

CyclopsDragon's chart commission info (CURRENTLY CLOSED)

General Information

- **Please read this entire document.** The information contained herein is important: you reading it will save me trouble, and may save you money.
- Any and all in-depth discussion of commissions will take place in Discord DMs (CyclopsDragon#8762).
- All completed commissions will include practice sections, star power, and any required solo sections.
- The commissioner may specify any of the following at no additional base charge, keeping in mind that any of these options may add additional time to the charting process, and thus will likely increase the final price (options marked with an asterisk are more or less guaranteed to increase the final price):
 - Add lyrics*
 - Chart without open notes
 - Only chart guitar in the lead chart
 - Include a separate keys/rhythm/bass/drums chart*
 - Chart lower difficulties*
- I will do overcharts, but they are subject to a 15% increased charge due to my unfamiliarity with them.
- If I cannot obtain high-quality audio for the song you are commissioning, I may ask you to provide it to me. If you are unable to provide it, I may add the cost of purchasing high quality audio to the down payment of the commission.
- I reserve the right to decline a commission from anyone for any reason, regardless of any prior business I have done with them
- I have a public queue at <https://trello.com/b/Z7vCXIzl/cyclopsdragons-chart-commission-queue> If you wish to be anonymous on the queue, please let me know when commissioning me.

Payment Information

- Payment will be handled through PayPal. The initial price for a chart is 20CAD. This covers the initial commission cost and one hour of charting. This price must be paid up-front when the commission details are finalized and the audio is obtained, and the charting process will begin within 48 hours of the down payment being received. Returning customers can skip the down payment and pay the full price upon completion.
- Beyond the first hour of charting, the commissioner pays 15CAD for every hour. This is divided into 5CAD per 20 minutes over the hour. This means that should the chart take less than one hour to complete, there will be no further payment. I will also add the PayPal fee to your invoice price. For reference, the most I have ever charged for a chart was 95CAD, for a 6 minute progressive metal song that took me 5h53m23s to chart with full difficulty guitar and drums. If you send me the song you want charted, I can probably give you a decent estimate of the final price within 5 or 10CAD.
- Final payment should be completed no less than 48 hours after delivery of a completed chart.
- For your first commission, please verify that you've read my commission info by saying "pee pee poo poo" at least once during our initial discussion. Commissions are subject to a 10% increase in price if you do not. This increase will go up to 25% if you request any changes that could have been avoided had you read my info in the first place.
