

Beginner:	1.7km	60m	13 Controls	Scale: 1:5000
Intermediate:	2.2km	75m	14 Controls	Scale: 1:5000
Short Adv:	3.5km	135m	10 Controls	Scale: 1:7500
Long Adv:	5.0km	160m	14 Controls	Scale: 1:7500

Start and Finish are both at the Camp Daddy Allen Dining Hall.

Course Notes:

Beginner: All controls will be located along trails or fields in Camp Daddy Allen (but keeping track of where you are in the camp can be tricky at night!). A couple of legs have the option of an off-trail route choice if you are feeling more adventurous. Designed for people who would do a white or yellow course during the day.

Intermediate: Controls are located off-trail in Camp Daddy Allen and the adjacent woods. Designed for people who would do an orange course during the day.

Advanced: There are two versions of the advanced course, both of which are printed on the same map. The long advanced course uses all 14 controls on the map. The short advanced course skips controls 6 through 9, so uses controls 1-5, then goes directly to control 10 and uses controls 10-14. So on the map there will be two lines leaving control 5, going to either control 6 or control 10.

In addition to being longer, the long advanced course is also more challenging. The short advanced course is designed to be accessible to any orienteer who usually runs any brown through blue course in the daytime. The controls would generally be orange difficulty level if it were daytime. The long advanced course has controls that would be advanced difficulty in the daytime, so is geared towards people who have completed previous night-o courses.

You do NOT need to decide if you are doing the short or long course until you reach control 5. *Control 5 is located 1.6km into the course. If it takes you more than a half-hour to reach control 5, I strongly recommend proceeding on the short advanced course to ensure that you finish within the 2 hour time limit!* If at control 5 you decide to do the long advanced course but then change your mind, so long as you complete controls 10-14 you can still record a successful completion of the short advanced course.

When you reach the finish, before you download just tell the computer operator which version of the course you decided to do.

Map Notes:

Medium green generally indicates fairly dense mountain laurel which is very slow to move through, especially at night. Dark green usually represents rhododendron. Many small patches of rhododendron are mapped and can be useful for navigation. Mature rhododendron is often tall enough to run under and can be easier to move through than the medium green mountain laurel.

Map updates were made in late fall 2023 to reflect the current trails and vegetation in Camp Daddy Allen and the adjacent woods.
