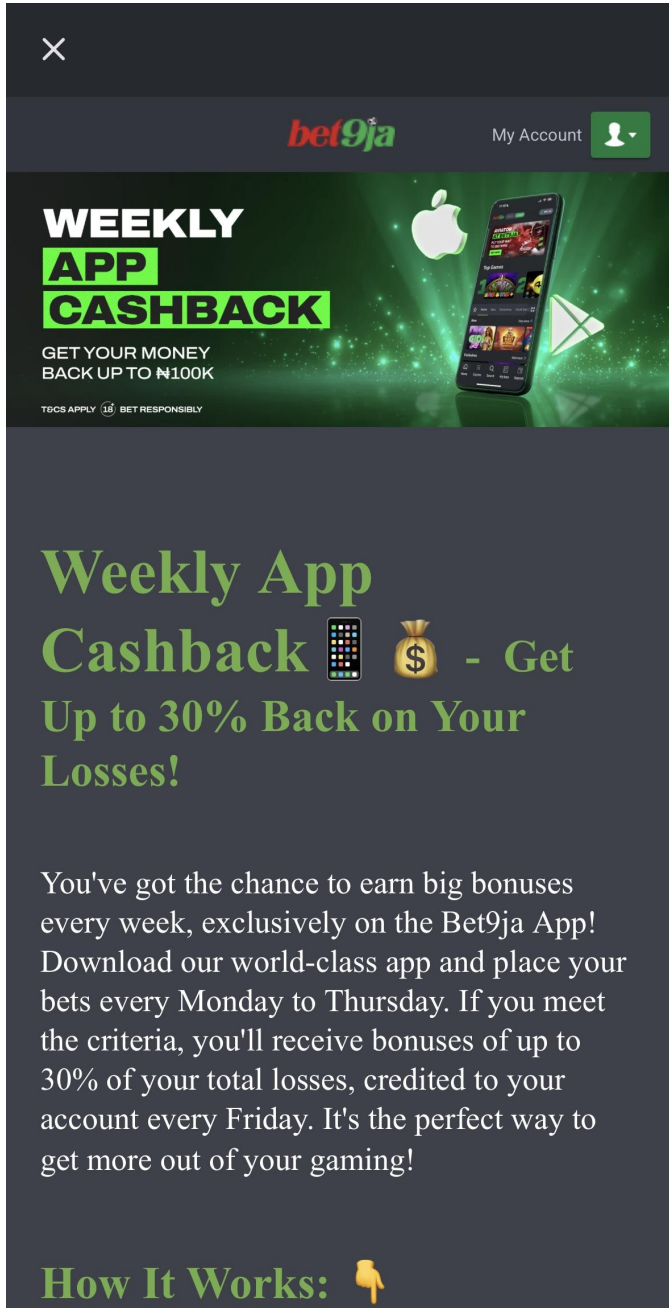

- The deposit was reflected instantly in my wallet.

Important Tips

- Bet9ja is only available to Nigerians aged 18 years and above.
- Only one Bet9ja account is allowed per user.
- Every Bet9ja user must complete their KYC verification before making a withdrawal. This is in compliance with the regulatory requirements of the Lagos State Lotteries and Gaming Authority (LSLGA) and the National Lottery Regulatory Commission (NLRC). Mine took about two hours to complete.

Bet9ja App Welcome Bonus

The image is a promotional banner for the Bet9ja app. At the top, there is a dark header with a white 'X' icon on the left, the 'bet9ja' logo in red and green in the center, and 'My Account' with a user icon on the right. Below the header, the main banner has a green background with a glowing effect. It features the text 'WEEKLY APP CASHBACK' in large, bold, white and green letters. Below this, it says 'GET YOUR MONEY BACK UP TO ₦100K' in smaller white text. To the right of the text is an image of a smartphone displaying the app interface, with a white envelope icon next to it. At the bottom of the banner, the text 'T&CS APPLY' and 'BET RESPONSIBLY' are visible. Below the banner, the text 'Weekly App Cashback' is written in large, bold, green letters, followed by a smartphone icon and a money bag icon. Below this, it says '- Get Up to 30% Back on Your Losses!' in green. Further down, there is a paragraph of text in white: 'You've got the chance to earn big bonuses every week, exclusively on the Bet9ja App! Download our world-class app and place your bets every Monday to Thursday. If you meet the criteria, you'll receive bonuses of up to 30% of your total losses, credited to your account every Friday. It's the perfect way to get more out of your gaming!'. At the bottom, the text 'How It Works:' is written in green, followed by a pointing hand icon.

WEEKLY APP CASHBACK

GET YOUR MONEY BACK UP TO ₦100K

T&CS APPLY BET RESPONSIBLY

Weekly App Cashback 📱💰 - Get Up to 30% Back on Your Losses!

You've got the chance to earn big bonuses every week, exclusively on the Bet9ja App! Download our world-class app and place your bets every Monday to Thursday. If you meet the criteria, you'll receive bonuses of up to 30% of your total losses, credited to your account every Friday. It's the perfect way to get more out of your gaming!

How It Works: 📌

After registering on the Bet9ja mobile app, I noticed that there was no signup, first deposit, or welcome bonus, unlike what new users typically receive on most Nigerian betting apps.

However, the sweet deal you get is the Weekly App Cashback, which is available exclusively on the Bet9ja app. The bonus offers up to 30% cashback on in-app losses incurred from Monday to Thursday. It's an insurance that all Bet9ja app users get a chance to win every Friday.

Here are the terms and conditions:

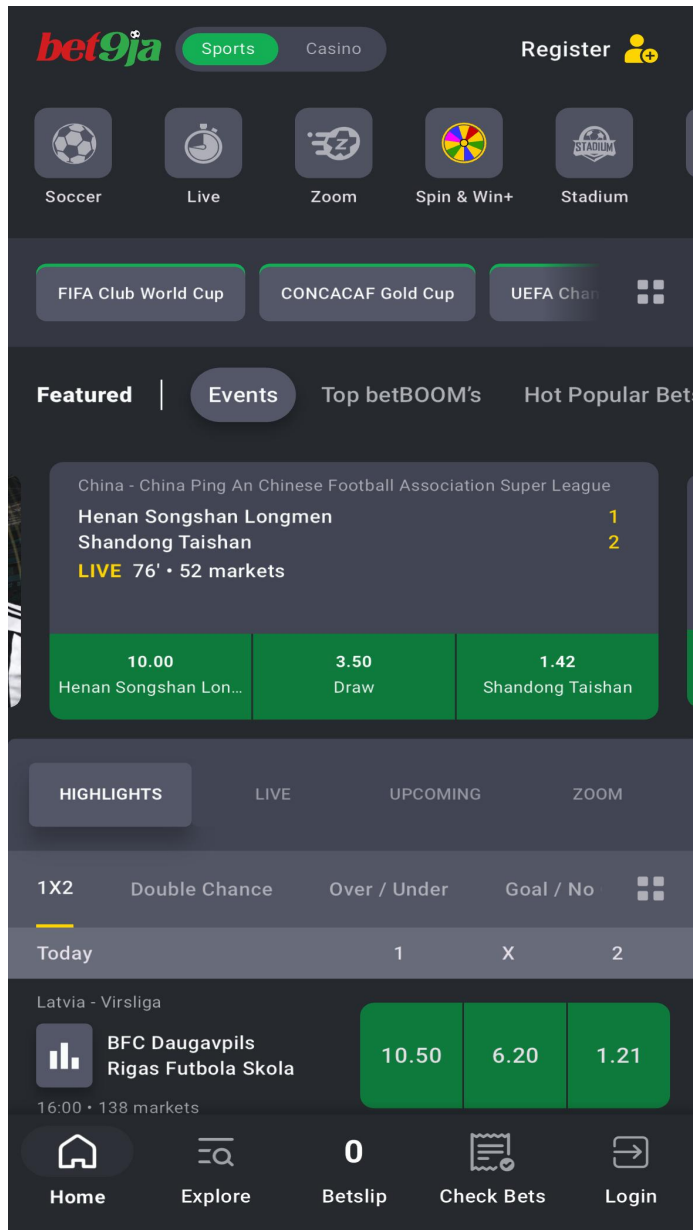

- Bets must be placed only on the Bet9ja app
- Both single and multiple bets qualify for the bonus. However, zoom bets are not eligible.
- The bonus awarded depends on losses. For instance:
 - If you lose between ~~₦~~2,000 and ~~₦~~4,999, you win back 10%.
 - If it goes up to ~~₦~~5,000 and ~~₦~~24,999, you get 15% cashback.
 - Losses between ~~₦~~25,000 and ~~₦~~99,999 attract 20% cashback.
 - However, if the loss exceeds ~~₦~~100,000, you can receive 30% cashback, up to a maximum of ~~₦~~100,000.
- Bonuses can only be used in the Bet9ja app and can be wagered only twice. Bonus winnings cannot exceed 3 times the bonus amount.
- Minimum odds: 3.0
- Validity: 3 days.

Bet9ja App Login

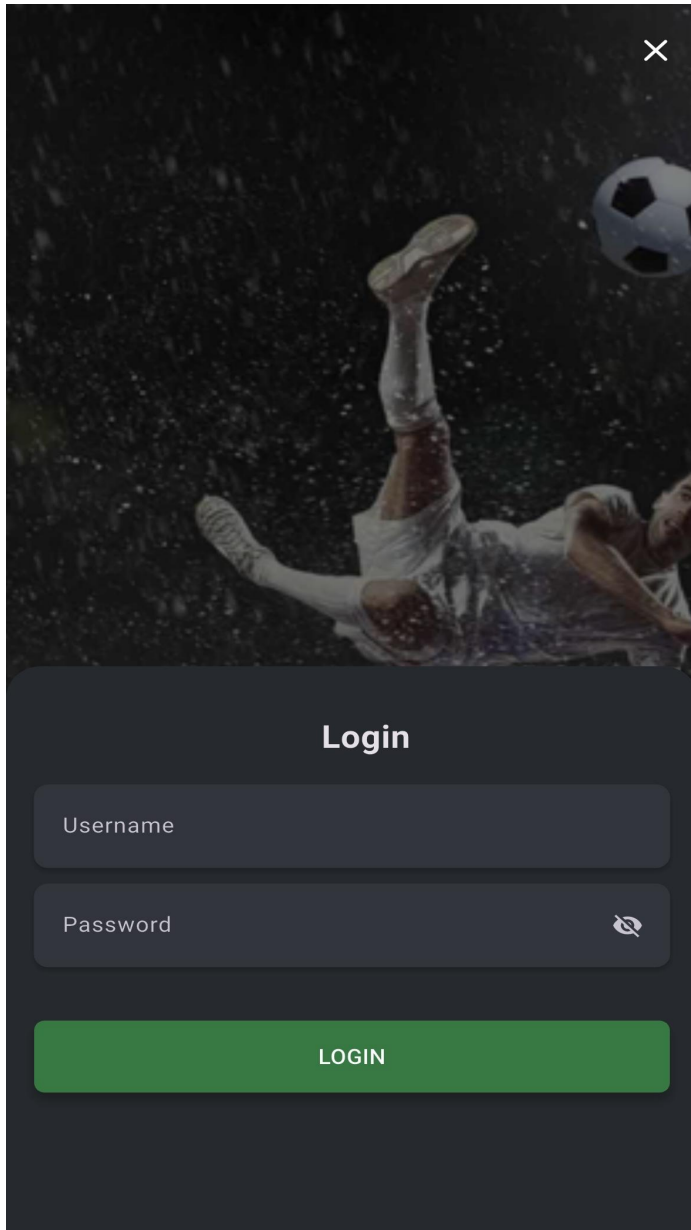

Another thing I appreciate about the Bet9ja app is its swift login process. I can always jump back into action by entering my username and password. For even faster access, I can use the biometric or PIN login options. All it takes is less than a second, and I'm in.

Here's how to log into your account via the Bet9ja app:

- Open your Bet9ja app from your app menu or home screen.

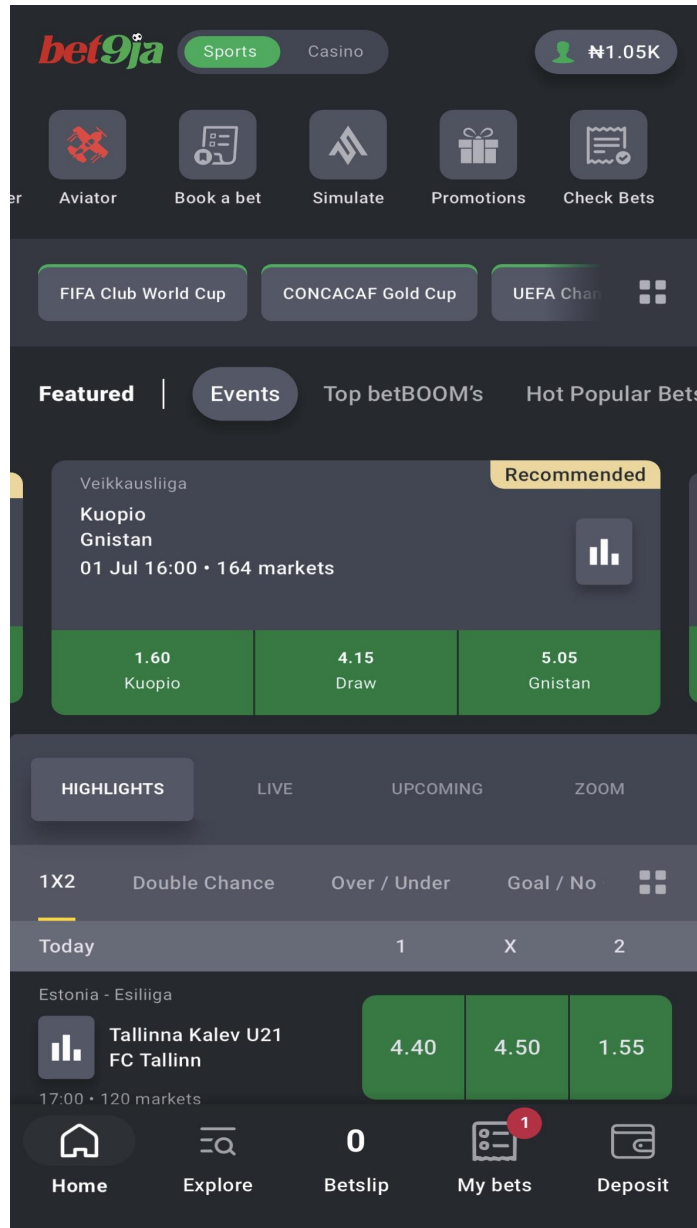

- The login screen automatically pops up. Alternatively, you can click on LOGIN from the bottom right corner of the Bet9ja app homepage.
- Input your username and password. Then tap the green LOGIN button, and voila—you're in!

- However, if you forget your password, you can always use the "FORGOT PASSWORD" option to verify your phone number and reset your password.

Sports Betting on the Bet9ja App

It is expected that a betting platform like Bet9ja will go far and beyond with its sports betting offerings. There are more than 24 sports, including football, basketball, tennis, baseball, boxing, and many more. Football fans have the option of almost 100 leagues to choose from.

I had the opportunity to bet on local leagues, such as the Nigerian Premier Football League and popular international leagues and competitions, including the FIFA Club World Cup, EPL, Bundesliga, La Liga, Eredivisie, and many more.

The diversity of the betting markets is another reason the Bet9ja mobile app has become my favourite betting app. There are 50,000+ football betting options daily and 100+ in-play markets for live matches.

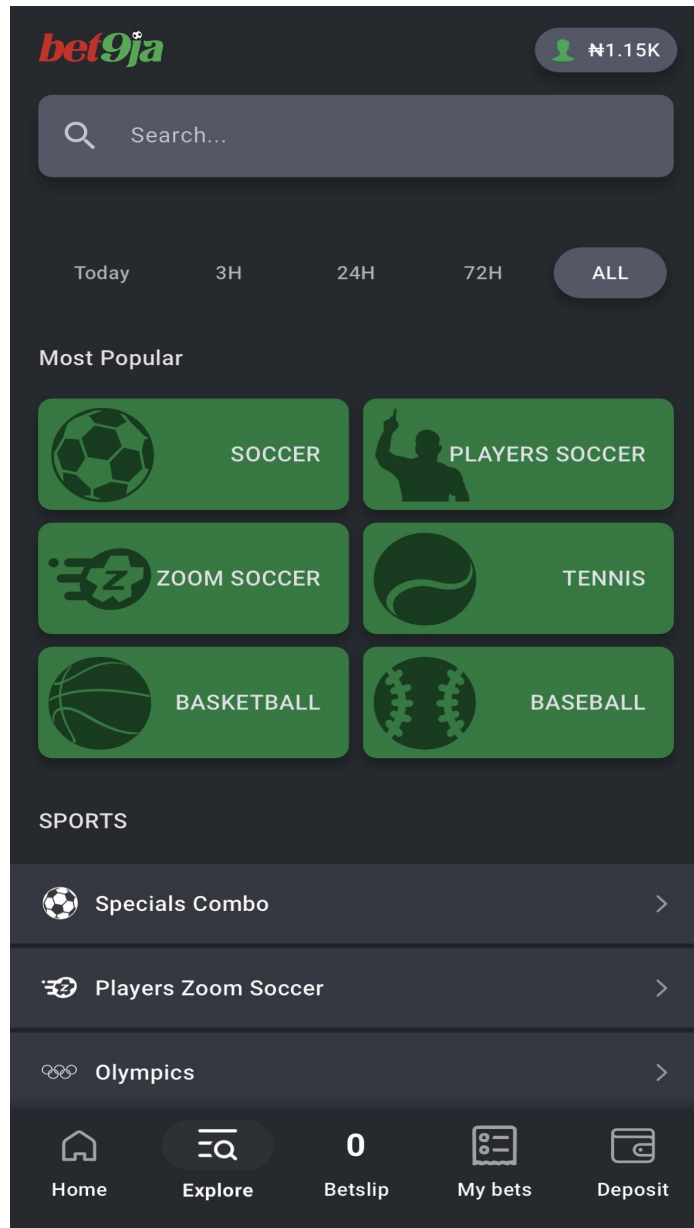

I've staked on markets like 1X2, Double Chance, Draw No Bet, Handicap, Goal/No Goal, Asian Handicap, Correct Score, and Player props markets on the Bet9ja app. The odds also compare favourably to other betting platforms. For instance, I've found odds of 1.03, 19, and 70 in the 1X2 market on the Bet9ja app, while other betting platforms, such as Betano and 1xBet, had odds of 1.03, 17, and 41, respectively, for the same events.

Apart from the competitive odds, the app's livestreaming and in-play features are outstanding. I can watch Serie A, Ligue 1, and La Liga matches on the go with the Ultra HD Livestreaming feature. For matches I couldn't watch live on the app, Bet9ja provides an interactive live match tracker and real-time stats updates.

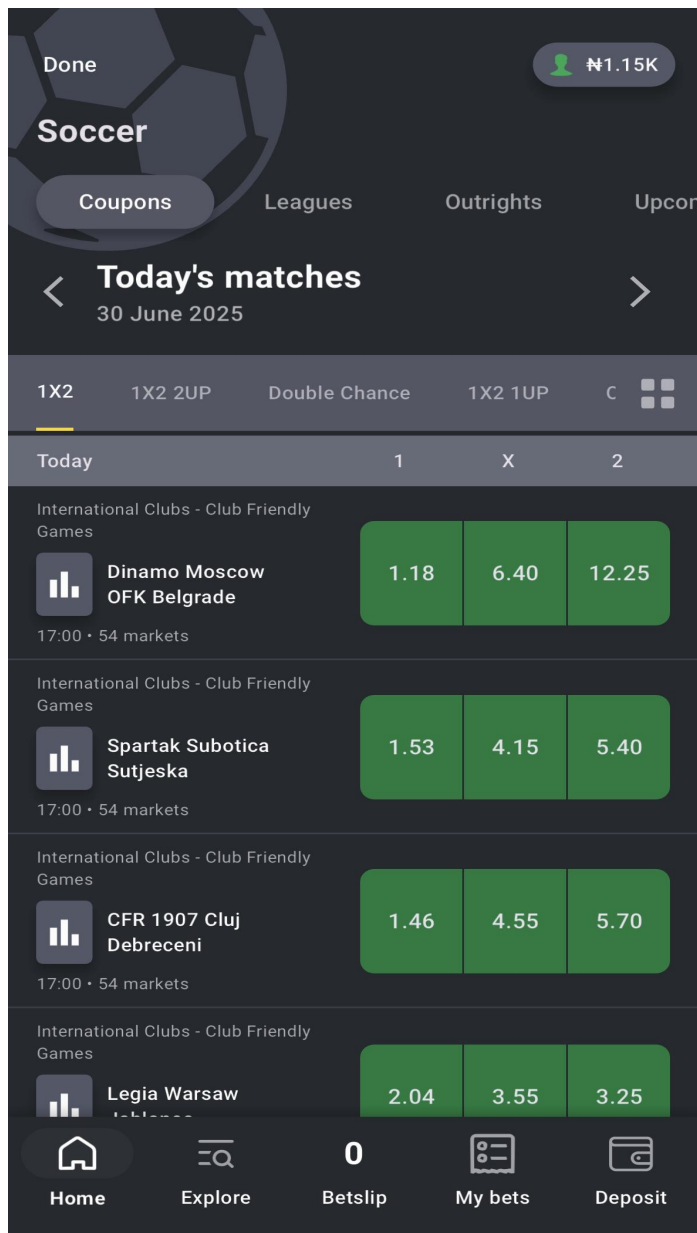

I've already highlighted the Multiple Builder and Hot Popular Bets as some of my favourite features on the Bet9ja app. I'll also add the Book a Bet feature, which lets me quickly load a pre-selected ticket using a booking number. It's another thing that makes betting on Bet9ja really convenient.

How to Place a Bet on the Bet9ja App

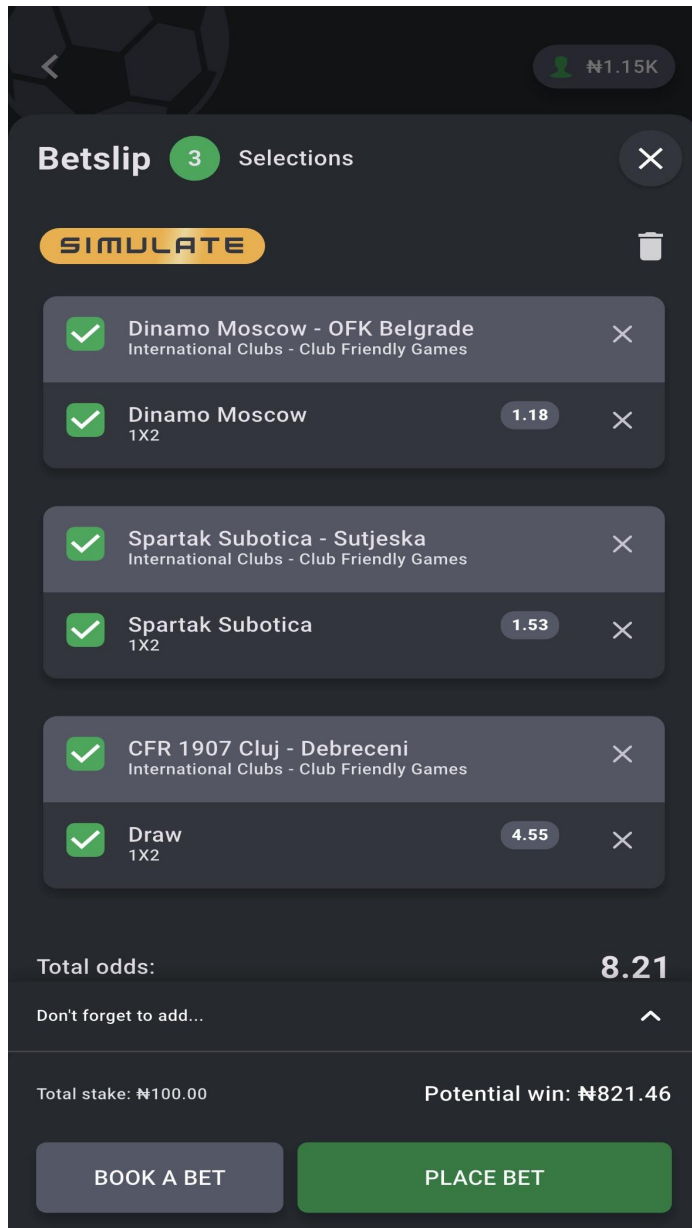

- To place a bet on the Bet9ja app, launch the app from your menu.
- Log in with username and password or Biometrics (Face ID/Touch ID).

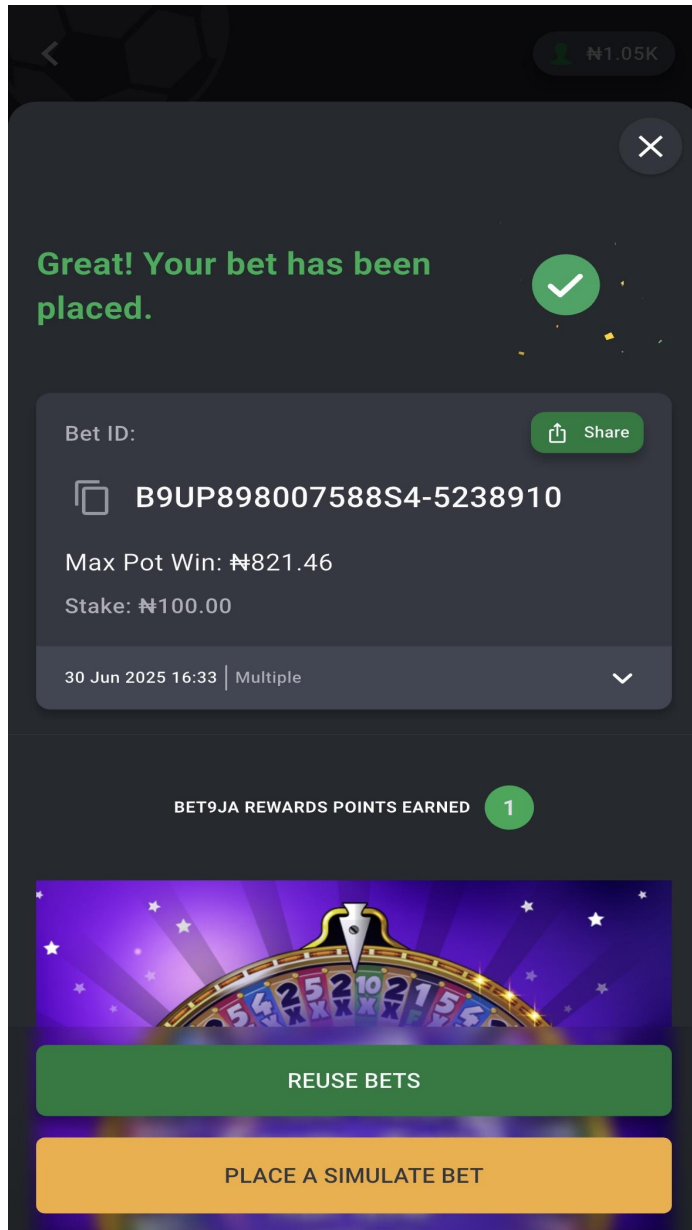

- Once you're in, select the preferred sport you want to wager on from the EXPLORE menu in the bottom navigation bar. For instance, if you want to place a bet on soccer matches, select SOCCER.

- Scroll through the available events and select the one you want to wager on.
- Next, select any preferred market and click on the odds under the market. This automatically registers your selection into your bet slip. You can select up to 40 markets per slip.

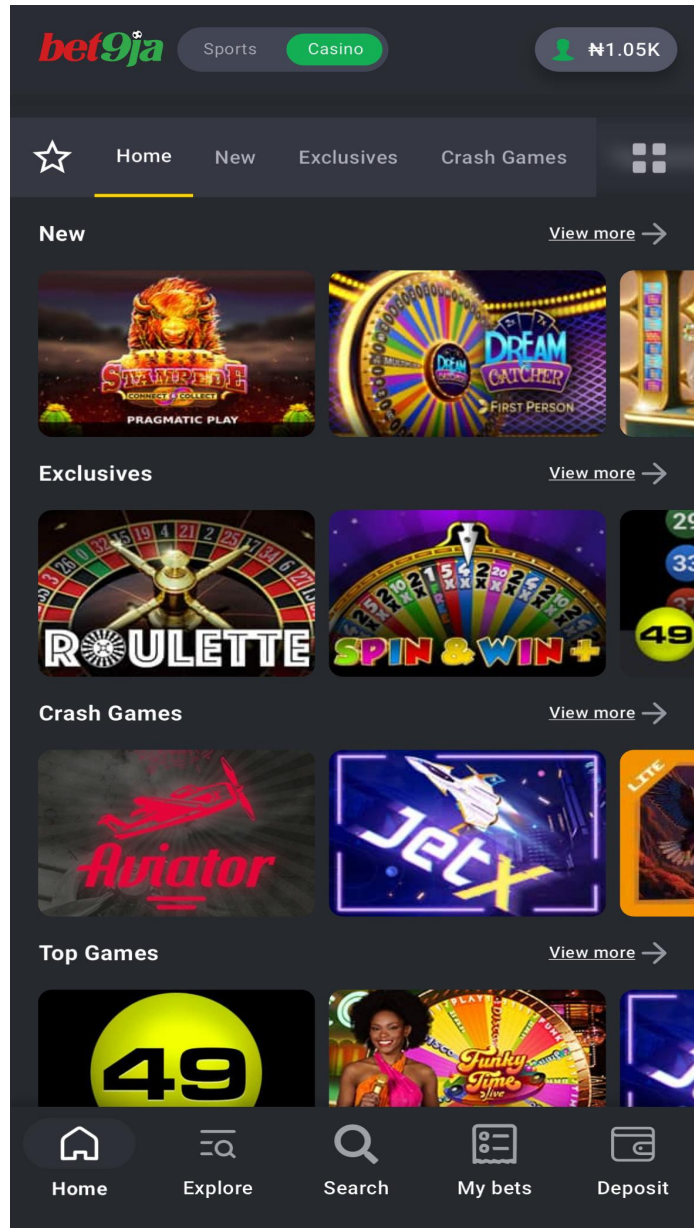

- Once you're done picking, click on BETSLIP from the bottom navigation bar to view your selection and specify the bet amount (minimum stake amount is N10).

- Enter the stake amount and then tap 'PLACE BET'.

Bet9ja App Casino

The Bet9ja app's casino section features over 1,300 games from top providers, including Pragmatic Play. The casino options include Slot games like Gidi Smash, Sweet Smash, Gate of Olympus, Mochimon and several others.

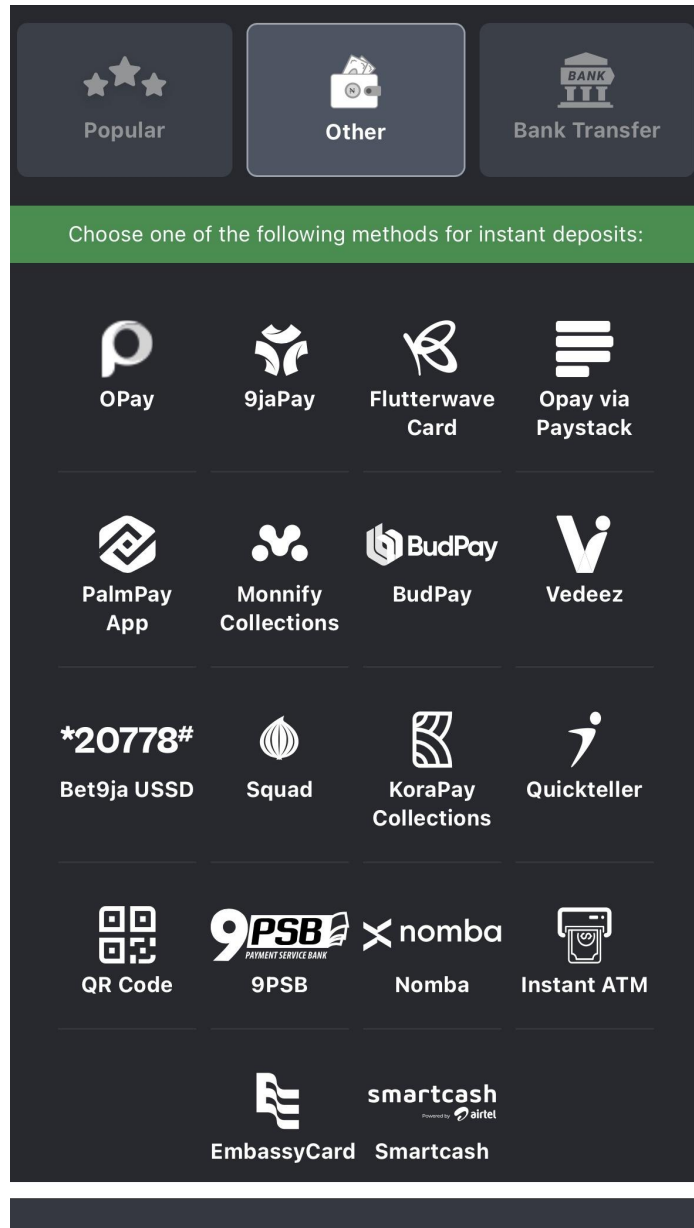

I've also played various table games, including Baccarat, Roulette, Texas Hold 'em, and Six Dice, among others. Bet9ja app casino also features Arcade games, TV games and 64 live dealers. I also found navigating between sports and casino to be way faster than on web. Additionally, the slots, spins and roulette games feel snappier in-app than the web version, which sometimes lags.

I noticed the difference in performance most when playing one of my favourite crash games, Aviator, on the app. It played much better than on the web version, where lag can be an issue. However, roulette filters and layout felt more limited and a bit cramped in-app compared to the website.

The Bet9ja app also features real-time live dealer games, including titles like Roulette, Dream Catcher, Dragon Tiger, Baccarat, Craps, and others also available on the web version.

What's interesting is how developed the casino section is, given that casino gaming hasn't always been seen as one of Bet9ja's main strengths. But based on my experience, casino players will find plenty to enjoy on the Bet9ja mobile app.

Mobile Payment Options on the Bet9ja App

The ease of getting funds in and out of the Bet9ja app is another reason many Nigerians will love the Bet9ja app. I was presented with 33 deposit options, similar to those available on the web version. In-app payment options include the Bet9ja wallet from 9jaPay, credit cards, bank transfers, and popular go-to options like OPay, PalmPay, Monnify, and the Bet9ja USSD.

And with the minimum deposit on the Bet9ja app set at just ~~N~~100, it's easy for everyday Nigerian bettors like me to fund their accounts. When I funded my account using the built-in virtual bank account, the transaction was processed in under 20 seconds.

- Bank Transfer
- OPay

- 9jaPay
- PalmPay
- Veedez
- Bet9ja USSD (*20778#)
- SmartCash
- QuickTeller

Withdrawal options

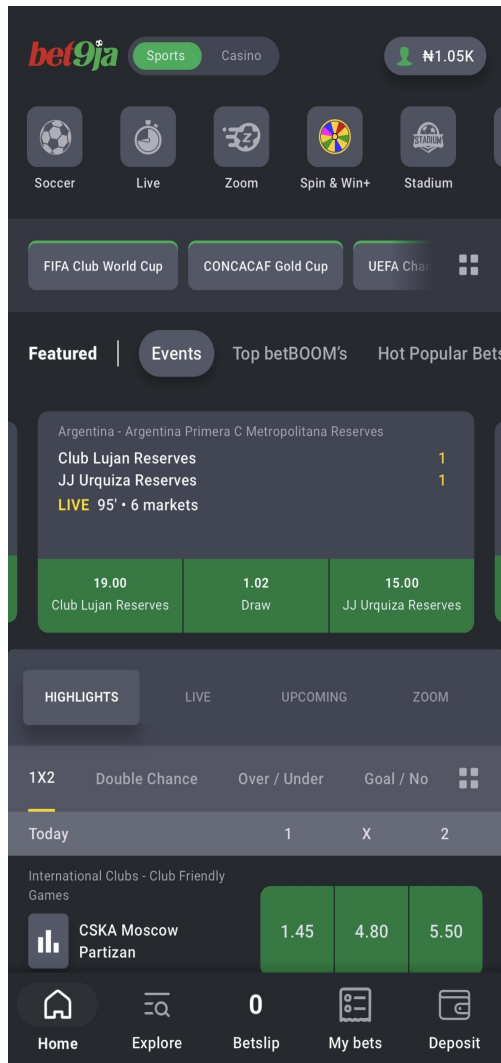

- Bank Transfer

Is the Bet9ja app better than the web version for account funding and withdrawals? Yes! I've always preferred the Bet9ja app for payments due to its speed and convenience. With the app, I don't have to deal with page loads and form resets, unlike in the web version.

Meanwhile, my activities are stored in the app's cache, and thus, it remembers my preferred payment method.

Bet9ja Mobile App vs Web Version

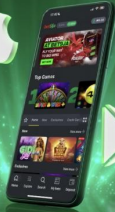

I've been using the Bet9ja app and web version for over a year, and the mobile app is more suitable for day-to-day use. While they both offer nearly the same features and betting markets, the speed of the mobile app is incomparable.

The biometric login and app startup take less than a second compared to the web version, which takes almost 45 seconds to fill in login details and load the homepage. Placing bets, making payments and switching between sports and casino don't take an extra page load on the mobile app.

Weekly App Cashback 📱💰 - Get Up to 30% Back on Your Losses!

You've got the chance to earn big bonuses every week, exclusively on the Bet9ja App! Download our world-class app and place your bets every Monday to Thursday. If you meet the criteria, you'll receive bonuses of up to 30% of your total losses, credited to your account every Friday. It's the perfect way to get more out of your gaming!

How It Works: 📌

When it comes to bonuses and promotions, the Bet9ja app is definitely an upgrade to the web version. The Weekly App Cashback of up to ₦100,000 made me feel less sad about my unsuccessful bets, which is why I've stuck with the app for years. This cashback comes in handy, especially if I don't meet the conditions for the Cut1 Acca Refund bonus.

Then, there are the push notifications that keep me updated on bet results, upcoming events, new promos and cash-out opportunities without having to constantly log in to the app and check my account—a feature that the web version lacks.

One downside I noticed with the mobile app is the constant need to update for new features and bug fixes. However, that's a meagre price to pay for the convenience that comes with using the app. Then, you get a bigger display screen with the web version, which can be very important when comparing odds, streaming matches and tracking multiple games.

I still use the web version sometimes, but the Bet9ja app wins for me and most Nigerians, especially since the vast majority of us own a smartphone, as opposed to about 20.34% who rely on a PC for internet access.

Bet9ja App Pros & Cons

Pros

- Available for iOS and Android in lightweight sizes
- Biometric + PIN one-tap login options
- Built-in virtual bank account
- Faster than web + optimised for low bandwidth usage
- App-exclusive weekly cashback bonus up to ₦100,000

Cons

- Periodic updates
- Frequent session timeouts

Bet9ja Mobile App: Final Thoughts

The Bet9ja app is, by far, one of the most reliable betting apps I've used. While the interface is a replica of the web version, the speed and bet-friendly features continually amaze me. In-play betting and casino games are way more satisfying than the web version that I'm used to. The HD Livestreaming and AI-powered Multiple Builder allows you to track sporting events and place bets much more effectively.

I also appreciate how stable the app is, especially during high-traffic games when the web version can take a while to load. The biometric login makes access extremely quick during these times when those few extra seconds can define winning and losing opportunities.

The payment section is even better! While other betting apps use traditional credit cards and bank transfers for payment, the Bet9ja app goes even further with its built-in Virtual Bank integration. This feature, in addition to casino access and real-time access, makes the Bet9ja app an excellent all-rounder for me.

Plus, using the app is also more rewarding. Unlike the web version, which is limited to 10 bonuses, including a Cut1 Refund, I can get back up to ₦100,000 in Weekly Cashback via the app only. I highly recommend downloading the Bet9ja app for an exceptional betting experience.

FAQ

Is the Bet9ja app legit and safe for Nigerian users?

The Bet9ja app is legit and safe to use. The betting platform is licensed by the Lagos State Lotteries and Gaming Authority (LSLGA) and the National Lottery Regulatory Commission

(NLRC). The app itself is secured with SSL encryption and features such as biometrics and PIN login for added security.

How can I get the Bet9ja old mobile app?

The Bet9ja old mobile app is no longer available for download from official app stores. However, if you specifically want the old version experience, you can visit the Old Bet9ja Mobile site at <https://old-mobile.bet9ja.com>. Meanwhile, avoid downloading any version of the Bet9ja app from unofficial sources to prevent security threats and hacks.

How can I withdraw from the Bet9ja app?

The Bet9ja app withdrawal process supports only Bank Transfers. However, you must add your bank details by logging in to the app. Then click on your Bet9ja profile icon from the top right corner of the homepage. Proceed by going to CASHIER > WITHDRAWAL > ADD BANK ACCOUNT.

After adding your bank details, you can withdraw your Bet9ja winnings by going to CASHIER > WITHDRAWAL > WITHDRAW FUNDS. Input the withdrawal amount and click on MAKE WITHDRAWAL. Your money should reflect in hours or less.

How can I book a bet on the Bet9ja app?

You can book a bet from the app by selecting the events you want to place a bet on. Check out the preferred market, click on the odds, and place a bet from the bet slip.

Alternatively, you can use the "BOOK A BET" option in the top navigation bar if you have a booking number. From the homepage, scroll till you see the BOOK A BET option. Paste the booking number and click on LOAD SELECTIONS, then place your bet.

Do I need to update the app often?

Not often. New updates are rolled out every two months. The new updates typically include security fixes, bug fixes, and the latest features, making them worthwhile. You can easily keep your Bet9ja mobile app updated by enabling the "Automatic Update" feature in your Google Play Store.
